Floors beyond expectations

ENGINEERED WOOD FLOORING DESIGN & PRICE GUIDE FEBRUARY 2026

KÄHRS DESIGN & INSPIRATION GUIDE

From our factory to your home

The homes we live in are never just bricks and mortar or glass and steel; they also represent chapters of our lives and places of sanctuary. Within this inspiration and design guide you will find floors that can transform the way a home looks, feels and is lived in. Floors that go beyond your expectations.

www.kahrs.com

Swedish heritage

Historically, Swedes have been used to centuries of scarcity and rough climate. By necessity, we've been resourceful by nature and it's here our tradition of refinement is to be found. We've lived close to, in and by natural resources for centuries and we've learnt how to make them valuable.

By taking care of them, they have taken care of us. The ability to make a lot from a little is the key reason for Sweden's growth as an industrial force. With an innovative mindset, a sustainable approach and dedicated work we are used to maximising potentials – in both nature and each other.

The same goes for Kährs as a brand. It's in our DNA. It's our heritage. It's our future. And it's how we not only live up to the expectations.

But go beyond them.

A PROUD HISTORY SINCE 1857

Kährs have a proud history working with wood production dating back to 1857.

In 1941 we registered the first patent for what is known as engineered wooden floors, a ground-breaking innovation at that time.

Fast forward to today, and our factory remains at the same location as 1857. And we have grown to become one of Europe's largest producers of engineered wooden

floors for homes and commercial buildings, where we continue to lead the market on key areas of quality, design, sustainability and innovation.

For almost 100 years, generations of families and project clients have trusted us to supply quality flooring products to make a house a home, and to last a generation. That makes us proud.

What you can't see makes the difference for a long-lasting wood floor

Softwood vs plywood middle layer?

Locking joints vs Tongue & Groove?

We can guide you.

Surface design features are important considerations when choosing an engineered wooden floor, but this is only 50% of the factors that need to be judged when selecting a floor that will last for generations.

All natural wood products live and breathe with you. Although not noticeable to you, wood swells and shrinks with the changes in humidity as the wood cells exchange moisture with the surrounding environment. Simply put, your floor will move with the seasons, hence it is key to produce an engineered wooden floor that will restrict this movement.

Kährs engineer all our wood flooring products to withstand the harshest of climates, coming from Sweden we are used to long winter months and high humidity summers and under floor heating. Over the last 100 years we have perfected how to engineer a wood floor to not only last a season but for generations.

By only using a softwood middle layer we produce a floor that is more stable when compared to wooden floors that have a plywood middle layer. We also avoid using plywood as it requires more glue between the ply-layers which can increase the amount of VOC's.

We also take it a step further ensuring the softwood growth rings are placed in a vertical position during manufacturing, that adds further stability to the floor.

Our engineered locking joints are also not visible when the floor has been installed, but these joints will ensure that your floor remains gap free unlike Tongue & Groove joints that tend to gap over time due to movement. Our patented locking joints allow our floors to be fully bonded or floated in an easy and quick installation method.

Kährs mission is to produce sustainable design led floors that will live with you, throughout the seasons, remaining as it was from the first day it was installed.

We invented engineered wooden floors to withstand our Swedish climate almost 100 years ago, proving over time we know how to manufacture a floor that not only has beautiful design features but will last for generations.

As Henry Ford once said "Quality means doing it right when no one is looking".

Floors that go beyond expectations.

What we offer as standard that other brands don't

To design and produce a wooden floor to not only look beautiful and to last for generations it needs to be produced in a certain way.

We also believe wooden floors should come in long length planks as standard, and not in nested or random lengths. We know it would be cheaper to produce our products in nested or random lengths, but we believe it would affect the overall design and performance of the floor.

We believe that wooden floors should have a patented locking joint such as our Woodloc 5s, suitable to be a floating floor or be fully bonded by professional installers who can guarantee a gap free floor. We know it would be cheaper to work with a T&G joint system, but we feel this offers inferior quality especially when installing as a floating floor.

At Kahrs you can be reassured we only work with long lengths and patented locking joints, and we don't look to charge more for what we believe should be standard as other brands do.

Below you will see some of the Plank sizes we offer as standard:

5 PLANK LENGTH SIZES

XXL: 2400mm, XL: 2200mm, L: 2000mm, M: 1900mm or S: 1200mm

Proven quality

Quality is easy to promise, but only time can truly validate that promise. Lasting quality isn't measured in days or months, but in years and decades. With a heritage spanning 170 years, Kährs has consistently upheld our commitment to quality.

It's not just a claim for us – it's a legacy we've kept cultivating. It's a circular force of quality. Every floor we produce reflects this dedication. Crafted with precision and care, our floors embody this pursuit. But the floors are merely the end result of something else – an attitude. An attitude that stipulates quality in all the steps of the process – internally and externally: purchase, production, sales and customer service.

No matter where, we provide an experience that withstands the test of time, not just for today, but for tomorrow and all the days beyond. As market leaders it's something that's expected from us. If we want to keep that position it's our responsibility to not just meet these expectations. But to go beyond them.

Our warranty and promise to you

We don't work with any gimmicks around our warranties, such as offers of 100 year guarantees or lifetime warranties that last for only 10 years. You can see below we offer simple transparent warranties around all our wooden floors and our promise to you is that they are genuine.

All our wooden flooring products apart from a few species such as Beech and Maple are suitable for any type of under floor heating system which is covered within your warranty.

30 Year warranties

20 Year warranties

15 Year warranties

Beside each product in this guide, you will be able to reference the warranty period and depending on the floor construction we offer:

Visit our website and find out more on our warranties and how to register them with an approved Kährs dealer.

Environmental responsibility

Kährs leading the way on flooring sustainability

We feel that not only is it important for sustainability to be one of the main pillars of our business, but that we also have an environmental responsibility. Choosing a Kährs wood floor is a smart and green choice for the environment, both indoors and for our planet.

Kährs is one of the world's oldest and most innovative manufacturers of wood floors. Our innovations have radically transformed the global wood flooring industry and contributed towards sustainable development. We are always trying to find ways to make our production process more environmentally friendly.

Through the use of wood and supporting reforestation; and environmentally conscious production, we are committed to driving sustainable development in the flooring industry.

Find out more on how we lead the flooring industry on offering transparency on our environmental responsibilities, download our environmental certifications and learn more about what sustainability means to us at Kährs.

Now more than ever you are asking what is in your products

The main indoor sources of chemical pollutants are building materials and construction products.

We can see home owners are becoming more educated on the link between healthy indoor air quality and the building products they place into their home, and have deep questions around the use of chemicals, VOC emissions & PFAS.

At Kährs we welcome questions on the materials and substances that go into our products, as we are fully present in each step of the manufacturing process within our factories.

Some suppliers may be nervous when being asked very direct questions on what chemicals are in their products, as they don't manufacture the floors they sell or control the chemicals that are placed into the products from the start of the production process to the end.

Kährs can provide a full declaration of performance that shows the main independent chemical testing results for all our flooring products, but we can also offer further reassurance that our engineered wooden flooring products are safe for your home.

The first Kährs product received the Nordic SWAN Ecolabel in 2013. Today almost 200 Kährs wood floors are labelled as Nordic SWAN.

Benefits of the Nordic SWAN eco-labelled wood floors are:

- Contains raw materials from sustainable forests
- Meets tough demands on health and environmentally hazardous substances
- Guarantees low emissions and a good indoor air quality
- Produced in an energy efficient way
- Helps consumers and professional buyers to choose environmentally sound products.

In essence, the Nordic SWAN Ecolabel provides a guarantee to you that these products have been produced with consideration for the environment and human health, from the forest to the final product.

Some of our chemical testing certifications

What are they? What do they mean?

The M1 emission class is a Finnish certification for building materials, including flooring, signifying low emissions of volatile organic compounds (VOCs) into the indoor air. Products with the M1 label are considered to have very low emissions and contribute to a healthier indoor environment.

FloorScore is an indoor air quality (IAQ) certification for flooring. It signifies that a product has been independently tested and meets strict standards for volatile organic compound (VOC) emissions, ensuring it contributes to healthier indoor air.

The "A+" eco label for flooring measures indoor air quality. An A+ rating, the highest possible, signifies that the flooring emits minimal to no pollutants, contributing to healthier indoor air.

At Kährs we have the ambition to stay ahead of upcoming legislation, as we are committed to being on the forefront in areas related to sustainability.

We work continuously to reduce the environmental impact of our products and to support our customers in creating healthy indoor spaces, often allowing us to secure compliance before legislation comes into effect. To that effect, Kährs wood floors are today already compliant with the upcoming new, lower and stricter level of Formaldehyde Emission Limits set by the EU to come into effect on August 6th, 2026.

Kährs is devoted to helping you
choose the most sustainable floor

Trend predictions 2026 – designed for the homes of tomorrow

As the way we live continues to evolve, so do our expectations of the home. With **Kährs Trend Predictions 2026**, we explore how flooring is shaping the next generation of interiors – where design, responsibility, and wellbeing come together.

SUSTAINABILITY SHIFTS FROM PROMISE TO PROOF

In 2026, environmental responsibility is expected, not exceptional. Consumers demand transparency, low-carbon production, and products designed for long life and circularity. Renewable resources, water-based finishes, and low-VOC solutions become standard. Floors are chosen not only for beauty, but for how responsibly they are made – from the Forrest to your home.

INTERIOR DESIGN TRENDS

In 2026, interiors balance calm familiarity with expressive individuality.

Natural materials, tactile surfaces, and honest craftsmanship define spaces designed for longevity rather

than novelty. Wide wooden planks, visible grain, and matte finishes ground interiors, while pattern floors and subtle contrasts add personality. Homes are curated as emotional sanctuaries – timeless, adaptable, and deeply connected to nature and everyday life.

COLOUR TRENDS

Colors grow warmer, deeper, and more grounded. Soft browns, Oat, honey, and walnut tones replace cool grays, bringing warmth and emotional comfort. Muted greens and clay-inspired hues reinforce the connection to nature, while selective darker woods add contrast and confidence.

Finishes remain matte and understated, allowing the material's character to lead rather than shine.

WHAT'S GOING BIG?

- Wide and long engineered wood planks with matte finishes
- Classic parquet patterns (Basket weave, herringbone, chevron) reinterpreted for modern homes
- Warm, natural wood tones replacing cool minimalism. Authentic materials that age gracefully and tell a story
- indoor-outdoor continuity and nature-inspired textures

AT KÄHR'S, OUR DESIGN PRINCIPLES REMAIN CLEAR:

Designed with a conscience. Produced with a history. Made for life.

Through Scandinavian design, proven quality, and responsible innovation, we continue to create floors that age beautifully and support how people live – today and tomorrow.

How to choose your perfect floor

Our best advice when it comes to choosing a wood floor? Go with your heart. However, there are some key aspects to consider, to help we have compiled a step by step guide for you, starting with understanding each surface finish option we can offer.

OUR FINISHES

Similar to selecting the correct paint choice for your home, we offer various surface finishes with differing sheen levels. It is amazing how a single floor can vary when different finishes are applied, so it is important to consider all the different finishes and sheen levels open to you, detailed below.

ULTRA MATT LACQUER

Love the current popular dead flat paint appearance? Then select one of our Ultra Matt finishes which has around 3% sheen level, making the floor feel and look as if it was made from untreated, newly sawn timber, with the benefit of being scuff free and low maintenance.

MATT LACQUER

Dead flat too flat for you? Then select one of our Matt finishes which has a 10% sheen level, providing that traditional Matt appearance that highlights the texture of the wood graining. Think of our Matt finish as being similar to your modern Matt emulsion wall paint in sheen. Low maintenance scuff free & soft to the touch.

SATIN LACQUER

Like a soft sheen? Then our original satin finish designs have a beautiful gentle soft shine, with a 30% sheen level. It is classic for a reason, bringing subtle attention to your home interior.

Our classic satin finish is a truly versatile hard wearing mid-sheen finish. Ideal to compliment your wooden architraves painted in an eggshell finish. Hard wearing and low maintenance.

NATURE OIL

Want your floor to look as natural as possible? Our Nature Oil finishes have the same sheen level as our Matt lacquer, with the additional benefit that in years to come you can easily apply additional protective coats of oil and change sheen levels.

Nature oil brings out the fine grain structure of the wood and enhances its natural colour and unlike hard wax finishes that break down over a few years your nature oil floor will last for generations.

Love your oil floor straight away by applying additional coats immediately after installation which we recommend and choose between either Matt or Satin oil for your sheen preference.

NAKED OIL & NAKED LACQUER FINISHES

Maintain the transparent soft feel of your Oak floor by selecting one of our Naked oiled or Naked lacquer finishes, which provides that unfinished look. Our Naked finishes keep our hardwood floors as close to their natural state as possible, whilst ensuring the protective oil or lacquer provides added protection and durability.

Surface design features

The impression of the floor is made up of what you see, as well as what you feel. Many of our floor designs include surfaces that have been handscraped and/or deeply or lightly brushed to create a unique patina that speaks to several of your senses. Our Planks have either deep or soft micro bevelled edges but we also craft floors without brushing or bevels if that is your preference.

We are well known for our artisanal hand scraped designs where each plank is hand made to give a beautiful worn patina. We also craft products to replicate a 100-year-old reclaimed floor with unique details such as butterfly pegs and square dowels found in very old restored floors.

Below you will see some different surface design features we can offer.

BRUSHING

Brushing the surface highlights the natural structure of the grain, and emphasizes the texture of the wood. Brushing effects vary, depending on the wood species.

STAINING

Staining further enhances the wood's natural colour tones. It also allows us to apply new colours, thus completely transforming the appearance of the wood. Kährs offers a wide range of stained options – from the palest white to rich charcoal shades.

SMOKED

This special process alters the colour and shade of each plank. There are two grades of smoked finish: a lightly smoked treatment and the darker, more dramatic, fully smoked treatment.

BEVELLING

A bevelled edge feature on a 1-strip floor gives a very distinct look, highlighting the shape of the plank. From microbeveling – a discreet reinforcement of the edges – to a more prominent beveling on both the long and the short sides.

HANDSCRAPING

By using different tools for hand wood scraping and sanding, we can give a new wood floor a worn appearance. A great amount of handcraft goes into each floor to achieve its rustic character.

Making the grade

Clean, calm and elegant – or rustic? Rich in patina, knots and cracks? We have it all covered, as Kährs offers a selection of different gradings, each with a unique character. Grading depends on which part of the log we select when producing our floors, which we detail below for you.

FIVE FLOORING GRADE OPTIONS ↓

PRIME/CALM

Our prime grade floors are produced from the cleanest Oak logs featuring a uniform appearance with small variations in grain. They may contain very small knots.

Prime grade wood floors are special because they represent the highest quality and are limited in the availability of the Oak logs that meet these stringent standards to be classified as Prime.

SELECT/VARIATION

The floors with this grading are characterized by subtle variations in colour, tone and pattern. They may contain small knots.

Select grade results in a smooth, polished look that adds a touch of luxury and refinement, making it a popular choice for both modern and traditional interiors.

CLASSIC/LIVELY

One of the most popular grades within wood flooring shows the natural variation of timber, you won't find as many larger knots as you would in our rustic grade, but it offers the traditional design of a wooden floor.

This grade showcases knots and colour variations, creating a story of time and use.

CHARACTER/DYNAMIC

These floors are made from boards with knots and cracks that give them simultaneously a lively and dramatic, yet warm character. They feature a variety of colour tones. Occasional sapwood.

Character grade embraces natural imperfections, creating a unique and eye-catching look that adds depth and character to any room. It's also known for its durability and resistance to wear.

RUSTIC/EXPRESSIVE

If you want your floor to make a strong impression, choose an Expressive floor. These are made from boards with dramatic cracks and powerful knots and with a wide variety of colour tones. Occasional sapwood.

Rustic grades embrace the natural imperfections of the wood, like knots, colour variations, and mineral streaks, creating a rustic and authentic look that adds charm and individuality to a space.

Pattern and size matters

The sense of space in a room is affected by the width, length and pattern design of the floor. We offer several widths of floors including super wide boards and we only work with long length planks to give you a superior design. We offer several pattern flooring designs from classic & modern herringbone and the timeless Dutch pattern also known as basket weave design.

PLANK

Sometimes referenced as 1 strip, plank or full boards, this is where Kährs lead the market regarding the number of plank options we can offer. With over 150 different plank designs we can offer you the largest choice in the UK in stock at any given time.

Our standard plank width is typically 187mm, meaning they are suitable for almost every home and room size. Not wide enough? You can also choose from our 220mm wide planks or our widest plank size which is a majestic 305mm wide. Something narrower? Then look at our Planks with sizes of 151mm.

Unlike a lot of our competitors, we only work with full length planks running up to 2400mm long and never with short nested random lengths. Random lengths, with their varied board lengths, can disrupt the flow and visual continuity of a room. In contrast, fixed-length boards offers a more uniform and ordered look, reinforcing the size of the space. Our best advice is to never compromise on this area.

HERRINGBONE

Sometimes known as parquet, the attractive and time-less design of the Herringbone pattern is created by rectangular boards which are laid in an attractive zig-zag pattern, stacked on-top of each other to create a "point" giving a characteristic expression to a room.

We see a move back towards a classic herringbone installation, where there is a 2-x block border at the walls or where one of our matching frame boards are used to create a border affect.

We work with 2 x different herringbone sizes, which is a classic 70 x 490mm or a more modern 120 x 600mm size. For all our modern herringbone designs we can offer a matching plank design, so you can have the same colour in a herringbone & plank in different rooms.

DUTCH PATTERN

Based on a classic Dutch design, our Palazzo wood flooring boards are arranged in a multi-strip formation, following a box repeat pattern. They have a unique repeating pattern with three short blocks running lengthwise separated by a perpendicular block. The result is a vivid display of symmetry that brings any room to life.

Kährs floor planner – the ideal tool when choosing a floor

We developed a digital floor planner to help you choose the right, and best looking floor for your home. It allows you to quickly and easily upload an image of your interior, and then simply browse around our broad portfolio of floors and try them out until you find your favourite. This technology enables you to get a real impression of what the floor will look like in your home.

A floor can truly change the interior of any home, and it's one of the most important interior elements. Choosing a new floor is a big decision and there are many things to take into account. Will it make the room appear smaller or larger, darker or lighter? The appearance, feel and colour are only a few points to consider. We have therefore developed the Kährs Floor Planner: A great tool that will help to ensure that you choose the right floor.

Once you have narrowed down your favourite floors to two options, the compare function is perfect. By using the compare function, you can easily compare between two different floors by simply dragging the vertical line left/right.

The impact of colour

Light, dark or natural? The colour of the floor has a strong impact on how the room is perceived. A dark floor “swallows” a lot of light, but it also creates a sense of warmth and cosiness. A light wood floor reflects the light and adds space to the room.

WHITE FLOORS

Wood floors in shades of misty, cloudy white create an immediate sense of tranquillity in any interior. Our range includes floors featuring different designs, with different surface treatments; from oiled to lacquered.

GREIGE FLOORS

One of the latest trends in wood flooring is grey – from shades of driftwood to charcoal. Grey coloured floors are made to look like they have aged over the years, creating a unique and warm patina.

LIGHT FLOORS

Relaxed, yet refined, light wood floors create a perfect canvas for your furniture. They also add instant light to any interior. Our light floors come in a wide variety of shades, from floors with crisp, cool starkness, to warmer shades.

BROWN FLOORS

Nothing can create instant warmth quite like a brown wood floor. The rich, earthy tones of amber and tobacco create a perfect backdrop for both traditional and contemporary interiors.

NATURAL FLOORS

A true classic, a natural oak wood floor will add a sense of warmth and natural beauty to your home. Depending on the design, they can be lively or calm, rustic or elegant.

DARK FLOORS

Dark wood floors create a solid ground. They bring a sense of sophistication and richness to the interior.

Herringbone Collection

Premium herringbone & matching plank designs

Choose from one of our modern large herringbone designs or a smaller traditional parquet size design. We have all the main colour tones covered including beautiful smoked Oak's. As we do with our plank products, we offer our herringbone designs in different grading options including Prime grading with no knots or lively and warm rustic gradings including some with a brushed surface feature. We also have matching planks to mirror our large herringbone designs.

A frame border of the same wood colour, can be added to further enhance the design and create a focal point. This style dates back to the Roman Empire and remains a popular choice for both traditional and modern interiors today.

MINT

White floors

Premium planks and Dutch pattern designs

Wood floors in shades of misty, cloudy white create an immediate sense of tranquillity in any interior. Choose from one of our classic Scandinavian white flooring options to suit your own design requirements.

White wood floors offer numerous advantages, making them a popular choice among homeowners and designers. They bring brightness and openness to any space.

With a timeless appeal, they seamlessly blend with various design styles, serving as a versatile backdrop for furniture and decor experimentation. They are also easy to clean and maintain, maintaining their pristine appearance over the years.

Light floors

Premium planks and Dutch pattern designs

Relaxed yet refined light wood floors create a perfect canvas for showing off your furniture and the design features of your home. They also add instant light to any interior. Our light floors come in a wide variety of colours, from stark light shades to warm tones.

Some colour shades rarely go out of fashion, and greige is one. A combination of beige and grey tones, results in a warming and sophisticated look, where we have many designs to choose from.

CUMIN

Brown floors

Premium planks and Dutch pattern designs

Nothing can create instant warmth quite like a brown wood floor. The rich, earthy tones of amber and coffee create a perfect backdrop for both traditional and contemporary interiors, providing an authentic aged look. Our brown floors come in a range of rich shades, various designs and surface treatments.

Dark floors

Premium plank designs

Dark wood floors create a solid base. They bring a sense of sophistication and richness to the interior. They never seem to go out of fashion; they are always trendy and in style. The contrast between dark wood floors and bright, light walls for many people epitomizes a sophisticated and upmarket style. Our dark floors come in many designs and surface treatments.

Our smoked floors have been treated to darken and enhance their natural colour through a process involving ammonia & tannins. This process creates a unique range of colours and wood grain patterns, making each plank of flooring one-of-a-kind, where they lighten in colour over the years.

Prime Grade Collection

Premium planks and pattern designs

There is a clear trend towards choosing a calmer and cleaner grade of wood floor and we have several design options at different price ranges. We have highlighted our cleanest and calmest planks & pattern designs to help narrow down your choice. Within the following collection you will find wood flooring with no knots, or with very little knots that will be small.

Due to the limited availability of prime grade material where only about 10% yield comes from a tree, it generally comes with a higher price tag.

However, they are one of the few floors that is free from any visible knots, mineral streaks, and colour variation, giving it a clean, uniformed look. There will also be a minimal amount of sapwood and filler, if any at all, offering you something rather special due to how difficult it is to procure this grade of floor.

Life Authentic Planks & Herringbone Collection

Next generation engineered wood flooring designs by Kährs

Kährs have a long history of innovation, and we continue to build on this with Life Authentic, the next generation of engineered wood flooring.

Due to the innovation on the Oak top surface, Life Authentic is our most sustainable engineered wood collection to date due to working with less slow grown resources. We have designed the products to be more robust on dealing with minor 24-hour water spillages compared to traditional engineered wood flooring, whilst an Oak balancer on the bottom of the product gives it the highest dimension stability.

Pushing innovation further, Life Authentic Planks achieves the highest fire-rated certificate of Bfl-s1, which means in the event of a fire the floor remains almost flameless.

Like all our flooring designs, Life Authentic achieves the highest indoor air quality due to being tested to achieve M1, A+ & Floorscore, offering re-assurance they feature no VOC's.

Life Authentic features several beautiful colours from light to Smokey brown tones in prime or rustic gradings to support either a contemporary or traditional design. The surface is brushed to give an authentic grain structure and finished in either a durable Matt lacquer or natural Oil finish, with options between Herringbones & large Plank designs.

Whilst being the next generation of wood flooring, Life Authentic becomes the most affordable premium wood designs from Kährs, allowing for additional rooms in the home to be installed with beautiful natural wood floors.

Wide planks in focus

Some rooms deserve a wide plank design, and they can add something grand to a room.

We have several wide plank options in different colour tones and price points. Choose our widest plank measuring a majestic 305mm wide or choose a design from our 220mm wide plank options in the Tempest collection.

Minimal Seams: A wider plank means fewer joint seams, which contributes to a more streamlined luxurious design, especially in modern and open-concept spaces.

Narrow designs: 2-strip

As the inventors of engineered wood flooring, we are clever in how we can produce some of our floors to provide a narrow plank design at a mid-price point.

We place 2 strips of narrow planks onto a single board where the strips are selected in the same way when producing our full plank designs. We arrange every 2-strip floor to give them their own unique character. Kährs' 2-strip flooring is available in two options: long lengths, and short lengths.

The below collection features all our lovely 2-strip designs some featuring clean grades and brushed finishes, along with species such as Ash and Walnut.

COCONUT CREAM 2-STRIP

Both the number of strips in a floorboard and the direction in which you lay it affects the room more than you think. A common way to lay wood floors is in the direction of a room's light source. If you have a wall with many windows, you should lay the floor with the length of the boards towards the windows. Want to create depth in a room? Lay the strips vertically to make the room seem "longer" than it actually is. If you want to make a narrow hallway appear bigger, lay strips horizontally.

PURE WALNUT

www.kahrs.com

Scandinavian design classics: 3-strip essentials

The most popular design of wood flooring in Scandinavia is what is known as '3-Strip'.

This design creates light and space in any room, due to the size of the strips placed onto a plank format.

Due to the clever manufacturing process we have developed over many years at Kährs, it means the 3 strip designs are not only beautiful looking floors but are our most affordable designs. We feel it is *essential* to make real wood floors affordable.

On some of our 3 strip designs you will find the same options open to you that you will find on our premium plank designs, such as clean grades, brushing, smoking, distressing and up to 30-year warranties.

Choose from the following designs to select a floor that will bring light and space to your home whilst making a real wood floor with high design features more affordable.

SCANDINAVIAN DESIGN CLASSICS: 3-STRIP ESSENTIALS

CHARCOAL LIGHT STRIP

Guide to completing your floor

Once you have chosen your Kährs floor, you have a few final areas to consider ensuring you achieve a perfect installation.

FINAL CHECKLIST

SUBFLOOR: UNDERLAYS

Whatever subfloor type you have, we have an underlay to suit and guarantee a successful installation, especially over any under floor heating. You will be able to choose the most suitable underlay from our easy reference guide.

TRIMS AND MOULDINGS

Whatever Kährs floor you choose you can be re-assured we have a matching colour trim. Our Trims are made from solid wood so complement the floor design. We even offer several types of stairnose trims, so you can install our floors in your staircase.

BASIC INSTALLATION TOOLS:

Unlike other suppliers Kährs only work with locking joints to ensure a gap free floor, and we provide several basic tools to allow to allow flooring professionals to install our floors in correct fixing method.

CLEANING & MAINTENANCE

Wood floors require little cleaning or maintenance, but when they do, we have several options for you to clean or maintain your floor including spray cleaners, tinted oils and floor refresher.

REPAIRS:

Should you need to repair your floor, don't panic we have everything you need to do this easily with our clever repair kits.

TECHNICAL ADVICE:

All installation guidelines can be downloaded easily from our website covering areas such as installing over under floor heating and subfloor considerations.

The following pages will give you all the information you need to complete your floor.

Choosing the most suitable underlay

We believe all successful wood flooring installations begin with choosing the correct underlay. Kährs offer several options all designed to be compatible for any subfloor, moisture, under floor heating, acoustic, thermal resistance and sustainability requirements.

Below is a simple guide to allow you to choose the most suitable underlay for each specific installation.

ECO FLEX SILENT:

As the name suggests It not only has excellent sustainability properties as it contains a minimum of 90% natural mineral materials, but it also reduces walking sound by 30% and reduces heating costs due to low TR of 0.01M2/KW. Use for high compressive strength, UFH, sound reduction, low thermal resistance, and Eco requirements.

ECO FLEX SILENT is FREE of plasticizers, formaldehyde and heavy metals, solvent free and does not contain any other ozone-depleting substances.

	Impact sound	●●●●○
	Compressive strength	●●●●●
	Leveling effect	●●●●○
	Walking comfort	●●●●○
	Underfloor heating	●●●●●
	Moisture management	●●●●●

TUPLEX:

This is by far our most popular underlay that features an integrated moisture barrier and 200mm overlap with glue tape. Based on AirFlow technology, Tuplex can level up to 1,85 mm in cases of uneven subfloors and is suitable for underfloor heating due to the buildup of a top layer with high vapor resistance, a permeable bottom layer and solid flexible polystyrene granules sandwiched in between.

The Airflow Technology - Ventilates and seals out moisture, prevents mold formation under the floor and Tuplex high compression strength secures that the ventilation works under load. Tuplex also comes in 2 x easy to handle size rolls: 16.5m2 or 33m2.

	Impact sound	●●●●○
	Compressive strength	●●○○○
	Leveling effect	●●●●○
	Walking comfort	●●●○○
	Underfloor heating	●●●●●
	Moisture management	●●●●○

ECO FIBER:

Is a sustainable circular product allowing for a more sustainable choice regarding underlayment. The strong sustainable properties of Kährs Eco Fiber include:

- 100% recycled content consisting of textile and paper;
- 100% recyclable;
- Reduces waste of energy through a high thermal conductivity of 0,016 m2 K/W, by efficiently transporting warmth from underfloor heating;
- Contributes to a pleasant interior environment by providing a good sound isolation of 16 Db;
- And in addition is affordable and fast to install

Kährs offers a complete flooring system where every detail – from the skirting to the wide range of installation and maintenance products – have been designed to enhance the beauty and strength of your floor.

THE PERFECT FINISH

The smallest things often make the biggest difference. This is true of a Kährs floor, where the highest level of skill and craftsmanship goes into every detail, including the skirting boards and different types of mouldings.

CARE AND MAINTENANCE

Kährs' Care and Maintenance range cover all you need for daily care, as well as regular maintenance of the floor. It also includes products which can be used to repair a damaged floor.

Flooring trims

Complete any Kährs floor with a full range of accessories, including mouldings, scotia, skirtings, and stairnosing.

MOULDINGS

To cover the expansion gap between rooms, doorways and more.

Technical support

A Kährs floor installed following our installation & maintenance guidelines will last for generations.

Kährs are seen as the experts in how to offer guidance on how an engineered wooden floor should be installed and we provide everything that may be needed by your installer and for yourself on how to install and maintain your floor.

You can download all our installation and maintenance manuals from our website or contact us with any questions you have at sales@kahrs.com

CLEANING, MAINTENANCE, AND REPAIR ADVICE FOR OUR WOOD FLOORS

We offer full instructions on how to clean, maintain and repair our wood flooring products.

KÄHR'S INSTALLATION:

Full installation instructions on how to install our wood floors can be found online.

UNDER FLOOR HEATING ADVICE

UFH guidelines and installation advice details can be found online.

SAMPLE SERVICE – Order up to 3 free 300mm hand samples

Kährs offers a free-of-charge sampling service, and we can ship them directly to you, we can send you a maximum of 3 samples.

Once you have checked-out you can expect to receive your samples within 3-4 working days.

NOUVEAU GRAY

- Want to know what we have in stock?
- Need a full board sample?

Kährs retailer E-com Portal

All our official retailers have access to the Kährs trade E-com portal, showing them the live stock position and lead times on all the flooring designs shown in this guide, where they can also order full board samples directly from our factory to be sent to your home address.
