

Switching is that easy.

The integration of WinCC Unified on mobile panels

A step-by-step guide

KEBA[®]
Automation by innovation.

Human-Machine-Interfaces

Introduction

Human-machine-interfaces (HMIs) have established themselves as indispensable tools in modern machine operation. Mobile handheld devices enable flexible, location-independent, and space-saving control of machines and systems, which increases efficiency and responsiveness in production processes. A key requirement for modern HMIs is, above all, the ability to seamlessly integrate with third-party controllers. In the field of mobile handheld devices, there is a particularly high demand for the successful integration of the WinCC Unified visualization software.

The mobile panels of the “KeTop” series are open to all controls and allow such integration in a simple manner. In this easy guide, we present the necessary steps and explain how easy the process for the successful integration of WinCC Unified is.

4 steps to successful integration

1. Select a mobile panel from the "KeTop" range

Our product range includes a wide selection of mobile handheld devices, including wireless models, in portrait and landscape format with 7" or 10" screens. An overview of the devices and technical details can be found in the [KeTop Basic brochure](#) or in the [product configurator](#).

PROFINET / PROFIsafe

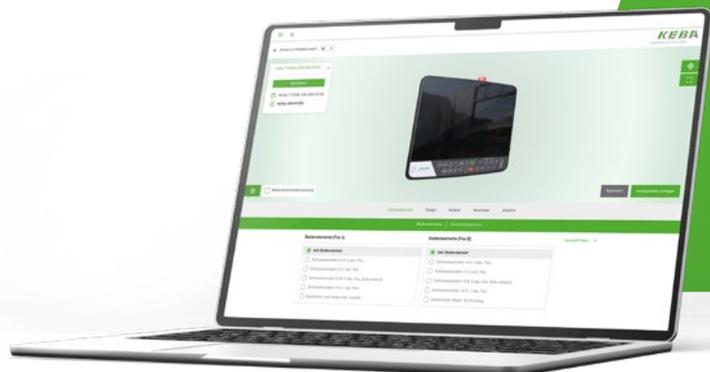

3. Important considerations

When switching to WinCC Unified, we recommend that you also consider switching to PLC-independent HMI software (e.g. WebUI from Inosoft or Galileo from Eaton). This can mean a reduction in costs due to lower license costs.

4. Hardware Customizing

Finally, you can customize your KeTop to your needs. Choose from a large selection of keyboards and operating elements. Get inspired by the [KeTop configurator](#) or talk to one of our KEBA experts for further support.

Do you have further questions? We are happy to advise you.

Arrange an appointment with us. Our experts are guaranteed to work with you to find the perfect individual solution for your company.
