(01)

CONCEPT & DESIGN VISION

We review the architectural plans and define the overarching design concept — translating first impressions into a clear direction for the property.

(02)

MASTER CONCEPT

Based on your feedback from Phase 1, we develop a cohesive interior design concept spanning every space in the property.

(03)

ROOM-BY-ROOM DETAILED DESIGN

Every room and functional area is developed in detail, translating the master concept into 2D floor plans and elevations.

(04)

FURNITURE CONCEPT

Freestanding furniture and decorative lighting are selected and specified, completing the design with a ready-to-execute furnishing plan.
