APPROVAL LETTER

January 2026

Dear Alliance Global Procurement,

Thank you for submitting your greenhouse gas emission reduction target(s) to SBTi Services for validation.

The SBTi Target Validation Team has assessed your company's targets against the SBTI Services' SME Criteria Assessment Indicators (Version 1.1) and after careful review, we are happy to inform you that your submitted target(s) have been approved.

Basic information about your company and the approved target(s) will be listed on the SBTi Target Dashboard. The following agreed target wording will be used:

Alliance Global Procurement commits to reduce absolute scope 1 and scope 2 GHG emissions 63% by 2035 from a 2024 base year, and to measure and reduce its scope 3 emissions.

Congratulations on your approved science-based target(s)!

Best regards,
SBTi Services

SBTI Services Limited is a limited company registered in England and Wales (15181058). Registered address: 66 Lincoln's Inn Fields, London, England, WC2A 3LH. SBTI Services Limited is a wholly owned subsidiary of Science Based Targets Initiative.

D2_SBTi Criteria for Near-Term targets_AGP Group_EN

Methodology and Establishment of Decarbonization Targets for the Alliance Global Procurement Group, in accordance with GHG Protocol standards and SBTi Criteria Assessment Indicators.

Appendices 18

Foreword

This document details Alliance Global Procurement's organization, Near-term targets and methodology to measure its emissions and commit to progression, according to those standards :

- Scope 1 & 2 GHG Inventory Guidance
- GHG-protocol-revised
- Technical Guidance for Calculating Scope 3 Emissions
- Corporate Value Chain (Scope 3) Accounting and Reporting Standard
- SBTi Services Criteria Assessment Indicators
- Supplier-Engagement-Guidance.pdf
- SBTi FAQs for SMEs
- Target Validation Services - SBTi Services
- Guide-pratique-SBTi_.pdf

This document is structured according to the Criteria Assessment Indicators, following its step by step analysis.

To ensure accurate, exhaustive and fully compliant Scope 1+2+3 GHG inventory, Alliance Global Procurement works with Global Climate Initiatives, an expert providing a trusted collaborative carbon platform, based on a recognized methodology and aligned with international standards (including SBTi and the GHG Protocol).

For any further question, you may contact Alliance Global Procurement here.

1. NT C1 - Organizational Boundary

✅ Alliance Global Procurement submit targets only at the group level and include the emissions of all subsidiaries in their target submission, in accordance with the boundary criterias outlined in NT C2 to NT C6, and NZ C2 to NZ C7.

Disclosure of organizational boundary

Alliance Global Procurement is an SME that measures its carbon footprint annually for CapBooster (Holding) and its subsidiaries : Alliance High Tech and Systemgie (operational entities). Alliance Global Procurement then consolidates the carbon assessments with the expertise of its partner, Global Climate Initiatives. Therefore, **all entities within the Group are covered by the carbon footprint measurement.** Based on this annual analysis, Alliance Global Procurement updates its progress plan and its 360° climate change mitigation approach.

Alliance Global Procurement meets the following criteria to benefit from the simplified SME pathway :

✅ **Total Scope 1 + Scope 2 emissions < 10,000 tCO2e**
Yes: Alliance Global Procurement's Scope 1 + 2 emissions are 14.24 tCO2 in 2024.

✅ **Not part of restricted sectors:**
Financial institutions: No
Oil & gas: No
Subject to mandatory sector-specific criteria (unless FLAG): No

✅ **Not a subsidiary of a group subject to standard validation**
Alliance Global Procurement is the parent company, including its operational entities : Alliance High Tech and Systemgie.

✅ **And meets at least 3 of the 4 following conditions:**

- Fewer than 250 employees: **Yes** (97 FTE on 2024 average, 106 FTE on the 1st semester 2025)
- Revenue < €50M: **No** (AGP Group has reported revenue of €203,736,671 – in 2024)
- Total assets < €25M: **Yes** (AGP Group total assets in 2024 = €1,437,066.65)
- Not part of a mandatory FLAG sector (Forest, Land & Agriculture): **Yes**, AGP Group isn't part of a mandatory FLAG sector, nor is a FLAG-related emissions company.

Therefore, Scope 3 targets are not mandatory in the short term, but Alliance Global Procurement commits to measuring and reducing them.

Disclosure of organizational structure

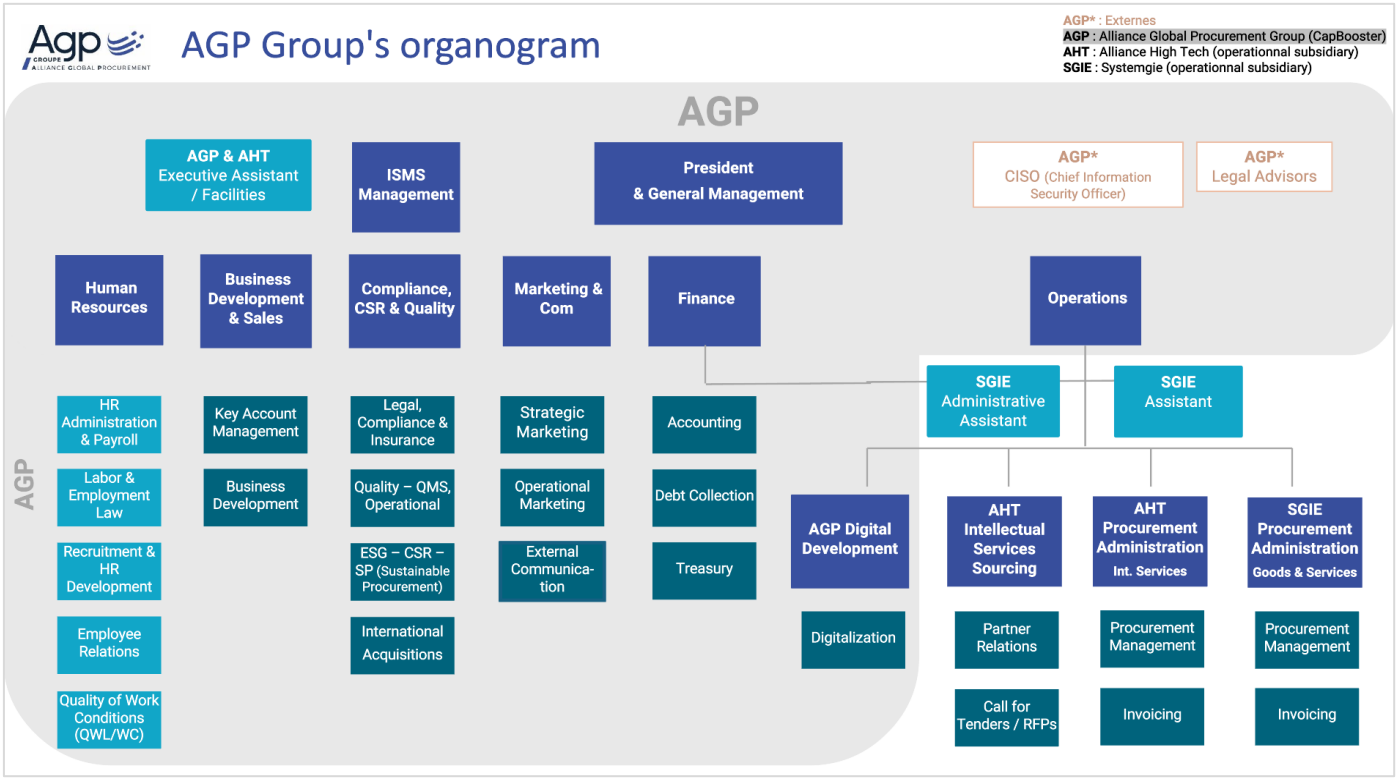

Alliance Global Procurement (AGP Group) acts as a trusted intermediary between the procurement departments of major corporations — leaders in their respective sectors — and their SME / SMB / mid-cap suppliers of intellectual services.

The solutions offered by Alliance Global Procurement are as follows:

1. **Sourcing & Contractualization**: supplier identification and qualification, tripartite contractual agreements, regulatory compliance analysis.
2. **Business Hosting & Administration**: administrative and legal management, centralized invoicing, contractual hosting, support with reporting and traceability obligations.
3. **Advisory & Support**: ad hoc consulting missions to structure responsible procurement approaches, supplier awareness and training, change management support, CSR maturity assessment.

Please find below Visual 1, representing Alliance Global Procurement's structure and organogram. Visual 2 details how entities are distributed per site. Visual 3 details organizational & operationnal boundaries as asked by GHG protocol standards (p.27).

44 800 SAINT-HERBLAIN

Visual 3 – AGP Group's organizational & operationnal boundaries

Disclosure of exclusions

No exclusions have been made : Alliance Global Procurement worked closely with Global Climate Initiatives' expertise to ensure all emissions were accounted.

No merges, acquisitions or disvestments occured during the year of reference (2024).

2. NT C2 - Greenhouse gasses

Inclusion of greenhouse gasses

The GHG inventory must cover all relevant emissions of the seven different GHGs or classes of GHGs covered by the UNFCCC/Kyoto Protocol.

Based on the GHG Protocol, "Companies shall account for [...] emissions of carbon dioxide (CO2), methane (CH4), nitrous oxide (N2O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulphur hexafluoride (SF6), if they are emitted in the value chain".

Alliance Global Procurement, working with Global Climate Initiatives' expertise to measure its GHG emissions, bases its analysis on the official ADEME database (Base Carbone®).

The Base Carbone® is a public database, managed by ADEME, containing emission factors necessary for carrying out carbon accounting exercises. ADEME provides the following description on its website : "Today, it is the reference database under Article 75 of the Grenelle II Act". The french Environmental Code (Article L229-5) strengthens the Grenelle II Act and reiterates the list of greenhouse gases as defined by the Kyoto Protocol (CO_2, CH_4, N_2O, HFCs, PFCs, SF_6).

Therefore, the Base Carbone® 's emission factors includes those GHG, when and if emission factors are concerned by one or more GHG, and taking into account the ratios that make it possible to determine the GHG emissions associated with an object, a material, or a service. ADEME Base Carbone® converts GHG emissions into tCO_2e, resulting in a final inventory expressed in tCO_2e.

3. NT C3 - Scope 1 and scope 2

Inclusion of scope 1 & 2 activities

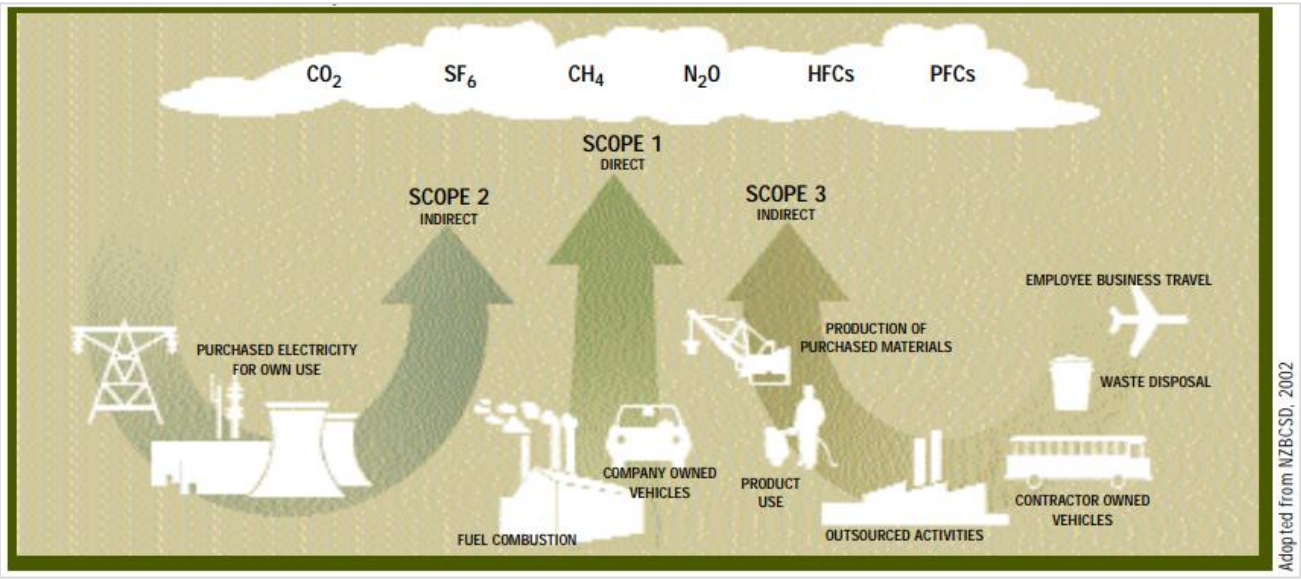

With the support of the Global Climate Initatives' tool and expertise, **all emission factors related to Alliance Global Procurement's activities have been identified and assessed**.

Visual 4 - GHG inventory of scope 1 & 2, made with Global Climate Initiatives tool

Scope	Résultats par Scope [GHG Protocol] (tCO2e)
Scope 1	**Emissions directes de GES**
1-1	Émissions directes des sources fixes de combustion
1-2	Émissions directes des sources mobiles de combustion
1-3	Émissions et absorptions directes des processus industriels
1-4	Émissions fugitives directes résultant de la libération de GES dans les systèmes anthropiques
Scope 2	**Emissions indirectes associées à l'énergie**
2-1	Émissions indirectes dues à l'importation d'électricité
2-2	Émissions indirectes provenant de l'énergie importée autre que l'électricité

Those emission factors proposed by Global Climate Initiatives are aligned with GHG protocol standards (Visual 5).

Visual 5 – Extract from GHG protocol standard

The document named "D2_AGP_GHG inventory_2024_EN" details Alliance Global Procurement's GHG inventory (Extract in Visual 6) :

- GHG sub-categories,
- Internal data sources,

- Emission factors,
- Official emissions database and unit,
- Reported emissions about Scope 1 + 2 GHG inventory,
- Internal and external revisions.

Visual 6 - Scopes 1+2 GHG inventory extract

Scope	GHG sub-categories	Data source	Emission factors	Emission factor database	Version	Unit	Reported emission	1st Internal Data review	2nd Internal Data review	1st External Data review	2nd External Data review
1-2	Direct emissions from mobile combustion sources	Vehicle fleet leasing contract	Average car – Hybrid, km	BEIS (UK-DEFRA) database	2024	kgCO2e/km	0.14488	PJA - Facilities	SLA - Compliance, Quality & CSR director + TPI - CFO	VKE - Carbon Consultant @ Global Climate Initiatives	ADD - Customer Success Manager & Carl Consultant @ Global Climate Initiatives

3-1	Purchased goods and services	General ledger 2024	libraries / Gambling – 2023 – Mainland France	Base Carbone® database	V23_6	kgCO2e/k€ (2023) excl. VAT	104	VRO & SLA - Accounting	SLA - Compliance, Quality & CSR director + TPI - CFO	VKE - Carbon Consultant @ Global Climate Initiatives	ADD - Customer Success Manager & Carl Consultant @ Global Climate Initiatives

This document is also used for Scope 3 GHG inventory.

For 2024 full year (year of reference), Alliance Global procurement's Scope 1 emissions are 13.4 tCO2e, and Scope 2 emissions are 0.85 tCO2e. You may find details of its emissions in the document named "D2_GCI-ghg-activity-report-AGP-2024_FR", edited by Global Climate Initiatives.

According to the SBTi target setting tool (last version available), Alliance Global Procurement commits to reduce Scope 1+2 emissions 63% by 2035 from a 2024 base year.

Want to learn more about how AGP Group engage to decarbonize Scope 1+2 ? Please consult the Decarbonization Progress Plan attached (D3_Decarbonization Progress Plan_AGP Group_EN).

4. NT C4 - Scope 3

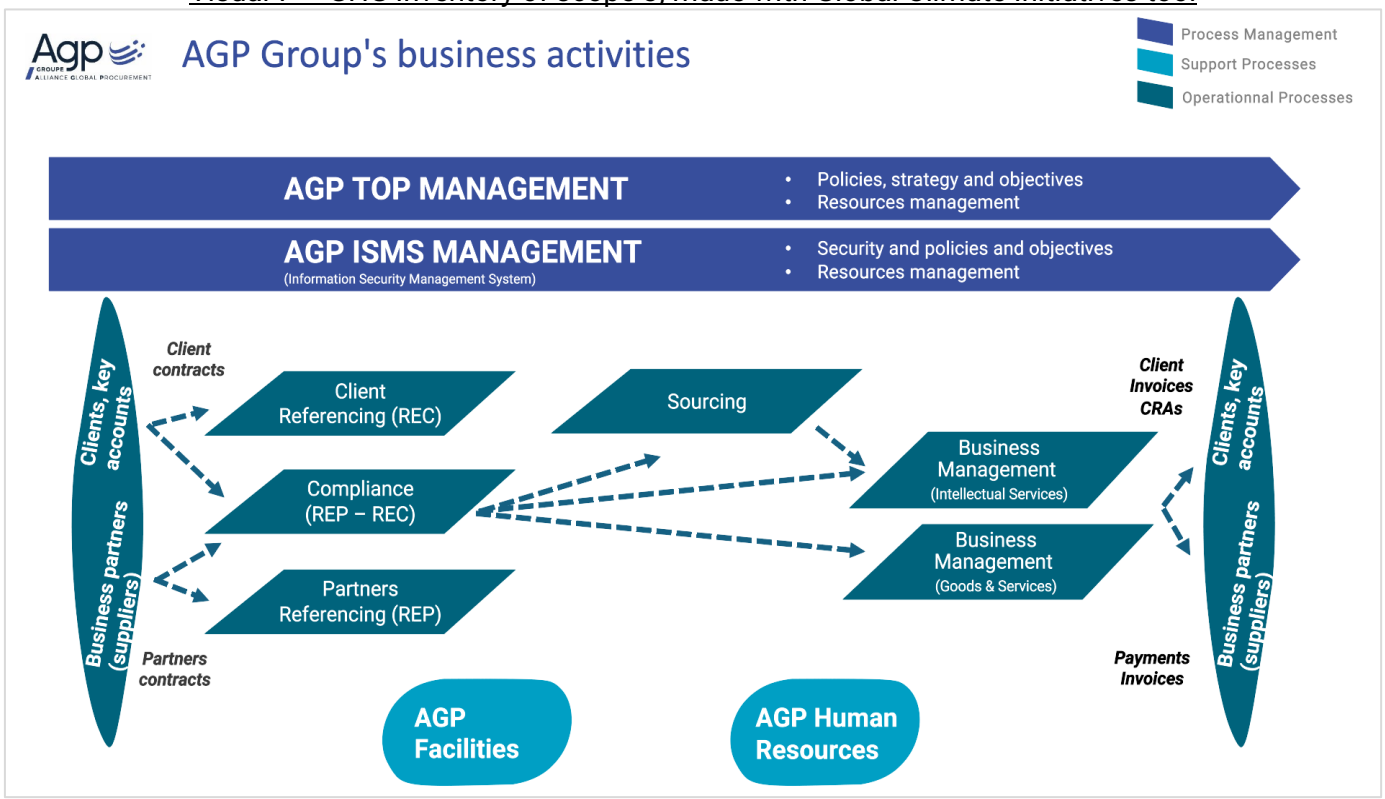

Complete disclosure of GHG inventory based on GHG Protocol Scope 3 Standard

Given Alliance Global Procurement's 100% digital activities, its relevant scope 3 emissions are 98.7% of total scope 1, 2, and 3 emissions, Scope 3 is included in near-term science-based targets. By declaring as an SME on the submission form, **Alliance Global Procurement commits to measure and reduce its Scope 3 emissions.**

As seen on the Organogram (Visual 1) and the Alliance Global Procurement's business activities described on Visual 7, the Group acts as a representative of its clients, placing orders in their name and on their behalf, and is not involved in the sale or distribution of fossil fuel products.

Want to know more about Alliance Global Procurement's activities ? Please consult its website Groupe AGP or contact us here.

Visual 7 – GHG inventory of scope 3, made with Global Climate Initiatives tool

You may find below (Visual 8) **the entire GHG inventory in line with the GHG Protocol Corporate Value Chain Scope 3 Standard** (Visual 9) – made with the tool and the expertise of Global Climate Initiatives.

Visual 8 – GHG inventory of scope 3, extract from Global Climate Initiatives tool

Scope 3	Autres émissions indirectes de GES	1 097,93
3-1	Produits et services achetés	286,66
3-2	Immobilisations	617,47
3-3	Emissions liées à l'énergie scope 3	1,25
3-4	Transport de marchandises en amont	0,00
3-5	Élimination des déchets solides et liquides	3,20
3-6	Déplacements professionnels	32,02
3-7	Trajets domicile-travail des employés	157,34
3-8	Actifs loués en amont	0,00
3-9	Transport de marchandises en aval	0,00
3-10	Transformation des produits vendus	0,00
3-11	Phase d'utilisation du produit	0,00
3-12	Fin de vie des produits vendus	0,00
3-13	Actifs loués en aval	0,00
3-14	Franchises en aval	0,00
3-15	Investissement	0,00

Visual 9 – Scope 3 categories, extract from the GHG Protocol Corporate Value Chain Scope 3 Standard

Upstream or downstream	*Scope 3 category*
Upstream scope 3 emissions	1. Purchased goods and services 2. Capital goods 3. Fuel- and energy-related activities (not included in scope 1 or scope 2) 4. Upstream transportation and distribution 5. Waste generated in operations 6. Business travel 7. Employee commuting 8. Upstream leased assets
Downstream scope 3 emissions	9. Downstream transportation and distribution 10. Processing of sold products 11. Use of sold products 12. End-of-life treatment of sold products 13. Downstream leased assets 14. Franchises 15. Investments

The document named “D2_AGP_GHG inventory_2024_EN” details : internal data sources, emission factors, official emissions database, unit and reported emissions about Scope 3 GHG inventory, according to Alliance Global Procurement’s activites (Extract in Visual 10).

Visual 10 – Scope 3 GHG inventory extract

For 2024 (year of reference), Alliance Global procurement's Scope 3 emissions are 1098 tCO2e ; they are detailed in the document "D2_GCI-ghg-activity-report-AGP-2024_FR" edited by Global Climate Initiatives.

As detailed in section 1 – NT C1, Alliance Global Procurement is committing through SME pathway. Therefore, Scope 3 targets are not mandatory in the short term, but Alliance Global Procurement commits to measuring and reducing them.

Alliance Global Procurement's ambition should be to reduce Scope 3 emissions 26% per custom physical intensity by 2030 from a 2024 base year (equal to a linear annual reduction of −4.5% per year per custom intensity, aligned with 1.5°C ambition).

5. NT C5 - Scope 1, 2, and 3 allowable exclusions

Scopes 1 and 2 exclusion

As declared in the online the submission form, 100% of Alliance Global Procurement's scope 1&2 emissions are covered by its neat-terme target.

Scope 3 exclusion

As declaring as an SME, Alliance Global Procurement's Scope 3 targets are not mandatory in the short term, but Alliance Global Procurement measures 100% of its Scope 3 emissions (with the expertise of Global Climate Initiatives) and commit to reduce them.

Please refer ton section "NT C9 – Scope 3 inventory" for more details.

6. NT C6 - Scope 3 emissions coverage for near-term targets

Scope 3 target boundary coverage

Alliance Global Procurement's objective covers all categories concerned by its scope 1+2+3 emissions.

The visual 11 below shows estimated progression per category, using an absolute contraction approach for Scopes 1 & 2, and a physical intensity for Scope 3.

100% of Alliance Global Procurement' scope 3 categories GHG accounting are covered in the emission reduction near-term targets.

7. NT C7 - Method validity

To set its near-term targets, Alliance Global Procurement first uses Global Climate Initiatives' tool to **measure Scopes 1, 2 & 3 GHG emissions relevant with its activities** (document "D2_GCI-ghg-activity-report-AGP-2024_FR").

Then thanks to the SBTi guidance and the SBTi target setting tool (version 2.4), Alliance Global Procurement **defines its Scope 1 & Scope 2 near-term target aligned with 1.5 degree scenario** (document "D2_SBTi-target-setting-tool-Groupe AGP_EN").

Those targets are reported in the document named " D3_Progress plan Trajectory_AGP Group_FR" (See extract in Visuel 9), **comparing targets with the estimated impact of the actions planned for the next 5 years**.

The total impact of the progress plan is reported per category in the Table above (Visual 11) in the column "annual decarbonization estimated", allowing easy identification of the categories on which Alliance Global Procurement should **focus its decarbonization efforts**.

The progress plan is then summarized in the document “D3_Decarbonization Progress Plan_AGP Group_EN” (attached) and shared with Alliance Global Procurement’s employees through a multi-canal communication plan.

With this method, Alliance Global procurement designs a Scope 3 realistic target, and a clear Scope 1+2+3 roadmap to achieve its decarbonization objectives.

Visual 11 – Near-term Targets per categories of AGP Group’s GHG accountance

Action Plan Categories (Global Climate Initiatives & GHG Protocol aligned))	GHG Emission Factor	Scope	Reference Year TOTAL 2024	SBTi 2030 Target (%)	SBTi 2030 Target (tCO_2e)	Annual Decarbonization estimated	Estimated Carbon Footprint 2030	Total Estimated Decarbonization in 2030 (%)
Energy	Indirect emissions from imported electricity	2	0,9	-42%	0,5	0,7	0,2	-79%
Other direct emissions (non-energy)	- Direct emissions from mobile combustion sources - Direct fugitive emissions from GHG releases in anthropogenic systems	1	13,4	-42%	7,8	5,3	8,1	-40%
TOTAL SCOPES 1+2 (Absolute contraction approach)			14,3	-42%	8,3	6,0	8,3	-42%
Travel	- Business travel- Employee commuting - Scope 3 energy-related emissions	3	208,9	-25%	156,7	9,1	199,8	-4%
Assets	Capital goods	3	617,5	-25%	463,1	2,7	614,7	0%
Materials and purchased services	Purchased goods and services	3	286,7	-25%	215,0	30,3	256,3	-11%
Waste	Disposal of solid and liquid waste	3	3,2	-25%	2,4	1,3	1,9	-40%
TOTAL SCOPE 3			1116,2	-25%	837,2	43,4	1072,8	-4%
Physical Intensity (# FTE 2024)			96,7	-25%	125,0	125,0	125,0	
SCOPE 3 (tCO_2e/unit of physical activity)			11,5	-52%	5,6	0,3	8,6	-26%
TOTAL SCOPES 1+2+3 (Absolute Value)			1130,4		749,8	49,4	1081,0	-4%

8. NT C8 - Scope 2 accounting approach

Please refer to the online submission form where Alliance Global Procurement disclose its location-based accounting approach, and its data source. Alliance Global Procurement confirms this method will be used consistently for tracking target progress.

9. NT C9 - Scope 3 inventory

Visual 12 details categories relevant and their emissions measured, and categories not relevant according to Alliance Global Procurement’s organizational boundaries. Document named “D2_GCI-ghg-activity-report-AGP-2024_FR" details the GHG emissions by entity (Alliance High Tech, Systemgie and CapBooster) and consolidated at the Group level (Alliance Global Procurement), along with the emission factors used and the source database.

Visual 12 – 2024 tCO_2e emissions by regulatory categories [GHG Protocol]

	Results by regulatory categories [GHG Protocol] (tCO_2e)	2024
1-1	Direct emissions from stationary combustion sources	Not relevant
1-2	Direct emissions from mobile combustion sources	3,22
1-3	Direct emissions and removals from industrial processes	Not relevant
1-4	Direct fugitive emissions resulting from the release of GHGs in anthropogenic systems	10,18
2-1	Indirect emissions from imported electricity	0,85
2-2	Indirect emissions from imported energy other than electricity	Not relevant
3-1	Purchased goods and services	286,66
3-2	Capital goods	617,47
3-3	Scope 3 energy-related emissions	1,25
3-4	Upstream transportation of goods	Not relevant
3-5	Disposal of solid and liquid waste	3,20
3-6	Business travel	39,16
3-7	Employee commuting	168,41
3-8	Upstream leased assets	Not relevant
3-9	Downstream transportation of goods	Not relevant
3-10	Processing of sold products	Not relevant
3-11	Use phase of sold products	Not relevant
3-12	End-of-life treatment of sold products	Not relevant
3-13	Downstream leased assets	Not relevant
3-14	Downstream franchises	Not relevant
3-15	Investments	Not relevant

Global Climate Initiatives's plateform (used by Alliance Global Procurement for GHG inventory) is aligned with scope 3 GHG calculation methods (described in Technical Guidance for Calculating Scope 3 Emissions).

10. NT C13 - Base and target years

Base year for Alliance Global Procurement's GHG inventories is the most recent year : 2024.

The carbon footprint measurement is aligned with fiscal years, which correspond to calendar years (for the reference year 2024: from January 1, 2024, to December 31, 2024).

Please find attached to the Submission form, the relevant GHG inventory data including (2024) in the document named "D2_GCI-ghg-activity-report-AGP-2024_EN"

11. NT C15 & C16 - Ambition for scope 1 and 2 absolute targets

To ensure Alliance Global Procurement's absolute reduction targets for scope 1 and scope 2 are consistent with the 1.5°C goal, we calcultated the target with the *SBTi target setting tool* (document attached to the submission form, extract on Visual 11 below).

Visual 11 - Scopes 1 & 2 near-term targets defined with *SBTi target setting tool*

Section 3. Cross-sector absolute reduction / Absolute contraction approach (ACA)

1.5 degree scenario (1.5C)

Review all target modelling data

	Base year (2024)	Same as base year	Target year (2035)	% Reduction to date	% FLA Adjustment	% SBT reduction
Scope 1 emissions (tCO2e)	13	-----	5	-----	Not required	63,00%
Scope 2 emissions (tCO2e)	1	-----	0	-----	Not required	63,00%
Scope 1+2 emissions (tCO2e)	14	----	5	----	0,00%	63,00%

This target induce a Linear Annual Reduction (LAR) of –8.6% for Scope 1+2, way above the 4.2% recommanded for absolute reduction target (criterion NT C16).

12. NT C18 - Level of ambition for scope 3 emissions reductions targets

The target is based on reduction of physical intensity.

Alliance Global Procurement chose the number of FTE as physical intensity denominator as a metric :

- representative of the reporting company's emissions in the target boundary
- representative of the company's evolution
- easily measurable year on year

13. NT C19 - Supplier or customer engagement targets

Based on the Supplier Engagement Guidance (version 1.1), Alliance Global Procurement formalized a Supplier Engagement Strategy that will be continuously improved year after year.

This Supplier Engagement Strategy is to be find in the “D3_Decarbonization Progress Plan AGP Group” (Visual 12).

Visual 12 – Extract from Alliance Global Procurement’s Decarbonization Plan

14. NT C25 - Frequency

As asked in this criterion, Alliance Global Procurement commit to publicly report its GHG emissions inventory and progress against published targets on an annual basis.

Those publication will be available on Alliance Global Procurement’s website, or to the Global Compact plateform.

15. NT C26 & C27 - Mandatory target review & recalculation

Alliance Global Procurement plans to review all active targets every 5 years to ensure consistency with the latest SBTi Criteria, and adhere to the SBTi's 5% significance threshold (though preference will go to a base year emissions recalculation).

Any significant changes occuring, that could compromise the existing target will trigger a target recalculation.

16. NT C28 - Target validity

As asked in this criterion, Alliance Global Procurement will announce its targets publicly on the SBTi website within 6 months of the approval date.

17. Unrelevant Criteria

NT C10 to NT C12

Due to Alliance Global Procurement's activities, the firm isn't concerned with Bioenergy accounting, carbon credits nor avoided emissions.

NT C20 to C24

Those criteria are not relevant for Alliance Global Procurement :

- Combined scope targets
- Renewable electricity (scope 2 only)
- Sale, transmission, distribution of oil, natural gas, coal as well as other fossil fuels
- Companies in the fossil fuel production business or with significant revenue from fossil fuel business lines
- Requirements from sector-specific guidance
