Indoor Planting

About the Price Guide

Introduction

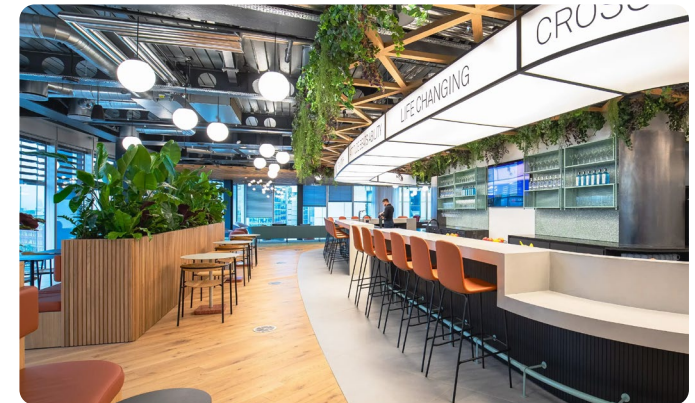

Budgets certainly aren't the most fun part of office planting. However, if we skip this step, you might do a lot of design work before realising you don't have the budget you need. Hopefully, by addressing this up-front, we can make the most of your budget and get the most green for your green!

We'll cover different types of planting features and what they typically cost. Do bear in mind that these are outline numbers and there's a lot of variations with spec, location, and type of planting. When your planting scheme tips the £10,000 mark, it's usually possible to achieve discounts thanks to economies of scale.

Office Plant Rental

As well as purchase pricing, we're also going to cover rental pricing. Renting office plants is the most cost-effective way to add greenery to your space. You spread the cost of ownership over a longer time, usually three years.

When you rent your plants from us at Plant Plan, we include the cost of maintenance and installation in your weekly rental cost. What's more, if a plant dies, we'll replace it free of charge.

Inbuilt & Cabinet Trough

Rental: £2.70 - 4 per linear meter
Purchase: £150 - 350 per linear meter

Inbuilt

Planting incorporated into bespoke joinery looks amazing and can be used for so many different purposes. Giving pricing for inbuilt planters is hard, as bespoke joinery can range from straightforward to wildly creative.

Without details, we can only provide pricing for the planting within the joinery. You can then add this to the pricing from your joinery contractor.

If you're after live inbuilt planting, you'd be looking at £150 - 350 per linear meter or £2.70 - 4 per week to rent. We suggest budgeting the same amount for replica inbuilt planting. The cost depends on the type of replica planting you want.

Rental: £2 - 3 per week
Purchase: £125 - 200 per linear meter

Cabinet Trough

Cabinet trough planting sits on office cabinets. The troughs usually match or complement the cabinets below them. Usually, it's best to get the troughs from your office furniture provider as they'll match your cabinets.

However, we can supply the liners. Getting those right is really important, as no one wants a leak here!

For internal cabinet trough planting, we'd recommend budgeting £125 - 200 per linear meter to purchase. For rental, budget £2 - 3 per week.

Internal & Small Internal

Internal Floorstanding Planting

The most common type of planting is floorstanding pots. We'd recommend budgeting for clusters as they look much nicer than a lone plant! Working on a mixed height cluster of three pots, you should budget £700 - 1200 per cluster, which equates to £10-15 per week rental.

Price Breakdown:

Large plants at (1800mm tall): £300 - 600 or £3.70 - 5.50 per week

Medium plants at 1400mm tall cost £250 - 400 or £3.15 - 4.15 per week

Small plants at 550mm tall cost £90 - 140 or £1.6 - 2.05 per week

Small Internal Plants

In some spaces, for example, windowsills, desks, or shelves, you may want smaller plants. These can be excellent for increasing your plant-count without blowing your budget.

I have a small row of these beside my desk and they provide an excellent sight-line. For these, budget £30 - 60 per pot. They're also available in preserved options, like the image below.

To rent office plants of this size, you'd be looking at £1 - 1.30 per week per pot.

Rental: £1 - 1.30 per week per pot

Purchase: £30 - 60 per pot

Living & Moss Walls

Rental: N/A

Purchase: £700 - 1500 per m2

Living Walls

For living walls you can expect to pay between around £700 - 1500 per m2. That sounds like a colossal range, which is because of the variety of systems available on the market. It depends on several factors. These include the location, whether it is indoors or outdoors. It also considers the need for an irrigation system and whether the wall needs extra lighting.

Access can add some cost too, with scaffolds or MEWPs bringing extra complexity and cost. Our staff are PASMA and IPAF trained which helps as we don't need to hire operators too.

Rental: N/A

Purchase: £350 - 550 per m2

Moss Walls

Moss walls cost between £350 - 550 per m2. The cost varies based on the type of moss you choose. Bun Moss is the most expensive, Reindeer Forest Moss is in the middle, and Mixed moss is the least expensive. Incorporating preserved foliage into your moss wall will likely increase the price.

Again, other factors can also impact the cost, such as the need for a MEWP to ensure safe access at high levels.

Ceiling Raft

PLANTPLAN

Ceiling Raft

Ceiling rafts are a cost-effective way to bring greenery into your space. If we use replica planting in the ceiling grid, it will cost around £200 - 400 per m2. If we use preserved foliage, it will cost around 30% more.

If you'd like a frame around the edge of the ceiling raft, you'll need to allow extra for this as it's a bespoke item.

Rental: N/A

Purchase: £200 - 400 per m2

Summing up:

Now that you have a rough idea of the cost of plants, you might be wondering how many office plants are right for your space. To make it easier, we've written a straightforward guide to help you cut through the conflicting advice online—be sure to check it out!
