

Helping Charities in Guernsey Stay Secure

Logicalis Channel Islands

Protecting the Technology Behind Your Mission

Across Guernsey, charities support people and communities every day, often with small teams and limited IT resource while handling highly sensitive data.

- *Is your charity confident its data is secure?*
- *Do you know where your data is stored, who can access it, and whether sensitive information is being shared through personal accounts or unmanaged devices?*
- *If a cyber incident happened tomorrow, would your team have the support needed to respond effectively?*

We understand the pressure that creates, and we are here to help.

Introducing MMM (Management, Maintenance & Monitoring)

MMM is a simple, ongoing service designed to keep your IT systems secure and properly maintained.

It is built for charities using Cloud services who do not have the time or resource to manage the ongoing risks that come with them.

Whether you have 2 users or 200, the risk remains the same. Cyber threats do not target size, they target opportunity.

How MMM helps

With MMM, we take care of the essentials:

- Keeping systems updated and secure
- Monitoring for unusual activity and potential risks
- Identifying and closing security gaps early
- Providing a trusted IT partner working alongside your team, including support through Logicalis

Reducing Risk, Protecting Your Charity

UK Government Cyber Security Breaches Survey data indicates that roughly 1 in 3 UK charities experience a cyber security breach or attack each year

These incidents affect organisations of all sizes, with smaller charities often just as exposed due to limited IT support or oversight of Cloud services

Common issues include phishing, account compromise, and unauthorised access to data, often leading to disruption, lost time, and reputational impact

Why MMM matters

We have supported local services who chose not to adopt this type of protection and later experienced a cyber incident.

The impact is always greater than expected:

- Time taken away from core services
- Pressure on small teams
- Costly recovery and investigation work
- Long term reputational damage

We are here to support you

MMM is not about fear. It is about reassurance and practical support.

Our role is to make sure your systems are looked after properly, so you can focus on your purpose and the people you support.

If you would like to have a conversation about protecting your charity, we are always happy to help.

Thank you
