

better.safe

The central idea that
inspires us.

PERFORMANCE
you can count on

SAFETY
for people and products

SUSTAINABILITY
to safeguard the future
of our environment

PERFORMANCE you can count on

TYCOON® Product & Service Quality

- consistent control of in-house production output
- high product quality - can even be proved by METIS service
- Note: only for cold metal products! (max. till approx. 60° C)
NOT for applications which are still HOT (PET relaxation process)
- all common core sizes from standard coils to jumbos

TYCOON® XTend PET products offer

- XTended edge strength - can even protect sharp metal edges
- XTended weldability - higher weld joint strength, fewer drop-outs, suitable for all automatic machines & hand tools, with the correct settings & tension the highest possible welding efficiency can be achieved
- XTended shock reserve (= breaking strength & elongation)

T-Shark Hand Tools

- lightweighted & balanced
- the combined use of our T-SHARK and TYCOON® PET enables us to reach an optimum tension & weldability

T-ROLL JUMBO Dispenser for automatic strappers

- easy to operate
- increased output (less coil changes)
- increased safety: less injury due to the coil handling

Pallet Threading Tool of StrapBandit

- increases efficiency
- effortless manual use (good for user's health)

SAFETY for people and products

Reliable protection of your packed goods

- by ideal combination of breaking strength & elongation (= shock reserve) of TYCOON® PET products
- due to patented additive in TYCOON® PET products
- reduced splitting even at lower ambient temperatures

Logistics

- constant product availability, high stock level
- smooth delivery process
- high raw material availability (supplier contracts)

We analyse

- YOUR strap in YOUR specific application on YOUR site with real-time data

METIS measurement service

- identify the right strap for your application & get the best out of it
- reduced costs
- increased safety
- saved CO₂ emissions

SUSTAINABILITY

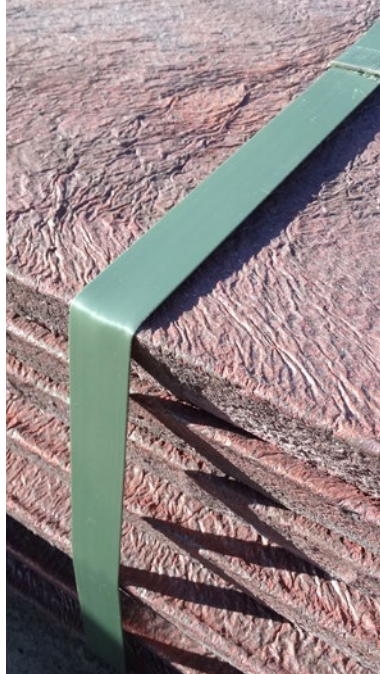

Environmental friendly products with TYCOON® PET*

- best option to reduce CO₂ emissions
- strapping + wooden pallet = the sustainable transport solution (no stretch/shrink film needed for a safe transport)

*up to
100%
recycled material
