

A neon sign with the text "DO SOMETHING GREAT" in all caps, split across four panels. The sign is illuminated with a bright blue light against a dark background.

## **Looking for:      Product Manager for Privacy, AI and Digital Governance SaaS**

### **About Prighter**

Prighter is a fast-growing LegalTech company building productised services and SaaS solutions for compliance with data protection as well as AI & digital governance regulations. With the mission to enable companies around the world to comply with regulatory requirements for their digital business, our services and SaaS solutions guide our global clients through the increasingly complex legal landscape.

Uniquely in our sector, we are born out of a law firm and now deliver our solutions to companies of all sizes in over 50 countries. We are an innovative tech-centered business with the benefit of legal capability running through our company – this is a significant differentiator in what we deliver. The diversity of our client base mirrors the diversity of our international team. To professionalise our product development and continue our growth path, we are currently looking for a product manager.

### **The Role**

The position is embedded in the broader strategy to transform a service lead company into a product lead company. The goal is to improve the quality and the range of our SaaS solutions to serve our global client base with products enabling them to manage complex regulatory requirements for the digital ecosystems. The position is at the core of this strategy and you will play a pivotal role in translating complex regulatory requirements into easy understandable SaaS-solutions. You will be responsible for the product roadmap taking part in the decisions on which products to build and specifying the product requirements. Part of the role as well is to contribute in building not only the products but also the company. Key responsibilities are:

- Align on the product strategy and roadmap with all stakeholders.
- Run product discovery for new product development.
- Convert ideas into executable plans—scoping, prioritizing, and launching products on data protection, AI and digital governance.
- Collaborate with legal, engineering, and operations teams to build scalable products.

- Regularly gather feedback from delivery teams and clients to iterate and improve.
- Manage the product life-cycle.

The role is remote with the option to come to the office, if you live nearby one of our locations. However, you should be located in the EU, the UK or Switzerland.

## **Skills**

### **Required**

- 5+ years of Product Management experience , ideally in Privacy, LegalTech or RegTech
- Strong technical acumen – you can speak the language of developers and legal ops alike.
- Experience with workflow automation tools and client-facing platforms.
- Highly analytical, detail-oriented, and passionate about user experience.
- Strong stakeholder management skills and experience working with cross-border teams.
- Organisational skills and team lead quality;
- Excellent communication skills, especially also in English;
- Availability during normal business hours (CET);
- Fast learning and openness to new and changing tasks;
- Humour and the ability to make others laugh and to inspire.

### **Advantageous**

- Deep understanding of data protection, AI and digital governance.
- Proven experience managing legal or compliance-related digital products.
- Experience working in startups and in small teams;
- Experience with compliance software.

## **Perks**

- Grow in a multidisciplinary team and be inspired by seasoned professionals in other fields;
- Hybrid work environment fitting your preferences;
- Budget for relevant educational opportunities
- Take pride in knowing you are delivering some peace of mind to businesses around the world and contribute to the accessibility of privacy and digital rights for millions of people.

**Competitive annual compensation depending on experience and skills.**
