

International Engineering  
and Construction  
Contractor

For lasting connections.  
On a technical  
and human level.

# LASTING CONNECTIONS

#### THE COMPANY

As an innovative family business, we support you throughout the entire process of industrial plants. Our claim: highest quality, modern technologies and customised solutions that enhance efficiency and sustainability. Together, we develop the industry of tomorrow – with precision, reliability and a clear focus on your individual needs.

One company.  
One mission.  
One responsibility.

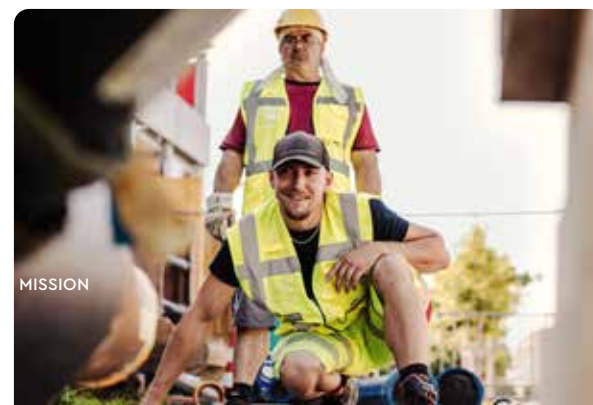

# Impact that matters

## BUILDING FOR TOMORROW

ZAUNERGROUP creates lasting connections – on a social, human and technical level. As an established company in the international engineering and construction industry, we master challenging projects for the major industries of the future.

Our decisions are made with the future in mind, creating a livable world for the next generations.

# What sets us apart

## OUR VALUES

Our world is changing faster and faster. Technologies are evolving – sometimes rapidly. New challenges are part of our daily business. Therefore, we appreciate and live by values that will last for generations and serve as a guide for our actions. Today and tomorrow.

# HANDS-ON

## HOW WE ACT

We approach every concept and execution as a unified effort and consider each task from the beginning to the end. But we don't stop at planning. We identify opportunities, unlock potential, and take decisive action. With determination and commitment, we tackle each project with strength and purpose.

# BRAVE

## HOW WE THINK

Our experience drives innovation: we analyze tasks and opportunities in detail, assess risks carefully and then move forward with confidence and determination. This is how we define and shape our commitment to leadership.

# PERSONAL

## HOW WE STAY

Our family spirit and grounded approach have always been at the core of who we are. This has grown into a strong sense of collaboration at every level, something we take great pride in. We listen, understand and support when it matters. For lasting, respectful relationships at an equal level.

# Managing Board

## PROFILE

What started with Manfred Zauner has now developed into a multidisciplinary management team. All of them are deeply rooted in their fields, actively involved in our daily business and always available.

We prioritize short communication paths, flat hierarchies and quick solutions. That's why we offer direct contacts at all levels – whether in administration or on the construction site. This is what sets us apart as a family business from large corporations. You can find our team and all contact details on our website: [www.zaunergroup.com](http://www.zaunergroup.com)

"Our success is based on sustainable values and leadership principles. These give us orientation and shape the culture of cooperation in our teams and with our partners."

Managing Director  
ZAUNER Anlagentechnik

**Roman Zauner**  
Managing Director  
ZAUNER Anlagentechnik

# Homebase: Austria.

# There for you: International.

# WHAT WE FOCUS ON

OUR PRINCIPLE IS TO DELIVER ON OUR PROMISES.

"We create impact through lasting connections." That is the goal of our work – to build something impactful by creating bonds that endure. Technically and on a human level. This is how we engage with our clients and collaborate within our teams.

## Living precision

Precision is more than just welding and connecting pipelines accurately. We are committed to ensuring the highest level of technical precision from engineering to implementation. However, the precision in communication and project management is our true strength.

## Realising potential

It requires foresight to recognise opportunities within the company and beyond. When we identify growth potential in new industries, we have the courage to pursue it. As pioneers, we are not afraid to approach projects from a different perspective. This is how we grow and help our customers to unlock their full potential.

## Safeguarding values

Safety has evolved to encompass much more than just protecting the workplace. Our employees are our most valuable asset, but our commitment to safety is comprehensive. It includes intellectual property, data and our environment. And, of course, the jobs we provide contribute to the stability of families.

# We live responsibility.

## SAFETY & RESPONSIBILITY

As a family business, we at ZAUNERGROUP think in terms of generations – especially regarding the environment, climate and our most valuable resource: people. Since our foundation, we have committed to our values that ensure we act with safety, health and environmental protection in mind. We focus on today, while also considering the future of our children and grandchildren.

## Environment & climate

We introduced a sustainability management in 2019 – an innovation step for the industry at the time. Today, our sustainability team is dedicated to an even broader approach, ensuring we continuously refine how we interact with people, the environment and resources.

SAFETY & RESPONSIBILITY

## Social

For ZAUNERGROUP, responsibility means above all being there for people. Our employees are our greatest asset. Therefore, we provide opportunities for development and encourage each team member to develop their personal strengths and reach their full potential. Regardless of age, gender, origin or lifestyle, everyone is respected and valued. As a family business, we understand the importance of balancing work and family life, so we offer flexible solutions. We are also committed to our society with national and international measures and projects. In this way, we fulfil social responsibility, create awareness and create positive impact.

SAFETY & RESPONSIBILITY

## Safety

Safety is our top priority. We create a work environment that exceeds standard requirements, ensuring optimal protection for our employees. Since our foundation, we have developed advanced processes that allow us to assess risks more effectively and minimize them as quickly as possible.

# Services and industries

## WHAT WE DO

Together with our customers, we develop industrial plants for the technologies of the future.

### Project Management

Our project management is defined by precision, experience and the latest technology. We support our clients from the very first idea because we believe that success starts with the first handshake.

### Engineering

We provide all services from a single source. For specific industries, we offer our clients customised solutions for entire plants. From the early project phases, we apply our expertise to feasibility analyses, basic engineering and detailed engineering.

### BIM/DfMA

Our team is a specialist in Building Information Modelling (BIM). We also offer a collaborative platform that ensures digital precision, efficient planning and execution through comprehensive expertise.

### Mechanical & Piping

As specialists in industrial connections, we manage the entire mechanical scope of projects – from fabrication to assembly. In addition to metal piping, we are skilled in welding, bonding, and laminating plastic and GRP materials, as well as connecting them.

### Building Services

Our expertise also extends to industrial building services, especially for demanding settings such as pharmaceutical plants and data centres.

### Equipment Assembly

ZAUNERGROUP specialises in the professional assembly of equipment for chemical and pharmaceutical plants.

### Fire Protection

We offer comprehensive fire protection solutions from concept development, design and installation to commissioning and certification.

### EI&C

We provide precise electrical, instrumentation, control and automation technology in compliance with specified standards and guidelines. With our expertise we offer a wide range of services in this field across various industries.

### Commission

ZAUNERGROUP ensures a safe, seamless handover so that the plant is ready for operation.

### Maintenance

ZAUNERGROUP offers regular maintenance services. In addition, we perform flexible maintenance measures in order to resolve breakdowns quickly and efficiently. In this way, we guarantee maximum availability and reliability of your plant.

### Shutdown & Turnaround

We specialize in complex shutdowns and turnarounds. We master planned and unforeseen shutdowns of chemical plants, refineries and steelworks at selected locations.

# Life Science

ZAUNERGROUP offers comprehensive services for the life science industry, including the planning and construction of plants for the production of active ingredients and their raw materials. With expertise across disciplines like medicine, biomedicine, chemistry, and pharmacy, we foster the development of diagnostic tools, medical devices, and high-standard production facilities. We ensure that complex projects are realised efficiently from conception to implementation, always in compliance with the strictest hygiene and safety regulations.

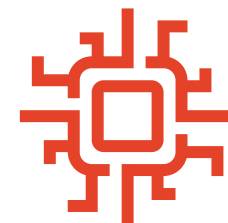

# Data Center

Data centers are a critical component of modern infrastructure and ZAUNERGROUP is your partner for tailored solutions. From hyperscale to colocation and enterprise data centers, we build plants that ensure the highest security standards and efficiency. With many years of experience, we realise projects within time and budget without compromising on quality and security. Our expertise in local regulations and standards guarantees successful project completion across Europe.

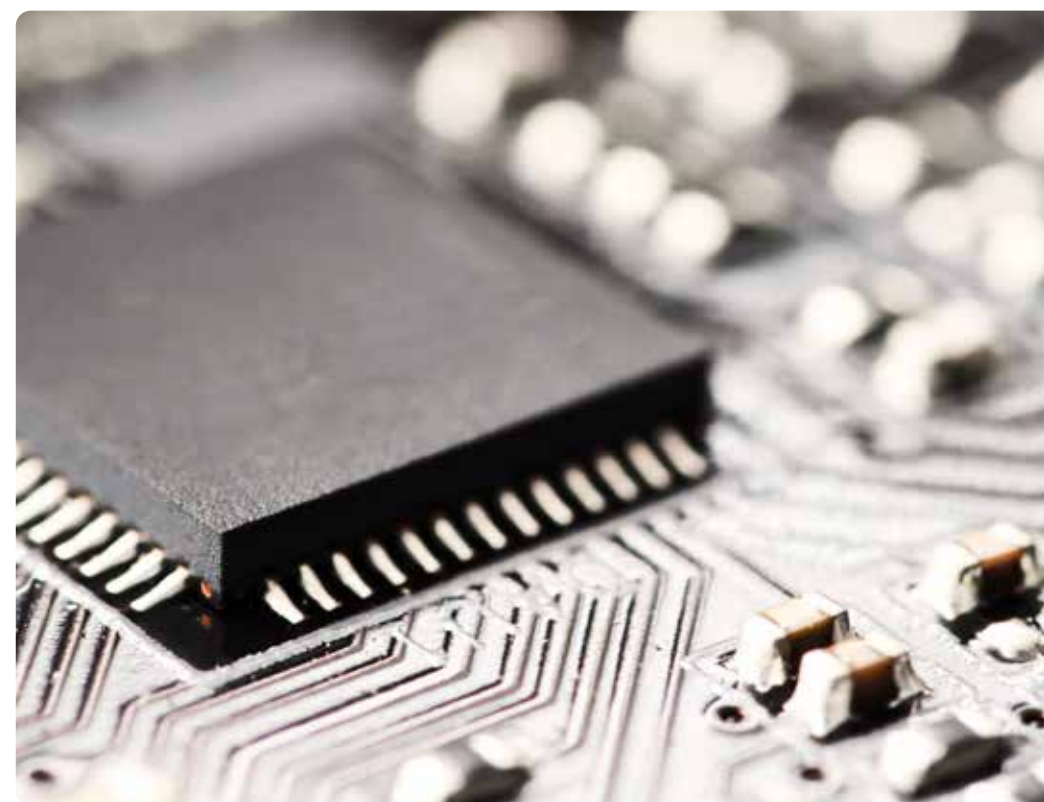

## Battery Production

ZAUNERGROUP covers the entire battery production value chain, from cell production to recycling. Our team specializes in mechanical equipment and ensures the highest performance and safety of the plants. By developing regional production capacities, we aim to drive the mobility transformation and build a sustainable future. Our customised solutions are designed to meet the requirements of electromobility efficiently and safely.

## Semiconductor and Micro-electronics

The semiconductor and microelectronics industry is an important sector of modern technology. ZAUNERGROUP offers specialized solutions for the production and processing of semiconductor products. Our services include the precise and efficient planning and construction of special plants. Our projects contribute to securing production capacities in Europe and ensure that companies maintain their technological leadership in these highly competitive industries.

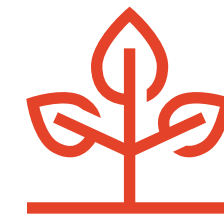

# Energy Technology

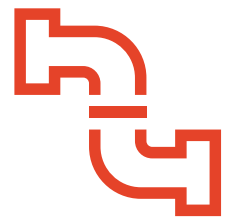

ZAUNERGROUP provides integrated energy solutions, working with municipal energy providers and industrial clients from design to implementation. Through innovative technologies, we are shaping a sustainable, efficient energy future. Our expertise includes EPC projects, district heating and cooling, compact stations, and building technology.

# Green Technology

With experience as a general contractor, we support the realisation of innovative projects in the areas of carbon capture and storage (CCS), electrolysis for hydrogen production or the integration of electrode boilers for hot water or steam production. By combining proven technology with smart methods, we ensure these projects make a real difference for a livable future.

# Industrial Piping

Industrial piping construction has been one of our core competencies since our foundation. We support companies in the planning, calculation and implementation of complex piping systems designed for all media, pressure and temperature levels. Our services range from material procurement to final acceptance. Always safe, always efficient and always with customised solutions.

# Industrial Services

We provide support for regular maintenance, major shutdowns, and plant upgrades. Our services extend the lifespan of industrial facilities. We also improve their safety, sustainability, and efficiency.

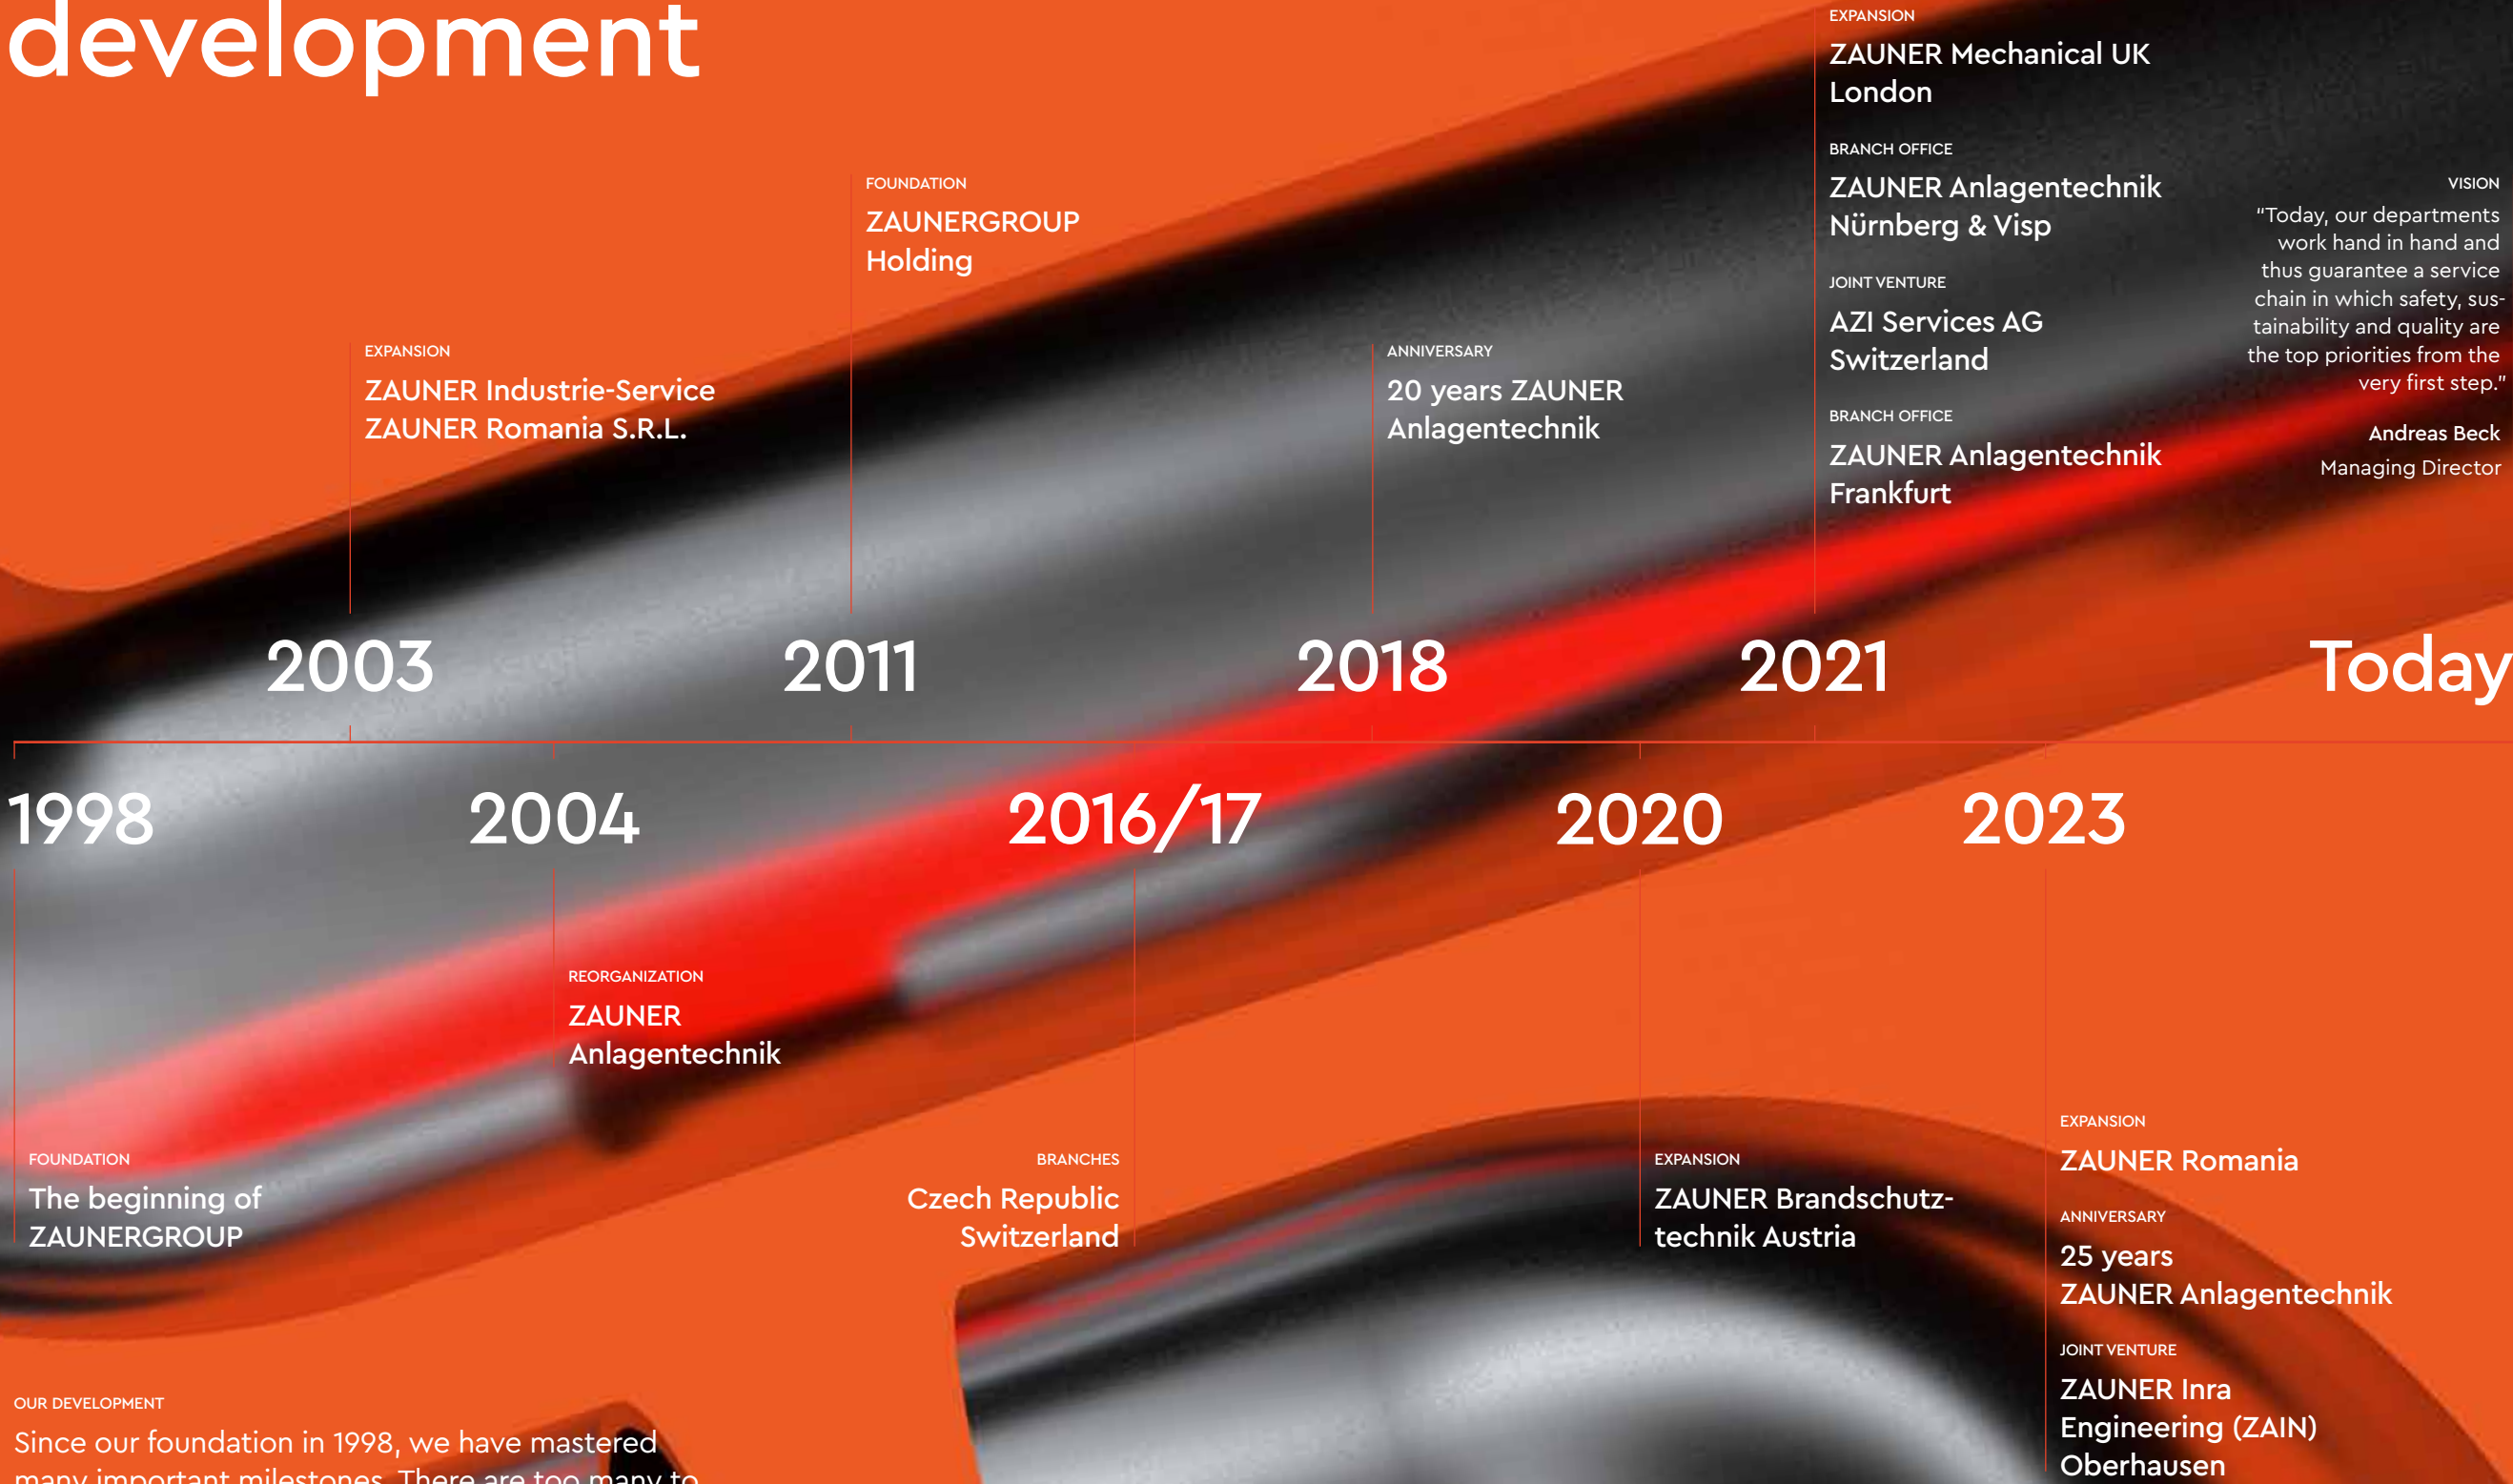

## REFERENCES

With years of experience and extensive expertise, we have successfully completed numerous projects.

# Our development

OUR DEVELOPMENT

Since our foundation in 1998, we have mastered many important milestones. There are too many to describe them all. Here, we present a brief summary of the history of ZAUNERGROUP.

#### HERE FOR YOU

We look forward to speaking with you. At our headquarters in Wallern an der Trattnach, we are ready to handle your inquiries directly or assist you in connecting with the right contacts at our various locations.
