Cushion Dock Shelters

Optimal sealing and durability

STERTIL
SUPERIOR SOLUTIONS BY
QUALITY PEOPLE

Superior solutions by quality people

The Stertil Group offers its customers worldwide customised, technologically sophisticated solutions for their dock equipment and heavy duty lifting requirements, including the best possible service from strong local partners. These superior solutions are conceived, developed and realised by a team of specialised professionals with unique experience. Thanks to its “quality people”, its total in-house production process and its international organisation, Stertil is a world leader in the field of Dock Levellers and Dock Shelters.

Stertil T-Series Cushion Shelters, optimum sealing and durability according to BREEAM standard

Are you looking for a flexible solution that provides optimum sealing at your vehicle loading/unloading facility? Do you have stringent requirements for climate management capability? With the optimum management of temperature and hygiene in the warehouse, the heat of summer and winter cold, draughts, dust and insects can all be kept out. Discover the superior sealing and durability offered by our T-Series Dock Shelters, which can also be used in situations that require the BREEAM standard.

Stertil TP-Series makes the difference

Do you want temperature control of your warehouse facility, then our TP-Shelter is the ideal solution?

- Seamless cushions perfectly fit and are ideal for cold storage and freezer facilities
- Extra hygienic with standard zinc-coated steel back plate and chemical and mould resistant materials
- Durable cushion coating Vinyl PVC or POWERFLEX® for long life
- Foam cushions with 98% compression recovery remain flexible longer, even at low temperatures $\sim -40^{\circ}\text{C}$
- For loading and unloading narrow vehicles there are optional bevelled cushions available for bridging the gap between the vehicle and door opening
- Optimal damage and safety protection due to armoured sections on the front side of the cushions with yellow positioning markers

Stertil TI-Series with inflatable top cushion

Do you have vehicles with varying heights? Then our TI-Shelter is the perfect solution:

- Flexible inflatable top cushion with a maximum reach of 1350 mm the best in the industry
- For durability and long life the inflatable top cushion made from wear-resistant Cordura®
- Time saving fast inflation < 15 seconds and deflation time < 20 seconds
- Easy to operate
- Optimal protection of the shelter cushions by use of high quality and robust aluminium sandwich profiles and PVC curtains

- Optimal damage and safety protection due to armoured sections on the front side of the cushions with yellow positioning markers

Optional versions and extras

- POWERFLEX® for optimal protection for all weather conditions. POWERFLEX brochure available for more information
- Tapered cushions, adapted to match the inclined angle of the approach ramp
- Various projections available that differ from the standard 270 mm
- Custom made side and top cushions with non standard width and height
- For reduction of door width various bevelled top and side cushions are available
- For complete sealing in situations where no Dock Leveller is present a lower cushion is available
- For easy positioning yellow markers covering the entire height of the side cushions

- For easy maintenance both side cushions are split into two sections
- For extra sealing a retractable upper curtain can be attached to the top cushion (TP only)

BREEAM outstanding

The sustainability certificate from the Dutch Green Building Council is based on the excellent results for air infiltration and thermal insulation.

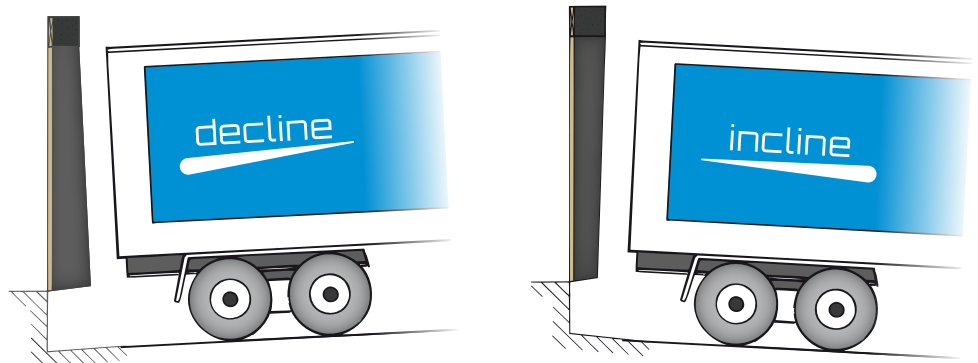

Technical drawings and advice

Detailed technical drawings are available for implementing the structural measures necessary for installing the Dock Shelters. Steril will be pleased to advise you on the most effective economical solution for all your dock requirements.

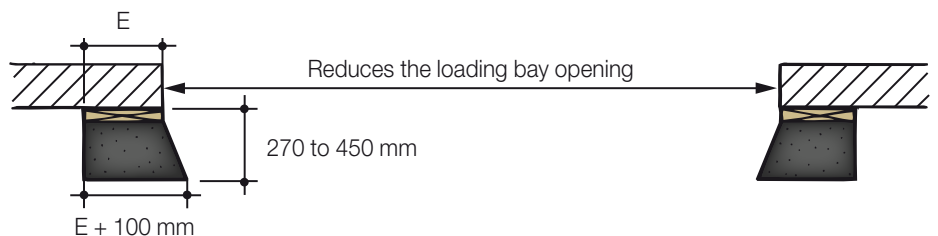

Stertil T-Series Dock Shelters

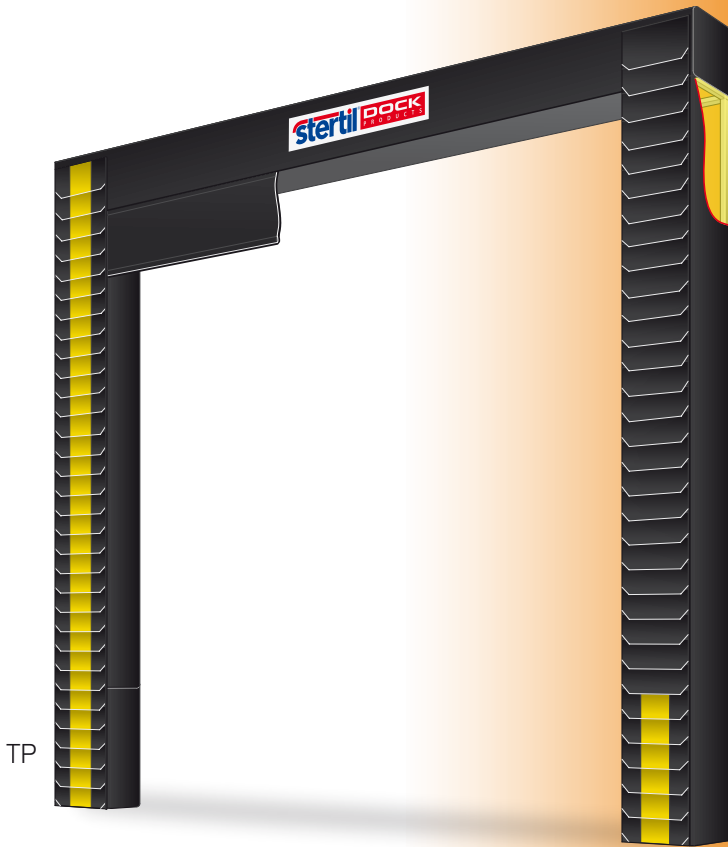

Tapered cushions for use on inclined approach ramps (for both TP and TI).

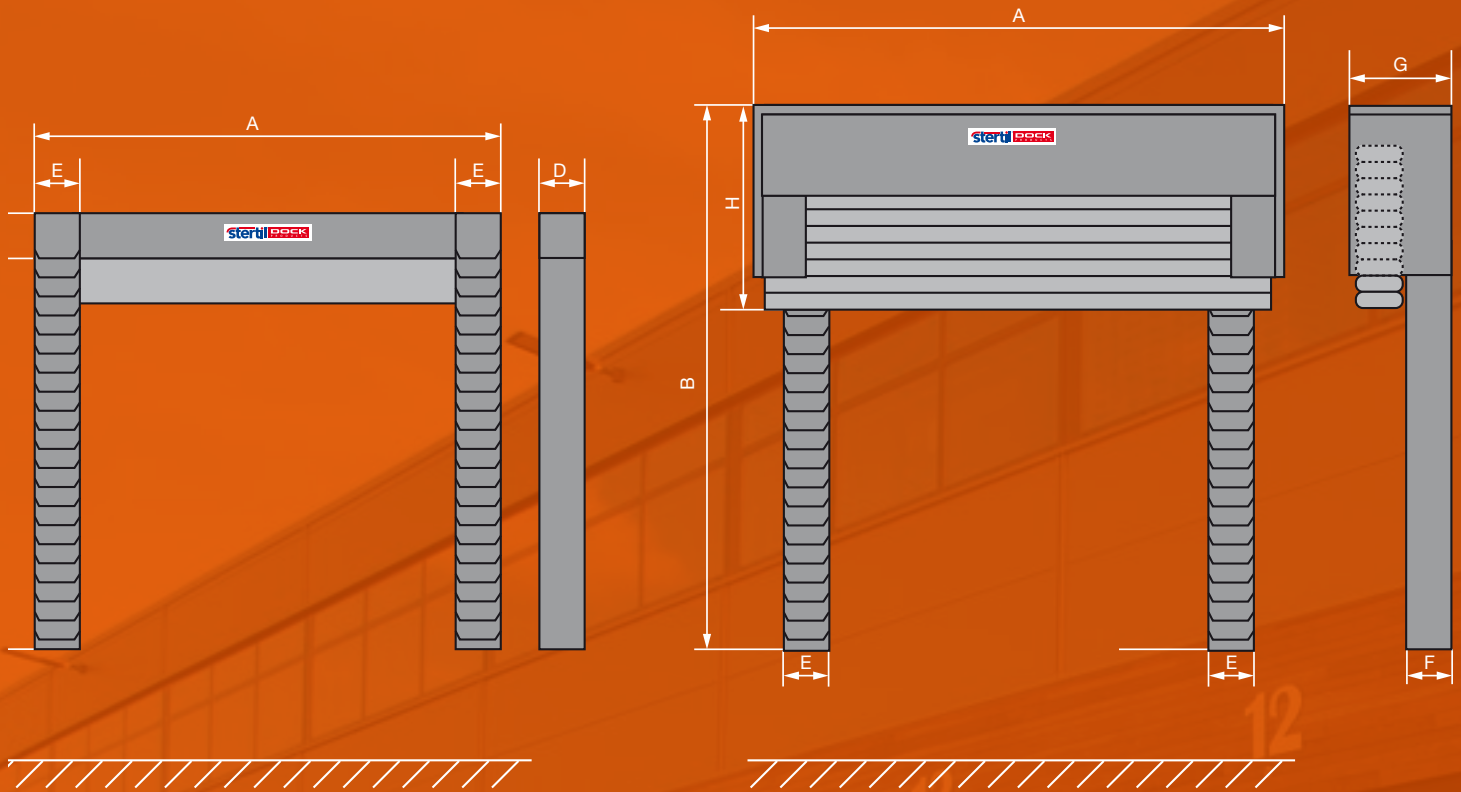

Bevelled cushions reduce the opening of the loading bay, thus guaranteeing proper sealing.

Stertil T-Series Dock Shelters
