

TTools joins forces with DMRZ to drive innovation and expand its offering in German therapy and rehabilitation software

Düsseldorf / Castrop-Rauxel – June 30, 2026 – DMRZ (Deutsches Medizinrechenzentrum GmbH), a leading German provider of cloud-based billing and software solutions for the healthcare sector and a portfolio company of VIA equity, partners with TTools, a German software company offering a comprehensive cloud-based practice management platform for therapy and rehabilitation providers.

The partnership strengthens DMRZ's position in the German healthcare software market and accelerates its strategy to support customers with the digitalization of processes and workflows around practice management, documentation, and billing, while at the same time enhancing operational efficiency.

Founded in 2013, TTools offers an integrated therapy management platform that digitizes the core business processes of therapeutic facilities across Germany, including physiotherapy, occupational therapy and speech therapy practices as well as outpatient and inpatient rehabilitation clinics. The software enables organizations to manage patients and appointments, handle documentation and billing, and organize rehabilitation sports courses and functional training through an intuitive, modular platform designed to scale with its customers.

Since 2013, TTools has built a strong organization to support a growing base of active customers across the German therapy and rehabilitation landscape, from single practices to larger, multi-site therapy centers and rehabilitation groups. Having emerged as a trusted player in its niche, TTools has established a strong presence across Germany. The company will now join forces with DMRZ, a portfolio company of VIA equity, to accelerate its next phase of growth.

"We are excited to welcome TTools into the DMRZ family, adding a strong software platform and a highly capable team that align well with our ambition to broaden our offering for the German healthcare market," says Bodo Braun, CEO of DMRZ. "TTools offers a modern and highly intuitive platform that allows its customers to increase efficiency and transparency across their organizations. We are impressed with what the TTools team has accomplished so far and look forward to continuing this journey together."

The founders and management team of TTools will remain in the company and continue to play a key role in the joint growth journey. TTools customers will continue with the same trusted team and brand they've come to rely on today, and TTools will continue its customer-centric approach and strong dedication to product innovation to remain a preferred solution for its customers. Together with DMRZ, TTools will benefit from best practices in operations, technology, customer success, and go-to-market efforts to continue the growth and increase the value for all employees, customers and partners going forward.

"The partnership with DMRZ is a significant milestone in the development of TTools. We share the same vision of consistently digital, customer-oriented healthcare. By combining our strengths, we can drive innovation faster, expand our offering in a targeted way, and provide even more long-term value to our customers. At the same time, TTools remains the company our customers know and value with the same team, the same closeness to our customers, and the same passion for

excellent software” say Heiko Lettmann and Jost Ziegner, Founders and Managing Directors, TTools.
