Rescue clamps DK / BK

Abseiling and rescue equipment

Description

The rescue clamps are designed to be attached to the wire ropes and webbing of TEUFELBERGER fall arrest devices and FallSorb lanyards. The rescue device can be attached to the rope clamps, allowing the injured person to be lifted. The rescue clamp for wire ropes is tested and approved for use with fall arrest devices type H, HPS, HWS, and HWPS. The rescue clamp for webbing is tested and approved for use with fall arrest devices type ACB 1.8, HWB, HPB, HWPB, and HWDB. The recommended rescue devices are the ABS 3a WH and the ABS 4 WH.
