

Universal mixer for industrial large-scale production

UMIX® Universal mixers

HF GROUP Universal mixing technology in the proven WP design.

UMIX® is the powerful universal mixer and kneader for low to high viscosity products. **UMIX®** accompanies you from recipe development to industrial series production, from laboratory to production scale, always combining intensive mixing performance, precise temperature control, and flexible discharge concepts. **UMIX®** stands for homogeneous mixing results, stable processes, and high cost-effectiveness.

Your benefits

- Proven WP design for reliable mixing and kneading processes
- Suitable for low to high viscosity compounds
- Precise temperature control
- Solid Z Blade geometry for highly efficient mixing processes
- Flexible discharge options
- Spare parts, renovation and retrofitting of existing HF GROUP U MIX® and WP UK and DUK universal mixers
