Gender Pay Gap

— Report 2024

cliftoncollege.com

Introduction

— Clifton College's pay approach supports the fair treatment and reward of all colleagues irrespective of gender.

This means we take seriously our responsibility to lead by example. One of the ways we do this is by reporting our gender pay gap data. The gender pay gap should not be confused with unequal pay. Unequal pay is the unlawful practice of paying men and women differently for performing the same or similar work or work with equal value. The gender pay gap is

a measure of the difference between the average hourly earnings of men and women.

The gender pay gap is calculated by taking all employees across an organisation and comparing the average pay between men and women. Reporting annually is an important way to track how recruitment, reward, and progression decisions impact the achievement of a diverse, inclusive workforce.

This report covers the 2023–24 reporting cycle, using a snapshot date of 5 April 2024.

This year our median pay gap continued the decreasing trend, reducing by 6.67% percent to 10.06%. Our mean pay gap also decreased by 5.56% to 10.23%. Average gender pay gap for 2024 from the Office for National Statistics is 6.9%.

We see significant fluctuations in our reported pay gap because we are a medium-sized organisation with a predominantly female workforce, so small changes in our employee profile have a significant impact.
