

## Sonat acquires Savvy to strengthen national growth ambitions

**Bergen, Norway - April 28, 2026.** Sonat strengthens its full-stack development capabilities with the acquisition of Savvy AS. As part of the transaction, existing Savvy shareholders will reinvest in a minority stake in Sonat, reflecting their shared confidence in the combined group's long-term growth.

Founded in 2021, Savvy has built a team of senior full-stack developers with strong technical capabilities. The company works with clients across both the public and private sectors, delivering across a range of industries. The company was established with the ambition to build a company defined by experienced, committed people and a strong focus on delivering solid, well-crafted solutions in close collaboration with clients.

The acquisition adds experienced developers to Sonat's existing environment and increases its ability to scale project teams in line with client demand. For Savvy, becoming part of Sonat provides access to a broader professional setting, a more established commercial platform and opportunities to engage in larger and more complex projects.

"We have been watching Savvy grow and are very impressed by the quality of Savvy's people and the loyalty of their customers. Bringing Savvy into the group means we can better meet our customers' demands with some of the best talent in Bergen. We are excited to welcome the Savvy team to Sonat" says Kjartan Storli, CEO of Sonat.

"This is a strategic decision for Savvy. We have built a strong company with a clear focus on quality, people and long-term client value. Joining Sonat allows us to accelerate our growth and take on larger opportunities, while continuing to develop what makes Savvy unique, our culture, our people and the way we work" says Lene Sørensen, CEO of Savvy.

The acquisition of Savvy is the second add-on of Sonat since VIA equity joined as shareholder in 2023. Together with the earlier acquisition of Apparat AS, it reflects a deliberate strategy of building a larger IT consulting group delivering end-to-end technology solutions with deep roots in Bergen and a growing presence across Norway.
