CHPO WATCHES – SAFETY & BATTERY INFORMATION

Battery
The CHPO watches are powered by a non-rechargeable silver oxide button cell battery.

Battery type: Silver oxide
Battery voltage: 1.55V
Battery reference: SR626SW
Battery life: 2 years under normal use

WARNING – BUTTON CELL BATTERY
Keep batteries out of reach of children. Swallowing a button cell battery can cause severe injury or death. If a battery is swallowed or inserted into any part of the body, seek immediate medical attention.

Do not recharge, disassemble, crush or expose the battery to fire or excessive heat.

Only replace the battery with a battery of the same type and specification. Any and all work, including battery replacement, required within the guarantee period is recommended to be carried out by a certified watch technician or dealer.

Disposal
Do not dispose of the watch or battery with household waste. Batteries and electrical products must be collected separately and disposed of according to local regulations.

Water resistance
The watch is NOT wateproof, unless stated on the back of the case.

- Water-resistant up to 3 ATM are suitable for everyday use and can tolerate rain and splashes, but are not recommended for swimming and diving.

- Water-resistant up to 10 ATM: Means that the watch is suitable for surfing, swimming, snorkeling, sailing and other water sports.

- After any contact with salt water, immediately rinse your watch with fresh water.
WATERPROOF WATCHES ONLY.
