

An intermeshing rotor that maximises your benefit

PES7 – THE Intermeshing One

**UP TO 15 %
HIGHER THROUGHPUT**

* The product image shown is for reference only and differs from the actual design.

Upgrade your mixer to the latest intermeshing performance level and benefit with up to **15% higher throughput**. Contact us and arrange mixing trials with **PES7** rotor technology at **HF's Technical Centre**.

Your benefits

- Higher throughput due to significant higher empty volume & up to 5 % higher fill factor
- Improved macro dispersion and distributive mixing performance on same high level
- Improved material intake and faster ram seating time offer potential for better quality or further throughput increase
- Higher flexibility for mixing tasks / applications
- 100 % interchangeable with existing PES5
