PNEUMATICI INVERNALI | RACCOLTA DEI PREZZI INDICATIVI

Ich bin Reifen.
Les pneus: ma passion.

Die angeführten Preise in dieser Liste verstehen sich wie angegeben exkl. bzw. inkl. MWST. Sie sind unverbindlich und unter Vorbehalt eventueller Änderungen/regionaler Gegebenheiten zu verstehen. Rabatte oder andere Preisabschläge werden durch den Anbieter individuell festgelegt.

Les prix indiqués dans cette liste s'entendent comme indiqués, hors TVA ou TVA incluse. Ils sont sans engagement et sous réserve d'éventuelles modifications ou particularités régionales. Les rabais ou autres réductions de prix sont fixés pour chaque cas par le revendeur.

I prezzi indicati nel presente listino prezzi sono intesi, come indicato, IVA compresa, risp. IVA esclusa. Si tratta di prezzi indicativi, sono riservati eventuali cambiamenti e/o condizioni regionali particolari. Ribassi, sconti o altre riduzioni di prezzo sono definiti individualmente dal rivenditore.

Auszug aus der Verordnung vom 11. Dezember 1978 über die Bekanntgabe von Preisen (PBV) und Informationsblatt vom 1. Oktober 1997

Preisbekanntgabepflicht

Für Waren, die dem Konsumenten direkt zum Kauf angeboten werden (beim Pneuhandler, in einer Garage usw.) ist der tatsächlich zu bezahlende Preis (inkl. Mehrwertsteuer) leicht sichtbar und gut lesbar bekanntzugeben. Dies kann durch Anschrift, Etikette, Preisschild, Anschlag von Preislisten oder Auflage von Katalogen erfolgen (Art. 3, 4, 7–9 PBV).

Extrait de l'ordonnance du 11 décembre 1978 sur l'indication des prix (OIP) et du feuille d'information du 1^{er} octobre 1997

Obligation d'indiquer les prix

Pour les marchandises offertes directement au consommateur (par ex. chez le vendeur de pneus, dans un garage, etc.), le prix à payer effectivement (taxe sur la valeur ajoutée incluse) doit être bien visible et aisément lisible. Cela est possible par impression, par étiquetage, sur panneau ou par affichage de listes de prix courants ou présentation de catalogues (art. 3, 4, 7 à 9 OIP).

Estratto dall'Ordinanza dell'11 dicembre 1978 sull'indicazione dei prezzi (OIP) e foglio d'informazione del 1. ottobre 1997

Obbligo di indicare il prezzo

Per le merci offerte in vendita direttamente al consumatore (ad esempio presso il gommista, in un garage, ecc.) il prezzo effettivo che deve essere pagato (compresa l'imposta sul valore aggiunto) deve essere indicato in modo ben visibile e agevolmente leggibile. I prezzi devono essere indicati sulla merce stessa o in prossimità di quest'ultima tramite iscrizione, etichetta, cartellino, indicazione dei prezzi correnti o presentazione di cataloghi (art. 3, 4, 7-9 OIP).

Hinweis 4x4 Reifen

Bitte beachten Sie beim Kauf von 4x4/Offroad-Reifen, dass sich nicht jeder Reifen mit M+S-Bezeichnung als Winterreifen eignet. Im Zweifelsfalle lassen Sie sich durch eine Fachperson beraten.

Indication pour les pneus 4x4

A l'achat de pneumatiques 4x4/Offroad, tenez compte du fait que les pneus avec désignation M+S ne conviennent pas tous pour une utilisation hivernale. En cas de doute, demandez l'avis d'une personne compétente.

Suggerimento pneumatici 4x4

In caso d'acquisto di pneumatici fuoristrada 4x4 prestare attenzione al fatto che non ogni pneumatico marcato M+S (fango + neve) è adatto per l'inverno. In caso di dubbio fatevi consigliare da uno specialista.

Dienstleistungen | Prestations | Prestazione

Es ist wichtig, die Dienstleistungen angemessen zu verrechnen. Die folgende Aufstellung dient dabei als Unterstützung und ist nicht abschliessend. Der Fixpreis kann beispielsweise berechnet werden, indem man den definierten Stundenansatz mit dem Zeitaufwand multipliziert.

Il est important de facturer correctement les prestations supplémentaires. La liste qui suit sert de soutien, mais n'est pas exhaustive. Le prix fixe peut être calculé par exemple en multipliant le taux horaire défini par le temps effectif.

È importante calcolare adeguatamente le prestazioni. Il seguente elenco serve d'aiuto ma non è vincolante. Il prezzo fisso può essere per esempio calcolato moltiplicando il tempo impiegato con la tariffa oraria definita.

Beschreibung	Description	Descrizione	Fixpreis
Radwechsel	Changement de roues	Cambio ruote	
CHF/Rad – Komplettrad ab Fahrzeug entfernen und neues Komplettrad anbringen CHF/roue – Enlèvement de roue du véhicule, montage de roue complète CHF/ruota – Togliere la ruota completa dal veicolo e montare una nuova ruota completa

Reifenetikette

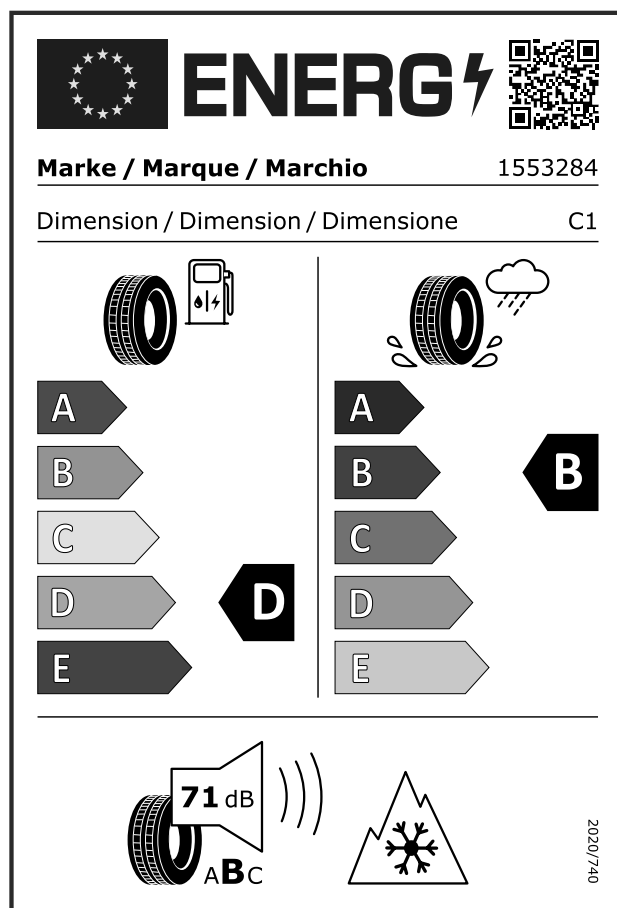

Seit 2014 müssen alle in der Schweiz verkauften PW-, LLKW- und LKW-Reifen mit einer Kennzeichnung, dem sogenannten Reifenlabel, versehen sein. 2021 wurde dies leicht überarbeitet und angepasst. Dieses beinhaltet folgende Kriterien:

Etiquette pour les pneus

Depuis 2014, tous les pneus pour voitures, utilitaires légers et poids lourds doivent être pourvus d'une identification appelée étiquette pneumatique. En 2021 on a changé quelques valeurs de l'étiquette. Cette étiquette répertorie les critères suivants:

L'etichetta per i pneumatici

Dal 2014 tutti i pneumatici per autovetture, autocarri leggeri e pesanti venduti in Svizzera devono recare un contrassegno, la cosiddetta etichetta del pneumatico. In 2021 l'etichetta è stat cambiato in qualche detagli. L'indicante i seguenti criteri:

Kraftstoffeffizienz

Durch die Reduktion des Rollwiderstands wird Kraftstoff gespart und damit der CO₂-Ausstoss gemindert.

Pro Klasse: +/- 0,1 l auf 100 km

Efficacité énergétique

Une réduction de la résistance de roulement permet d'économiser du carburant et réduit les émissions de CO₂.

Par niveau: +/- 0,1 l sur 100 km

Risparmio di carburante

Riducendo la resistenza al rotolamento si utilizza una quantità minore di carburante e di conseguenza si riducono le emissioni di CO₂.

Per classe: +/- 0,1 l su 100 km

Nasshaftung

Das Bremsverhalten auf nasser Fahrbahn ist von wesentlicher Bedeutung für die Sicherheit.

Pro Klasse: 3–6 m Bremswegunterschied (Ausgangsgeschwindigkeit 80 km/h)

Adhérence sur sol mouillé

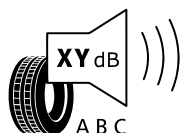

La distance de freinage sur chaussée mouillée a une importance déterminante pour la sécurité.

Par niveau: 3-6 m de différence de distance (basé sur une vitesse de 80 km/h)

Aderenza sul bagnato

Le prestazioni in frenata su fondo bagnato sono un fattore essenziale per la sicurezza.

Per classe: 3-6 m differenza di tratto di frenata (Velocità di riferimento 80 km/h)

Geräusch

Das externe Abrollgeräusch beeinflusst einerseits den Fahrkomfort, andererseits die Geräuschbelastung der Umwelt.

Bruit de roulement

Le bruit de roulement externe influence d'une part le confort de conduite, et engendre ensuite de la pollution sonore.

Rumorosità

La rumorosità esterna generata dal pneumatico influenza sia il comfort di guida sia l'impatto sull'ambiente circostante.

HINWEIS / INDICATION / INDICAZIONE

Per 1. Mai 2021 wurde die neue Reifenetikette in der EU und der Schweiz eingeführt. Die Reifenetikette ist EU-weit identisch und die Schweiz hat diese ebenfalls übernommen. Im Folgenden finden Sie Informationen zur neuen Reifenetikette.

La nouvelle étiquette pour les pneus a été introduite dans l'Union européenne (UE) et en Suisse à compter du 1er mai 2021. Elle est identique à l'échelon européen et est reprise également en Suisse. Vous trouverez dans le suivant les informations concernant la nouvelle étiquette pour les pneus.

Dal 1° maggio 2021 è stata introdotta nell'UE e in Svizzera la nuova etichetta per gli pneumatici. L'etichetta è la stessa in tutta l'UE e la Svizzera la adotta. Qui troverete tutte le informazioni in merito alla nuova etichetta per gli pneumatici.

Kraftstoffeffizienz

- Einteilung in Klassen von E (geringste Effizienz) bis A (grösste Effizienz)
- Der Kraftstoffverbrauch hängt vom Rollwiderstand der Bereifung, dem Fahrzeug selbst, den Fahrbedingungen und dem Fahrverhalten des Fahrers ab. Der gemessene Rollwiderstand (Rollwiderstandskoeffizient) des Reifens wird in Klassen A bis E eingeteilt.
- Ist ein Fahrzeug komplett mit Reifen der Klasse A ausgestattet, ist im Vergleich zu einer Ausstattung mit Reifen der Klasse E eine Verbrauchsreduzierung von bis zu 7.5% möglich.

Efficacité énergétique

- Répartition selon une échelle de classification allant de E (le moins efficace) à A (le plus efficace).
- La consommation de carburant dépend de la résistance au roulement des pneus, du véhicule lui-même, des conditions de circulation et du comportement de conduite de l'automobiliste. La résistance au roulement (coefficient de Résistance au Roulement) mesurée du pneu intègre une échelle de classification allant de A et E.

Efficienza nei consumi

- Suddivisione in classi dalla E (efficienza minima) alla A (efficienza massima).
- Il consumo di carburante dipende dalla resistenza al rotolamento dei pneumatici, dal veicolo stesso, dalle condizioni di circolazione e dal comportamento di guida del conduttore. La resistenza al rotolamento misurata (coefficiente di resistenza al rotolamento) del pneumatico viene suddivisa nelle classi da A a E.
- Se un veicolo è completamente munito di pneumatici di classe A è possibile, nei confronti di un altro veicolo munito di pneumatici della classe E, una riduzione del consumo di carburante fino al 7.5%.

Nasshaftung

Einteilung in Klassen von E (längster Bremsweg) bis A (kürzester Bremsweg)

Um die Bremsleistung eines Reifens auf nasser Fahrbahn zu beschreiben, wird der (ABS-)Bremsweg oder der maximale Reibwert zwischen Reifen und Fahrbahn gemessen und mit den Werten eines Referenzreifens verglichen. Hieraus wird der sogenannte Nasshaftungskoeffizient G berechnet und in die Klassen A bis E eingeteilt. Bei der Ausrüstung eines PKW mit Reifen der Klasse A kann, im Vergleich zu Reifen der Klasse E, bei einer Vollbremsung aus 80 km/h ein bis zu 18 m kürzerer Bremsweg erzielt werden.

Freinage sur sol mouillé

Répartition selon une échelle de classification allant de E (distance de freinage la plus longue) à A (distance de freinage la plus courte).

Pour décrire la performance de freinage d'un pneu sur une chaussée mouillée, il faut mesurer la distance de freinage (ABS) ou le coefficient de friction maximal entre le pneu et la chaussée pour comparer les valeurs ainsi obtenues à celles d'un pneu de référence. Ces données permettent de calculer ce qui est appelé l'indice d'adhérence sur sol mouillé G qui permettra de cataloguer le pneu dans une classe de A à E. En équipant une voiture de tourisme avec des pneus de classe A, la distance de freinage dans le cas d'un freinage d'urgence à 80 km/h peut être réduite jusqu'à 18 mètres par rapport à un pneu de classe E.

Aderenza sul bagnato

Suddivisione in classi dalla E (spazio di frenata più lungo) alla A (spazio di frenata più corto).

Per descrivere la prestazione di frenata su carreggiata bagnata, si misura lo spazio di frenata (ABS) o il massimo coefficiente d'attrito tra il pneumatico e la carreggiata e si compara con il valore di un pneumatico di riferimento. Da questo si calcola il cosiddetto indice di aderenza sul bagnato G e si assegna una delle classi da A a E. Se un'automobile è munita di pneumatici della classe A, lo spazio di frenata, premendo a fondo il pedale del freno a 80 km/ora, è fino a 18 metri più corto in comparazione a quello di un veicolo munito di pneumatici della classe E.

Externes Rollgeräusch

Angegeben wird der Wert des externen Rollgeräusches des Reifens in Dezibel. Ergänzend hierzu wird eine Klassifizierung des Rollgeräusches durch die Klassen A, B oder C vorgenommen, wobei «A» den leisesten und «C» den lautesten Reifen darstellt.

- A** Das Piktogramm mit der Klassifizierung «A» weist darauf hin, dass das externe Rollgeräusch des Reifens den bis 2016 geltenden EU-Grenzwert um mehr als 3 dB unterschreitet.
- B** Die Klassifizierung «B» bedeutet, dass das externe Rollgeräusch des Reifens den bis 2016 geltenden EU-Grenzwert um bis zu 3 dB unterschreitet oder diesem entspricht.
- C** Die Klassifizierung «C» bleibt leer, da dabei der vorgegebene Grenzwert überschritten wird.

Bruit de roulement externe:

La valeur indiquée est le bruit de roulement externe du pneu mesurée en décibel. A titre complémentaire, le bruit de roulement externe est catalogué dans la classe A, B ou C, sachant que la classe A représente le pneu le plus silencieux et C le plus bruyant.

- A** la classification A indique que le bruit de roulement extérieur du pneu est de plus de 3 dB inférieur à la valeur limite en vigueur jusqu'à 2016, fixée par l'UE.
- B** La classification B indique que le bruit de roulement extérieur du pneu est jusqu'à 3 dB inférieur à la valeur limite en vigueur jusqu'à 2016, fixée par l'UE, ou est égal à cette valeur.
- C** La classification C reste vide étant donné que la valeur limite prescrite est dépassée.

Rumore di rotolamento

Si indica il valore del rumore esterno di rotolamento in decibel. A complemento si classifica il rumore di rotolamento nelle classi A, B e C, considerando che «A» indica il pneumatico più silenzioso e «C» il più rumoroso.

- A** Il pittogramma della classe «A» indica che il rumore esterno di rotolamento del pneumatico è inferiore di oltre 3 dB al valore limite UE valido fino al 2016.
- B** La classificazione «B» significa che il rumore esterno di rotolamento del pneumatico è inferiore fino a 3 dB del valore limite UE valido fino al 2016 oppure che corrisponde esattamente allo stesso.
- C** La classificazione «C» resta vuota in quanto il valore limite prescritto è sorpassato.

Schnee- / Eisgriffigkeit

Abhängig von der Produkteigenschaft können kein, ein oder beide Symbole auf dem Label aufgeführt werden.

Eisgriffigkeit, Wintereigenschaft: Für PKW Winterreifen (Klasse C1), die speziell für den Einsatz auf vereisten Strassen in Nordeuropa ausgelegt sind, wird hier eine gewisse „Mindestgriffigkeit“ auf Eis bestätigt. Dies wird unter anderem auch durch spezielle Gummimischungen (sogenannte Soft-Compounds) erreicht. Solche Reifen sind in der Regel nicht für Einsätze ausserhalb von Nordeuropa bestimmt.

Schneegegriffigkeit, Wintereigenschaft*: Reifen die mit dem «Schneeflocken oder Alpine Symbol» (im engl. 3 Peak Mountain Snow Flake, kurz «3PMSF»-Symbol) gekennzeichnet sind, müssen ein bestimmtes Brems- oder Traktionsvermögen auf einer verfestigten Schneedecke im Vergleich zu einem standardisierten Referenz-Vergleichsreifen (eine sog. «SRTT» = Standard Reference Test Tyre) aufweisen.

Alle Angaben beziehen sich auf normierte Tests gemäss den gesetzlichen Vorgaben.

Adhérence sur la neige et le verglas

En fonction des caractéristiques du produit, un des symboles, les deux symboles ou aucun symbole peuvent être présents sur l'étiquette.

Adhérence sur le verglas, caractéristique hivernale: Les pneus d'hiver pour voitures de tourisme (classe C1), spécialement conçus pour les routes verglacées d'Europe du Nord, se voient confirmer une certaine «adhérence minimale» sur le verglas. Un mélange de gomme spécial (appelé soft-compounds) permet notamment d'atteindre ce résultat. D'une manière générale, ces pneus ne sont pas destinés à être utilisés en dehors de l'Europe du Nord.

Adhérence sur la neige, caractéristique hivernale*: Les pneus munis du symbole «montagne à trois pics avec un flocon de neige» (en anglais, 3 Peak Mountain Snow Flake, abrégé par l'acronyme «3PMSF») doivent offrir une certaine capacité de freinage et de traction sur la neige tassée par rapport à un pneu de référence standardisé (appelé «SRTT» = Standard Reference Test Tyre).

Toutes les indications se basent sur des tests normés selon les prescriptions légales.

Presa sulla neve / sul ghiaccio

A seconda delle caratteristiche del prodotto il marchio può non avere nessun simbolo, un solo simbolo o entrambi.

Presa sul ghiaccio, caratteristica invernale: Per i pneumatici invernali di automobili (classe C1) previsti in special modo per l'impiego su strade ghiacciate nel nord dell'Europa, si attesta qui una determinata «presa minima» sul ghiaccio.

Questo si ottiene, tra l'altro, grazie a speciali miscele di gomma (cosiddetti soft-compound).

Di regola questi pneumatici non sono previsti per l'impiego al di fuori delle regioni dell'Europa del nord.

Presa sulla neve, caratteristica invernale*: I pneumatici contrassegnati con il «fiocco di neve o il simbolo alpino» (in inglese 3 Peak Mountain Snow Flake, in breve simbolo «3PMSF») devono avere, in comparazione con un pneumatico standard di riferimento (un cosiddetto «SRTT» = Standard Reference Test Tyre) una determinata capacità di frenata o di trazione su strade ricoperte di neve compattata.

Tutte le indicazioni si riferiscono a test normativi secondo le prescrizioni di legge.

Personenwagen – Winterreifen

Voitures tourisme – pneus d'hiver

Autovetture – pneumatici invernali

Die obenstehende waagrechte Dimensionen-Gegenüberstellung dient nur Vergleichszwecken zur Ermittlung möglicherweise in Betracht fallender anderer Reifen-Dimensionen/Typen. Sie bedeutet jedoch nicht eine Empfehlung oder eine automatisch bestehende Austausch- oder Ersatzmöglichkeit für ein bestimmtes Fahrzeug. Für diese Frage sind die Automobilhersteller bzw. deren Generalvertretungen zu konsultieren. Die Reifen-/Felgenkombinationen sind gemäss dem E.T.R.T.O. (ältere Reifen können tiefere L.I. aufweisen) aufgelistet. Im Hinblick auf fahrwerks- bzw. fahrtechnische Voraussetzungen können wir keine Anablen machen.

* = XL-Version

Le tableau ci dessus ne sert qu'à la comparaison horizontale des pneus qui peuvent éventuellement être pris en considération en recherchant d'autres dimensions/types de pneus. Ces indications ne représentent pas une recommandation ou possibilité de remplacement ou de changement automatique pour un certain modèle/type de voiture. Pour les informations y relatives consulter les fabricants de voitures ou leurs agences. Pour les changements de dimensions autres que celles indiquées sur les bordereau-type ou d'attestation, les autorisations nécessaires doivent être demandées auprès de l'autorité compétente. Les combinaisons pneumatiques/jantes de notre tableau sont conformes aux normes E.T.R.T.O. (les anciens pneus présentent parfois un indice de charge moins élevé). Nous ne pouvons donner aucune indication technique concernant le véhicule et ses caractéristiques géométriques.
