- Inspection Report (FRP 601) of 2025-07-28.
- Survey Report (CMC 421), Report No. N1436014 Rev. 01 of 2026-01-03.
- Survey Report (CMC 421), Report No. N1436014 of 2025-08-01.

Approval Basis:

- Workshop inspection by DNV 2025-07-28.

Approved production site:

Dencam Composite A/S
Schnorsvej 44
5900 Rudkøbing
Denmark

Approval conditions:

When components are intended for installation on DNV-classed vessels or require design approval by DNV as part of product certification, the manufacturer is obliged to produce these components in full compliance with the applicable DNV Rules. This obligation applies irrespective of any contractual agreement between the manufacturer and its customers.

For components where an Approval of Manufacturer (AoM) certificate is not required, the manufacturer remains bound by this obligation unless DNV has received written notification prior to commencement of construction.

The manufacturer shall prepare and submit an inspection plan for each component type before production begins. This plan must clearly define responsibilities for construction and quality control and shall be approved by DNV prior to the start of manufacturing.

Any significant changes within the manufacturer's organization that may affect production quality - such as modifications to construction methods, facilities, or personnel qualifications - must be reported immediately in writing to the responsible DNV surveyor or the DNV Approval Centre.

If deviations from the AoM certificate, a defined period will be granted for corrective action. A follow-up examination will be conducted if necessary. Should deviations remain unresolved, DNV reserves the right to withdraw the approval.

If DNV becomes aware of damage to products for which the manufacturer is responsible, DNV may suspend the AoM certificate until deficiencies are rectified or withdraw the certificate entirely.
