"The visibility we've gained has been transformative. Before, we were making educated guesses about our spending patterns. Now, we have concrete data that drives significant savings and helps each practice optimize their operations. Just as importantly, we've freed our team members from administrative burdens so they can focus on what matters most: delivering exceptional orthodontic care to our patients."

- Gabe Mazzarolo, VP of Technology & Systems, Corus Orthodontists

Because everyone saw how Coupa would help them do their job, they were invested. We are now seeing some incredible KPIs for our business, and much of that has to do with how Acquis helped us set up the Coupa platform and how our users have adopted Coupa's tools.

- Brent Reynolds, Disbursement Director, AmeriLife

"The automation increased our efficiency, added greater controls over spend, and improved our reporting capabilities. With invoices, expense reports, and requisitions routed and approved electronically, the entire procure-to-pay process was sped up despite the onset of the pandemic. Previously, the matching process was terrible. The triple match on a PO was a tough process, and it's really made that smoother."

- Neil Latman, Senior Vice President of Financial Reporting and Reimbursement, Sun River Health
