

## Project Manager

### **Are you passionate about new technologies and future-oriented projects in semiconductor design? Photeon is the place for you!**

As a market leader in turnkey solutions, Photeon offers the opportunity to work on a diverse range of products across Automotive, Compute, Industrial, Medical, and other markets. We are seeking a dynamic and experienced **Project Manager** to join our team and drive our projects to success. We provide an energetic, exciting, and friendly environment with numerous opportunities for your professional growth in the direction that suits you best.

We welcome you to become a key contributor to our success, fostering collaboration and teamwork every step of the way.

#### **Your Role:**

- **Project Planning:** Define project scope, goals, deliverables, and develop comprehensive plans while assessing risks and feasibility.
- **Team Leadership:** Guide and manage cross-functional teams, promote collaboration, and effectively resolve conflicts.
- **Communication:** Provide regular status updates, potential issues and successes to stakeholders and senior management
- **Customer Engagement:** Focal point for building and strengthening trust in the relationship.
- **Budget & Resource Management:** Monitor and control project costs, allocate resources, and manage vendor contracts.
- **Risk & Issue Management:** Identify risks, manage issues, and ensure contingency planning.
- **Timeline Management:** Track progress, adjust schedules, and use tools to maintain project timelines.
- **Quality Control:** Ensure deliverables meet quality standards and conduct reviews.
- **Project Closure:** Finalize deliverables, conduct evaluations, and formally close the project.
- **Compliance & Governance:** Ensure adherence to regulations, manage documentation, and align projects with company goals.
- **Continuous Improvement:** Implement best practices, seek feedback, and stay updated on industry trends and tools.

#### **Your Profile:**

- Bachelor's or Master's degree in a relevant field (e.g. Engineering, Information Technology, or equivalent).
- Proven experience managing projects in the semiconductor field through the entire project life cycle (feasibility through SOP). Engineering experience in IC verification and Post-Silicon validation is appreciated.
- Proficiency in project management software (e.g., MS Project, Jira, Trello).
- Strong leadership, decision-making, time management, communication, and negotiation skills.
- Ability to manage multiple projects simultaneously
- Exceptional communication, negotiation and presentation skills
- Ability to collaborate across technical and cultural boundaries
- Excellent verbal and written English skills.

**What We Offer:**

- Opportunity to work with cutting-edge technology and a talented team.
- Personal development and individual training plans.
- Innovative products and business environment.
- Flexible working hours.
- Friendly and supportive environment.
- Exciting, varied work in a growing and internationally active company.
- Comprehensive onboarding and ongoing support.
- Modern office spaces.
- Team building events.
- Competitive compensation well above the relevant collective agreement.

**Are you ready to shape the future of semiconductor technology aimed at enabling solutions for a better life?** We look forward to receiving your application at [recruiting@photeon.com](mailto:recruiting@photeon.com).

**Location:** Dornbirn, Austria or Pavia, Italy
