

Cyber security checklist for tradie businesses

Secure your accounts

Use strong, unique passwords - at least 12 characters long, mix of upper/lowercase letters, numbers and symbols

Use a password manager to safely keep track of passwords

Enable two-factor authentication where possible

Keep your devices and information secure

Keep all devices updated with the latest software versions

Install and regularly update antivirus software

Backup data regularly

Make all devices password-protected and set to lock after a short period of inactivity

Set up recovery options for email accounts

Do a factory reset before selling or disposing of business devices

Protect your business

Create a plan to upskill your team and onboard new employees

Consider cyber insurance to protect against potential losses

Be vigilant

Regularly review and update your cyber security measures

Stay up-to-date about the latest cyber threats and scams targeting tradies

Have a plan for quickly reporting lost or stolen devices and responding to cyber security incidents
