

MasTec

Case Study

Experts implement OP3™ integration connector between Oracle P6 EPPM & Oracle Financials, increasing data accuracy & standardizing overall reporting processes.

About MasTec

MasTec, Inc. (NYSE: MTZ) is a leading infrastructure construction company operating mainly throughout North America across a range of industries. With offices across North America, a workforce of nearly 22,000 skilled professionals and an extensive wholly-owned fleet of specialized construction equipment, MasTec has the resources needed to handle even the most complicated jobs. Its primary activities include the engineering, building, installation, maintenance and upgrade of communications, energy and utility and customer fulfillment activities.

Challenges

MasTec lacked synchronization of project schedules and wasn't able to true-up actuals between their existing IT solutions. To advance their reporting systems, enable their teams to collaborate cross-projects, and manage large contracts and documents, a comprehensive project management solution for their multi-year duration projects was critical.

- Project Managers (PMs) were managing projects using local Microsoft Excel or Microsoft Project applications
- Project schedules maintenance was not synchronized
- Lacked integrations that would 'true-up' actual numbers between their existing Oracle E-Business Suite (EBS) and Oracle Primavera P6 systems
- No standard project reporting mechanism was in place

Solution

Working with MasTec's PM and IT Departments, Broadpin conducted a functional assessment to review their business processes and define requirements for deploying Oracle Primavera P6 EPPM (P6 EPPM) and Oracle Financials; all of which was based on project portfolio management (PPM) best-practices and configured Oracle functionality.

In addition, Broadpin OP3 integration connector was chosen to standardize project creation, budgeting processes and increase data accuracy between P6 EPPM and Oracle Financials.

Outcome

- Real-time data flow between P6 EPPM and EBS
- Improved internal self-sufficiency and skill with scheduling, budgeting, and reporting across combined PPM solutions
- Established visibility for a true collaborative project management environment
- Primavera Contract Manager provides contracts support
- Broadpin provides 24/7 managed services to maintain and support MasTec's integrated Oracle platform.
