NEWS FOR SPAIN

airWallet

Airwallet is compliant with Verifactu

Spain's new receipt rules are built into Airwallet, so your Airwallet payments are covered without changing the way you work.

What is Verifactu?

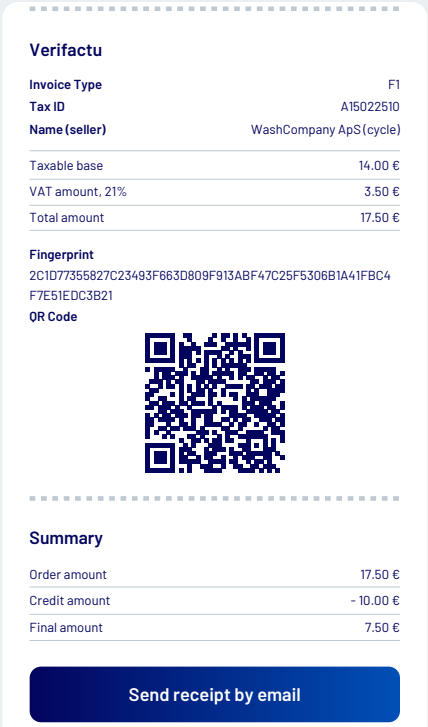

Verifactu is a Spanish tax regulation for invoices issued by Spanish businesses. Every invoice must be created in a certified, tamper-proof format, carry a QR code, and be reported to the Spanish tax agency (AEAT).

When a user pays for a wash at your laundry, that sale is legally a sale from your business to the user. That is why the receipts for your washes fall under Verifactu.

How Airwallet keeps you compliant

Airwallet issues the receipt on your behalf for every wash paid through Airwallet, with Verifactu compliance built directly in:

- **Certified, tamper-proof receipts.** Every wash gets a detailed, tax-compliant invoice.
- **A QR code on every receipt** that proves it is registered with AEAT.
- **Automatic reporting to AEAT** through a certified provider.

The new receipt in the app. Details may differ slightly.

What it means for you

Compliant with confidence

Airwallet has everything in place so these receipts meet the Verifactu requirements.

Business as usual

Prices, payouts, your subscription and your own bookkeeping stay exactly as they are.

Nothing to maintain

Receipts are issued and reported automatically in the background, with no ongoing work for you.
