

# Sustainability Supplier Engagement

Roche recognises climate change as one of the largest global risks and is committed to addressing it as a matter of urgency. Over 90% of our total carbon emissions are attributable to our value chain, therefore we are committed to partner with our suppliers and to change what we buy, how we buy and who we buy from to reduce the environmental impact throughout our value chain. As part of our commitment, we have joined the [Sustainable Markets Initiative \(SMI\)](#) and we have set a net-zero target for 2045 validated by the [Science Based Targets initiative \(SBTi\)](#).

Based on Roche's commitment to SMI and SBTi, we expect our suppliers to implement the following minimum climate and sustainability targets:

## By 2025\*

**Assess & disclose Scope 1,2 and 3 emissions**

**Commit to SBTi to set near-term targets** aligned to the 1.5° C pathway

Set targets to **reduce waste, energy and reuse material**

## Beyond 2025

**Have SBTi validated targets\*\***

**Switch to at least 80% renewable power** by 2030

**Explore options** to source **green heat** by 2030

Commit to **set standards for own suppliers**

**Increase water efficiency** and commit to adopt water stewardship standards

**Transport suppliers** to include **green transportation solutions** in their core offering by 2030

\* by 31<sup>st</sup> December 2025 at the latest

\*\*near term is minimum expectation and long-term is strongly encouraged

**Roche's Sustainability Supplier Engagement Programme** - We want to engage and collaborate further with you to take action on those targets and have constructive dialogues to understand how we can work together to drive carbon reductions. Collaboration across supply chains is imperative to fighting climate change. Thank you for your commitment and valuable support on this journey.
