

Room Overview - Hub 1 - World Health Summit

This document is an overview of general information, the technical infrastructure and the equipment of the World Health Summit session room *Hub 1*.

Please visit our [program](#) to see every session in this room.

General Information

Session format of the room *Hub 1*: **Global Health Lab (GHL)**

Our Global Health Lab sessions allow participants to explore global health challenges through interactive town hall debates and dialogues, fostering dynamic exchanges of ideas among stakeholders from different sectors. Discussions extend beyond achievements, providing a deep understanding of political decision-making in global health governance, and informing future strategies by openly discussing successes and setbacks.

Participant capacity on-site of room *Hub 1*: **146 PAX**

Technical Infrastructure & Equipment Information

In the **speaker area** of room *Hub 1*:

- Fishbowl set-up with a maximum of five seats on the stage.
- Speakers can choose between clip-on and handheld microphones (maximum of five of each type available). Two additional handheld microphones will be provided for audience questions.
- If the panel is larger than the designated number of speaker seats, the additional speakers will have a seat reserved in the front row.
- Please note that in the Global Health Lab format remote participation, the use of presentation slides and videos is generally not recommended due to the fishbowl setup and limited screen size in the room. For any necessary exceptions three TV screens (85") are placed in the room.
- Polls (via Slido) and Q&A can be integrated into your session through the WHS App. The Q&A feature allows on-site participants to submit questions via the app, while polls enable the moderator or chair to pose questions to the audience during the session. Poll results are displayed on the session screens, allowing both on-site and online participants to view the responses. If you would like to use either or both features, please indicate this in the Run of Show document. Poll questions should be sent to programteam@worldhealthsummit.org at least three weeks before the World Health Summit. For sessions using polls and/or Q&A, one iPad will be provided for the moderator or chair. A second iPad can be made available to someone assisting the moderator or chair with monitoring audience questions and poll responses. Please note that this person must be designated by the co-host, moderator, or chair.
- A countdown clock will be visible to everyone on stage to help with timekeeping.

In the **audience area** of room *Hub 1*:

- Seating for up to 146 participants. The seats will be distributed on a first come first serve basis and reservations are only possible for the first row. There is no guarantee of attending every session due to capacity limitations.
- Five standing tables are placed across the room to allow networking before the sessions and additional standing audience.
- The production crew sits at the right side of the room. This area is not accessible for participants.
- The conference language of the World Health Summit is English. Interpretation equipment will not be provided for participants. Video messages in other languages require English subtitles.

Disclaimer: Please be advised that the WHS organizing team reserves the right to make changes to the current setup. Individual requests for changes to the room setup or technical equipment can only be considered to a limited extent. The WHS organizing team will not provide contact details of technicians or sequence directors.
