

# HSEQ

## Living responsibility – for our team, our customers, and our world.

We protect people. We act sustainably. We deliver quality that matters, and we meet the legal requirements of our customers and partners. For us, responsibility means: everyone contributes to quality, environment, sustainability, and safety. Leadership provides the framework – we all bring it to life. We communicate openly, work closely together, take feedback seriously, and question our actions in order to continuously improve.

**Together,** we secure the long-term  
success of Teufelberger and  
the well-being of everyone.

### Health

We promote the well-being of all employees and create working conditions that strengthen physical and mental health. Prevention, awareness, and active participation are key elements in this.

### Safety

Safety is our top priority. Zero accidents is our goal – supported by consistent risk awareness, preventive measures, and the responsibility of each individual to act for themselves and others.

### Environment

We take responsibility for the future of our planet. Through resource efficient processes, innovation, and sustainable product design, we reduce emissions and minimize our ecological footprint across the entire life cycle of our products.

### Quality

Our products and services stand for the highest quality. “Zero defects” is more than a goal for us – it is an attitude that is reflected throughout the entire value chain and lived together with our partners.
