CRYOMAGNETICS, INC.
INNOVATIVE TOOLS FOR SCIENTIFIC RESEARCH

October 1, 2026

At Cryomagnetics, Inc., we are committed to conducting business ethically and responsibly throughout our global supply chain. We support the responsible sourcing of minerals and expect our suppliers to share our commitment to human rights, environmental stewardship, and ethical business practices.

We recognize that certain minerals, including tin, tantalum, tungsten, gold, and other minerals used in our products, may originate from regions affected by conflict, human rights abuses, corruption, or environmental challenges. We are committed to implementing due diligence processes designed to identify, assess, and mitigate these risks.

Our Responsible Minerals Sourcing Program is guided by internationally recognized standards, including the Responsible Minerals Initiative. We strive to:

• Source minerals from suppliers that operate responsibly and ethically.

• Avoid knowingly procuring minerals that directly or indirectly finance armed groups, contribute to human rights abuses, or violate applicable laws and regulations.

• Conduct risk-based due diligence within our supply chain and encourage transparency regarding mineral origins.

• Qualify vendors within our supply chain for compliance with RMI/3TG traceability and source materials from those suppliers which have established policies and management systems that support responsible mineral sourcing.

• Support industry initiatives that improve traceability, accountability, and responsible sourcing practices throughout the minerals supply chain.

We expect our suppliers to provide accurate and timely information regarding the origin of minerals used in materials and components supplied to our company and to cooperate with reasonable requests for due diligence information.

Where risks are identified, we will engage with suppliers to develop corrective actions and may reconsider business relationships when suppliers are unwilling or unable to address significant concerns.

This policy reflects our ongoing commitment to responsible business conduct and continuous improvement in supply chain management.
