

Case Study

How Orica Built a More Connected Reporting Process

tangelo-software.com

Case Details

Customer:
Orica

Industry:
Mining & Infrastructure

Organization:
Global provider of mining and infrastructure solutions

Primary use case:
Financial and corporate reporting

Key reports:
Annual and corporate reporting outputs

Solution:
Tangelo

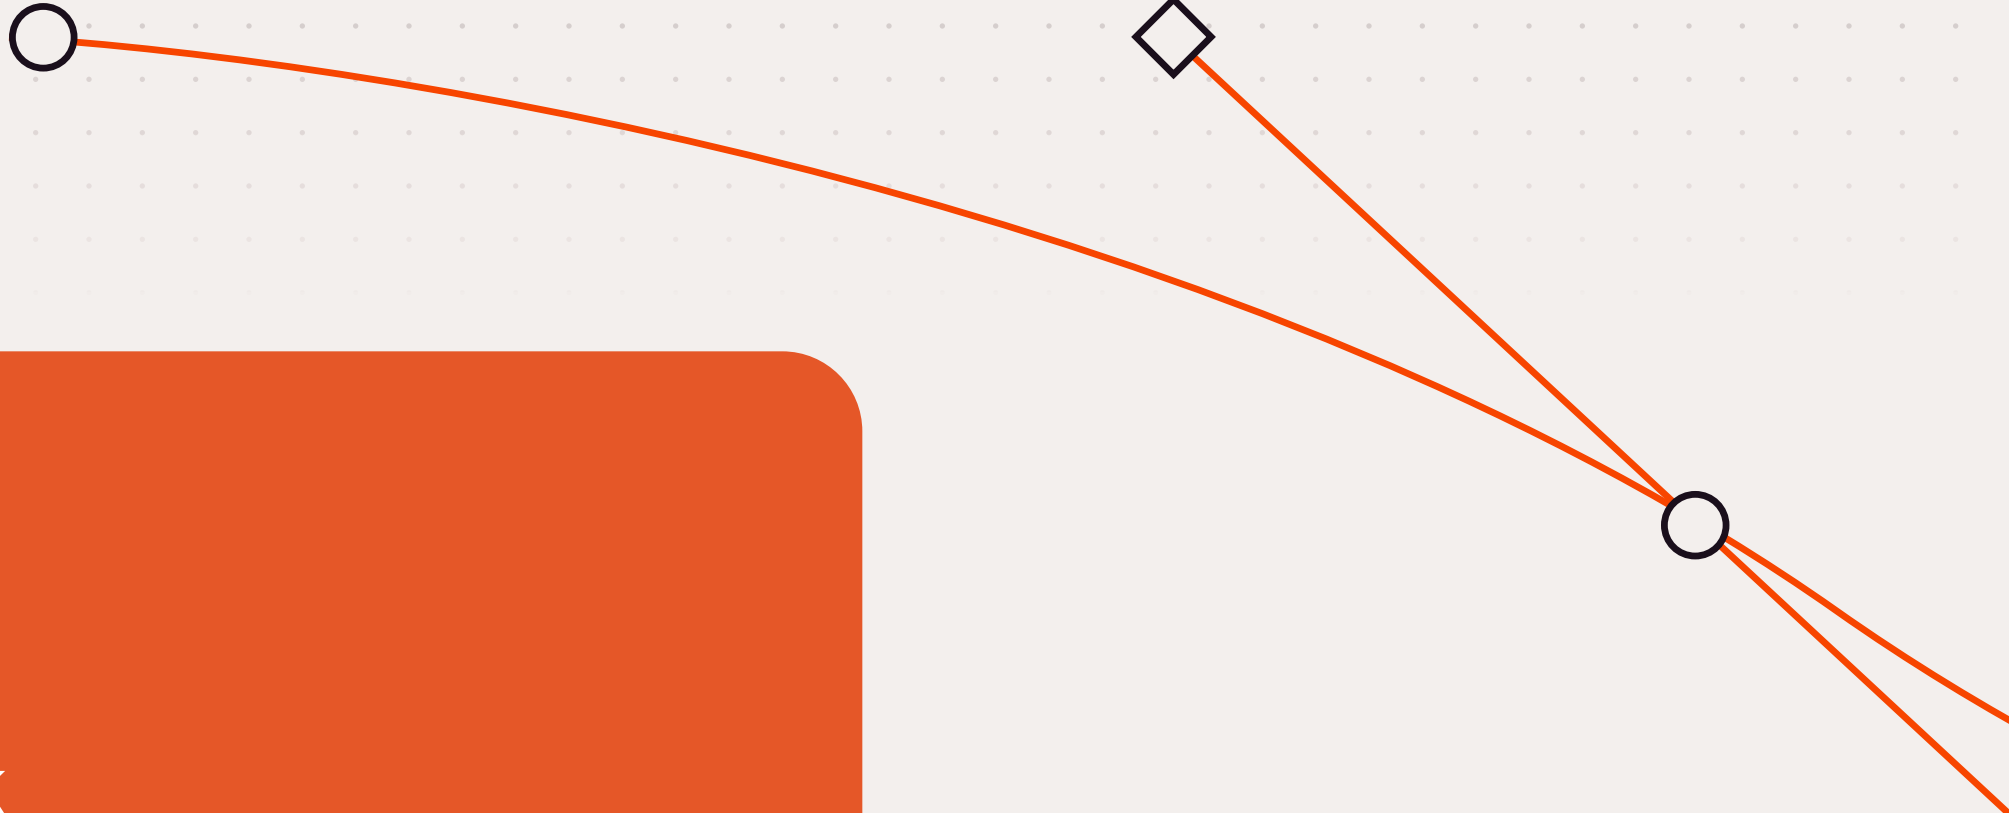

Customer Story

As our reporting requirements continued to evolve, collaboration became increasingly important. Multiple stakeholders contributed throughout the reporting cycle, making it essential to keep reports consistent without creating additional manual work.

By implementing Tangelo, we established one connected reporting environment that improves collaboration, strengthens governance and significantly reduces manual effort across our reporting process.

Results at a Glance

- 
- One connected reporting workspace
 - Significant reduction in manual rework
 - Automatic updates across linked reporting tables
 - Greater consistency and control throughout reporting
 - Clearer ownership and collaboration across teams
 - Stronger data traceability
 - A scalable foundation for future AI-assisted reporting

Customer Q&A

Reporting Team
Orica

What reporting challenges were you trying to solve?

Our reporting process involves multiple stakeholders working across different reporting outputs. We wanted to keep everyone working from the same information while reducing repetitive updates and maintaining control throughout the reporting cycle.

How has Tangelo changed the way your team works?

One of the biggest improvements has been removing repetitive manual updates. By linking tables once, changes now flow automatically across our reports, giving us greater confidence in the accuracy and consistency of our reporting.

Customer Q&A

What impact has Tangelo had beyond reporting efficiency?

The benefits go beyond technology. Tangelo has encouraged better collaboration, clearer ownership and more structured planning across our reporting teams. As we continue to connect more Excel-based data into our reporting templates, we're creating a more standardised and traceable reporting process.

How has the team adopted the platform?

Once the team became familiar with Tangelo, it was straightforward to use and easy to manage. Responsive support and simple user administration have helped us adopt the platform smoothly, particularly during busy reporting periods.

What comes next?

We're continuing to build on the connected reporting foundation we've established. We're particularly interested in Tangelo's upcoming AI Assistant capabilities and the opportunities they offer to further simplify reporting, strengthen governance and reduce manual effort.
