

ZAUNERGROUP Company Profile (As of March 2026)

ZAUNERGROUP is one of the international specialists in industrial plant and pipeline construction. Originally founded as a regional family business, the group now employs over 1,100 people at several locations in Europe.

The company implements projects in future-oriented industries such as life sciences, data centres, semiconductors and microelectronics. Each project is managed individually: from project management, engineering, prefabrication and assembly to commissioning and maintenance, ZAUNERGROUP offers tailor-made solutions from a single source.

One focus is on close cooperation with customers to ensure technical precision and smooth processes. This results in industrial plants that meet complex requirements and enable long-term use.
