4. PURPOSE

This report documents the verification and validation activities results of the Matrix Req software product.

5. SCOPE

This reports applies to **Matrix Req product version 2.5.7**.

The version is a patch update of previous version 2.5.6

Changes in scope of the version are listed in the "Appendix: Changes" section.

6. REFERENCES AND APPLICABLE DOCUMENTS

Verification and Validation Plan, Ver. G

7. RESPONSIBILITIES

Name	Title	Responsibility
Ignas Žakaitis	QA Lead	Defining test cases and use cases Running test executions Reviewing automated test results Writing the verification conclusions
Aman Jha	Software QA Engineer	Running test executions
François Chasseur	Deputy CTO	Coding, code review, infrastructure support
Aloïs Paulus	Software Engineer	Coding, code review
Sylvain Caillet	Software Engineer	Coding, code review
Hiranmai Tejavath	DevOps Engineer	Infrastructure support, ops related test execution
Abbas Dhilawala	CTO	Reviews and approves the V&V report
Nicolas Von Bandel	CPO	Reviews and approves the V&V report

8. VERIFICATION AND VALIDATION SUMMARY

8.0.0.1. Validation Summary

No validation was required due to the scope of changes.

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 4 / 16

8.0.0.2. Verification Summary

- The critical code changes were peer-reviewed and no major issue was found. The minor issues were fixed.
- The defect fixes included in release 2.5.7 were also present in the 2.6.0 builds used for the main verification activities. Verification evidence applicable to these shared changes from builds 2.6.0.0-a9b6131 and 2.6.0.0-dd6f8a9 has therefore been reused for the 2.5.7 release.
- The final 2.5.7.0-6a93436 release build was additionally subjected to smoke testing and automated regression testing to confirm the integrity of the patch release. All tests passed.
- Two pre-existing non-critical issues were identified during the verification stage. The issues are unrelated to the changes included in this release and have been documented as known issues, and will be addressed in an upcoming release.
- No other new issues have been identified.

8.0.0.3. Final Verdict

No new blocking defect was found: the software build 2.5.7.0-6a93436 can be released.

9. VERIFICATION DETAILS

9.1. TEST EXECUTION OVERVIEW

Verification of the defect fixes included in 2.5.7 was performed primarily during testing of the concurrent 2.6.0 release. The tested 2.6.0 builds contained the same fixes that form the scope of the 2.5.7 patch release.

Only test results applicable to the changes included in 2.5.7 are considered as verification evidence for this release.

Following creation of the 2.5.7 release build, a release confirmation cycle consisting of smoke testing and automated regression testing was executed against build 2.5.7.0-6a93436. All tests in this cycle passed.

Traceability and the release change set were reviewed to confirm that the verified defect fixes are included in the 2.5.7 release.

9.1.1. Tested Release Builds

Verification activities were performed using two 2.6.0 builds containing the 2.5.7 changes and the final 2.5.7 release build.

Build	Test Cycle	Number of Tests	Passed Tests
2.6.0.0-a9b6131	First Cycle	39	32
2.6.0.0-dd6f8a9	Second Cycle	17	17
2.5.7.0-6a93436	Release Sanity Check	40	40

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 5 / 16

9.1.2. Testers

Manual tests were executed by 3 testers:

Tester	Number of Executed Tests
ignas	44
aman	12
hiranmai	1

Results of automated tests were reviewed by Ignas.

9.1.3. Test Environment

All tests were executed with the latest version of the used browser

Browser / OS	Number of Tests
Windows 11 / Brave 1.94.117 (Official Build) (64-bit)	50
Windows 11 / Brave 1.93.138 (Official Build) (64-bit)	33
MacOS 26.5.2 (25F84) / Brave 1.93.138 (Official Build) (arm64) Chromium 151.0.7922.173	7
MacOS 26.5.2 (25F84) / Brave 1.93.136 (Official Build) (arm64) Chromium 151.0.7922.137	5
macOS 26.5.2 / Chrome 150.0.7871.187 (arm64)	1

Notes

- It was verified that above changes were all changes done to the source code (nothing else changed than the planned changes)
- Tests were executed after the last code review
- All FEAT have been tested (see Appendix: Test Results)

10. VALIDATION DETAILS

n/a - see above

11. APPENDIX: CHANGES OF THE VERSION

FEAT-1281 Items no longer shown as "deleted" when their category label ends in "F"	Author:	Date:	Revision:
	Olena Motrichuk	2026/09/03 11:42:30	7
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Items no longer shown as "deleted" when their category label ends in "F"</i>			

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 6 / 16

Downlinks:

- [TC-565](#) Verify that category names ending in F work

Short

Opening an item directly by its URL now works even when its category's short label ends in the letter "F".

Description

Previously, if a category's short label ended in *F* (for example VERIF), navigating straight to an item's folder URL showed a "deleted item" message even though the item existed and loaded fine through normal navigation. Labels such as VERIF, VERIFF, and CERIF were affected, while VERIG and VERIFICATION were not. Items now load normally regardless of how the category's short label is spelled.

FEAT-1282 Cleared field values now merge correctly from a branch to main	Author: Olena Motrichuk	Date: 2026/08/24 17:43:04	Revision: 7
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Cleared field values now merge correctly from a branch to main</i>			
Downlinks: • RISK-13 Merging creates unexpected results • TC-214 Content Merge - Fields			
Short			
Deleting all content from a field in a branch is now carried over when you merge the branch back into mainline.			
Description			
Previously, when a field (such as a rich-text field) was emptied in a branch and the branch was merged into mainline, the merge wizard's comparison correctly showed the field as cleared, but the merge didn't apply it - a new version was created in mainline with no actual change, so the old content remained. The merge now applies the deletion, so the field ends up empty in mainline, matching what the comparison screen shows.			

FEAT-1283 You can force acknowledge a training notification and it'll act as if the training was performed	Author: Olena Motrichuk	Date: 2026/09/03 11:42:35	Revision: 7
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / You can force acknowledge a training notification and it'll act as if the training was performed</i>			

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 7 / 16

Downlinks:

- [TC-272 QMS overdue trainings](#)

Short

Force-acknowledging a training notification no longer marks the training as completed.

Description

Previously, because a training was delivered as a standard notification, a user could force-acknowledge that notification in the QMS project, and the system would behave as if the training had been performed and its questions answered - marking it complete without any of that happening. Force-acknowledging a training notification no longer counts as completing the training; completion now requires the user to actually go through it.

FEAT-1284 Published items keep their position in the collection in the liveQMS	Author: Olena Motrichuk	Date: 2026/09/03 11:42:37	Revision: 7
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Published items keep their position in the collection in the liveQMS</i>			

Downlinks:

- [TC-284 Published Item Order](#)

Short

Publishing a new version of an item no longer moves it to the top of its collection in the liveQMS.

Description

Previously, after publishing a new version of an item, it jumped to the top of its collection in the liveQMS instead of staying in its normal position (publishing another item afterwards pushed the first back into place). Published items now keep their position in the collection order, matching the order in your tree.

FEAT-1286 User groups are now included in "export with history"	Author: Olena Motrichuk	Date: 2026/09/03 11:42:41	Revision: 7
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / User groups are now included in "export with history"</i>			

Downlinks:

- [TC-11 XML item and audit export](#)

Short

Export with history" now includes user groups, which were previously left out.

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 8 / 16

Description

User groups were not included when exporting a project with history. They are now exported together with the rest of the project, making the export more complete.

FEAT-1287 Fixed project export (with history) that could not be re-imported	Author: Olena Motrichuk	Date: 2026/09/03 11:42:44	Revision: 6
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Fixed project export (with history) that could not be re-imported</i>			
Downlinks: TC-11 XML item and audit export			

Short

Fixed an issue where a project exported with history could fail to import because of out-of-order audit entries.

Description

After items were moved in a project (on versions from 2.5.5 onward), an "export with history" could produce a file in which audit entries listed a field value before its parent item. Importing that file then failed with an "unknown item instance" error, leaving affected customers unable to restore or migrate their exported data. The export now writes each item before its field values, so exported projects import successfully.

FEAT-1288 Creation of tokens is not display it in the adminConfig	Author: Olena Motrichuk	Date: 2026/09/03 11:43:19	Revision: 7
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Creation of tokens is not display it in the adminConfig</i>			
Downlinks: TC-535 Access Tokens are only displayed when created			

Short

When creating a token to another user, the token is displayed now.

Description

Previously, after creating a token for another user in the admin configuration page, the generated token was not visible to the administrator. This was caused by a page refresh that occurred immediately after token creation, which cleared the token value from the UI before the user had a chance to copy it.

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 9 / 16

With this fix, the token is now displayed to the administrator directly after creation, without being hidden by the page refresh. This allows the administrator to copy and share the token with the intended user as expected.

FEAT-1285 Upgrade of the underlying application server from Tomcat 9 to Tomcat 11	Author: Olena Motrichuk	Date: 2026/09/03 11:43:36	Revision: 12
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Upgrade of the underlying application server from Tomcat 9 to Tomcat 11</i>			
Downlinks: • TC-1 Authentication and Session Handling • TC-11 XML item and audit export • TC-27 File Attachment / Drag and Drop Content • TC-118 Concurrent Editing: Happy Path • TC-126 Notifications • TC-156 Session duration • TC-158 File attachments for DOCs / Signatures for external PDFs/DOCX • TC-175 Concurrent Editing: User times out and comes back, cancels • TC-176 Concurrent Editing: User times out and comes back, continues editing • TC-191 Switch between different file download authentication levels • TC-233 XSS Tests General • TC-305 & escaping test • TC-336 SuperAdmin tests • TC-406 Checks that we can download 4GB- files			
Short			
Internal upgrade of the underlying application server from Tomcat 9 to Tomcat 11.			
Description			
The platform now runs on Apache Tomcat 11 instead of Tomcat 9. This is a required infrastructure and maintenance upgrade that keeps the application server on a current, supported version of the operating system; it does not change any product feature or user-facing behaviour.			

FEAT-1289 Time warp and item history now show the configuration as it was at the selected date	Author: matrixadmin	Date: 2026/09/04 10:46:51	Revision: 4
✓ CODE done ✓ IFU done ✓ FDR done ✓ DHF done			
<i>Product Changes / Release 2 / Release 2.5 / 2.5.7 / Defect Fixes & Minor Improvements / Time warp and item history now show the configuration as it was at the selected date</i>			
Downlinks:			

	[2.5.7] Verification and Validation Report	
	MATRIXSPECS: Validation Matrix Req 1.X/2.X (VALID)	Date: 2026/09/08 09:29:49
	Document:	Page: 10 / 16

- [REQ-14](#) Change log & History
- [SPEC-378](#) Redlining UI
- [TC-62](#) Audit Log Tests
- [TC-88](#) Redlining Dashboard and Timewarp
- [TC-555](#) Item redlining edge cases
- [TC-668](#) Item History and Field Configuration Changes
- [UC-12](#) Audit Log
- [UC-35](#) Detailed history view

Short

When browsing a project at a past date or comparing item versions, Matrix now displays each item with the categories, fields and settings that existed at that time, instead of always using today's configuration.

Description

Previously, when using the time warp feature or opening an item's history, the display was always built from the project's current configuration. As a result, a field that had been deleted since would silently disappear from older versions -- together with the value it held -- and a field added later would appear as an empty entry on versions written before it existed. In a side-by-side comparison of two versions this could even leave one pane empty.

With this fix:

- Browsing a project at a past date shows the categories, fields and project settings exactly as they were on that date.
- Each version in an item's history is displayed with the fields it was written with, so values entered in fields that were later removed remain visible on the versions where they existed.
- When a past configuration differs from today's, the difference is called out: fields removed since are marked accordingly, and fields that did not yet exist at that date are listed by name rather than shown as empty.
- Comparing two versions side by side works even when the two versions were written under different configurations, with additions and removals highlighted.
- The most recent version of an item is always presented with the current configuration, so day-to-day work is unaffected.

This makes reviews and audits of historical project states reliable: what you see at a past date is what existed at that date, with any configuration changes since then clearly indicated.

	[2.5.7] Verification and Validation Report
