Adapter Plate for KeContact P40

Flexibility and simplicity for every installation

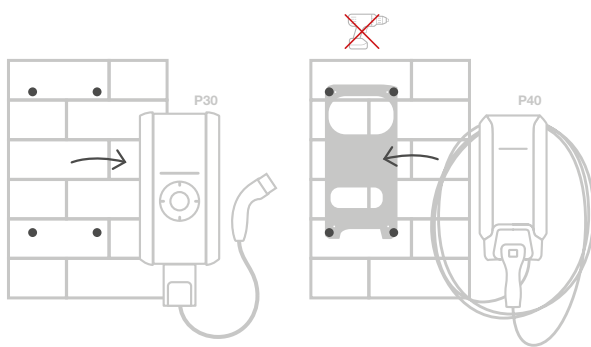

With the new adapter plate, installing the KeContact P40 becomes even easier. Whether replacing an existing KeContact P30 or setting up a new installation with top cable entry, the adapter plate ensures a quick, clean, and flexible solution.

Typical use cases

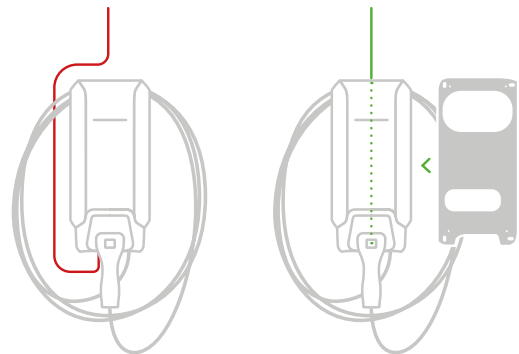

Replacement installation from KeContact P30 to KeContact P40

- // Use existing drill holes of the KeContact P30
- // No new drilling required
- // Quick and neat upgrade

New installation with top cable entry

- // Insert the cable from above
- // Hidden routing between adapter plate and P40
- // Ideal for underground car parks and concealed cabling

Your benefits at a glance

- // Flexible use for new and existing installations
- // Reduced installation effort
- // Clean and discreet appearance
- // Maximum flexibility in cable routing

Discover the new adapter plate for KeContact P40 now and make your installation easier than ever.
