

Technical Sheet

Faba Hulls

Description

100 % Natural grain free faba hulls, produced by mechanical separation of dehulled faba beans.
No additives and no processing aids.
Raw material is Vicia Faba.
Non-GM.
Low CO2 footprint.
Color is braun/gray depending on the color of the bean.
Packaging of product as the hull flakes or pelletized pellets in BB, loose in truck or ship.
The content components will vary in products of agro origin, so the listed data represent typical values and range.

Composition

Moisture.....	10-14%
% dry matter content	
Protein.....	8-12
Starch.....	6-10
Fat.....	0,5-1
Crude fiber.....	40-45
ADF.....	58-62
NDF.....	60-66
Fiber – enzymatic – measurement	
Total fiber	73%
Non soluble, IDF	67%
Soluble, SDFP	5,0%
Low molecular, SDFS	1,3%

Physical Specification

Bulk density 350 g/liter
