

NDA-8000-HCBL Hydrophilic bubble

The hydrophilic coating on the bubble prevents the formation of water droplets, accumulation of dirt, dust and other contaminants on its surface, reducing the likelihood of blurred images caused by rain and dew.

This leads to less frequent cleaning and maintenance, saving time and resources for users. The coating makes it easier to clean the surface, as contaminants are less likely to adhere strongly.

The hydrophilic bubble is compatible with the following devices:

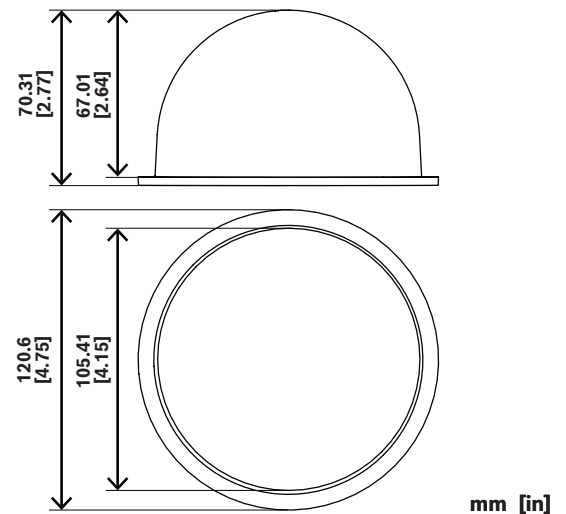

- FLEXIDOME IP starlight 8000i
- FLEXIDOME 8100i
- FLEXIDOME 8100i IR
- FLEXIDOME 8100i — X series
- FLEXIDOME 8100i IR — X series

Regulatory information

Environmental	
Salt mist	IEC60068-2-52
Impact	IK11

- ▶ Enhanced clarity and visibility in wet conditions
- ▶ Easy installation
- ▶ Reduced maintenance and cleaning
- ▶ Increased durability
- ▶ 1-year warranty

Installation/configuration notes

Dimensions in mm (inch)

Parts included

Quantity	Component
1	Bubble
1	QIG

Technical specifications

Mechanical

Dimensions (Ø x H) (mm)	120.6 mm x 70.31 mm
-------------------------	---------------------

Dimensions (Ø x H) (in)	4.75 in x 2.77 in
Weight (g)	95 g
Weight (lb)	0.21 lb
Bubble material	Clear polycarbonate
