

Anniversary certificate

The company

Salamander Industrie-Produkte GmbH

D-86842 Türkheim

has been actively committed to reducing CO₂ emissions.

Since 2015, processing recycled PVC products has resulted in a reduction of

11.493.496

kg CO₂e

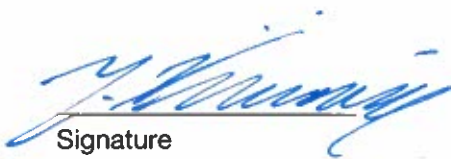

compared to processing new PVC products.

Old windows, doors and windowsills and also profiles and other manufacturing residuals made of plastics are processed by way of industrial recycling into top quality PVC grind and PVC granulate. The procedure allows reduction in greenhouse gas emissions of up to 87 % against primary PVC production.

**Thank you very much for your extraordinary commitment to
environmental protection and your many years of loyalty.**
