Why Choose W&H

In addition to our Accredited Service Partners, we have an in-house Technical Service Department and dedicated team of 10 factory-trained and qualified W&H Field Service Engineers covering the UK, providing state-of-the art service and support.

We at W&H, take great pride in our after sales service and understand the importance of taking care of our customers.

customer focus and achieving successful outcomes. Out of work, he enjoys spending time with his wife and young son as well as his wider family and he loves to travel.
Diogenes Neto Field Service Engineer

James has been with W&H for coming on 7 years now and really enjoys his job and meeting new people on a daily basis. He honed his engineering skills prior to joining W&H, whilst he was in the Royal Navy serving as a communications information specialist for 5 years during which time he was deployed to the Falkland Islands and Libya and was lucky enough to see some amazing countries along the way. He plays football for a team called Kenilworth Wardens playing in the Coventry Alliance League, although at 32 says he is getting slower and getting less starts - but is happy to be a corner flag as long as he's still involved. James is a Coventry City fan which is slowly becoming less depressing this season - sitting in the top half of the Championship.
James Butcher Service Technician

Technical advice

Our technical team are happy to advise on the repair and maintenance of your W&H products.

Speedy Service

W&H guarantees that your equipment will be repaired normally within 24 hours, from acceptance of the estimate.

Free Transportation

Use our free handipak to send your handpieces in for repair or maintenance.

Quality Repairs

All of our technicians are factory trained to ensure top quality repairs and maintenance are carried out using only original spare parts.

Service Agreements

Gain added peace of mind with a W&H Service plan, ask for details.

Osstell Beacon

Implant stability measurement ISQ

Supported by over 1,200 scientific articles

1
Year
Warranty
UWH

Osstell Beacon

Measure and evaluate the stability of the implant and control its osseointegration quickly and easily thanks to the colour light indicator, depending on the ISQ value. Reduce treatment times and avoid rejection in high-risk patients.

£1,895
£4,424 RRP

Osstell SmartPegs

The SmartPeg used together with BEACON measures the resonance frequency when it is attached to an implant. FOR RELIABLE DIAGNOSIS AND PEACE OF MIND ALWAYS REQUEST THE OSSTELL SMARTPEG.

£96

Pack of 5

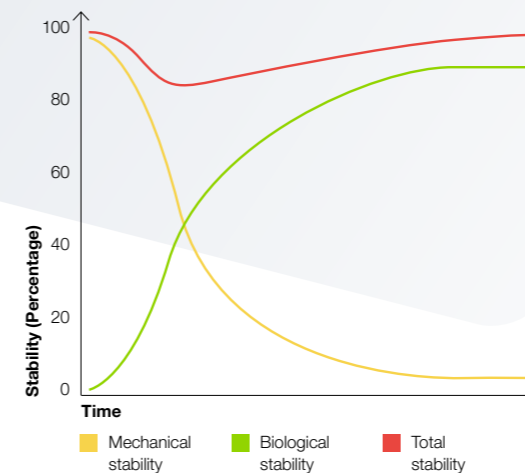

The ISQ Scale

Osstell uses proprietary and evidenced-based RFA technology, based on more than 1,200 scientific studies. Visit osstell.com/clinical-guidelines to learn more.

Evolution of stability over time

As a result of osseointegration, the initial mechanical stability is supplemented and / or replaced by biological stability, the final value of implant stability being the sum of the two. Stability generally does not remain stable after implant insertion. There is an initial decrease in (mechanical) stability, followed by an increase, as the implant becomes biologically stable.

Analysis of the Frequency of Resonance (RFA) and ISQ

Method of measurement

The probe sends magnetic pulses at different frequencies so that the SmartPeg, connected to the implant, vibrates.

The probe measures the vibration of the SmartPeg to determine the frequency that gives the strongest vibration, this being the resonance frequency of the implant / SmartPeg assembly.

The more stable the implant, the higher the resonant frequency.

OsstellConnect

Osstell also gives you **free access to OsstellConnect**, where you can analyze your data, keep track of healing times and success rates over time, and compare from other Osstell users all over the world. **Simply a tool to help you excel.**

*Register online to claim your free Smartpegs when you buy an Osstell IDx or Beacon

Piezomed Classic

Automatic
instrument
detection

Piezomed, the ultimate force in ultrasonic bone surgery, offering extremely high cutting performance, whilst being gentle on soft tissue ensuring reduced patient discomfort and quicker healing.

Piezomed Optic/Cable

- › Piezomed Classic
- › Handpiece with LED ring
- › Cable Foot Control

£4,455

£8,109 RRP

Piezomed Instruments

The W&H Piezomed instrument range includes different instruments for bone surgery, periodontology and extraction, for retrograde endodontics and for lateral sinus lift.

Tips compatible with all Piezomed units.

Bone surgery

The fine saw tooth design – more teeth per instrument – sets new standards in the field of bone preparation.

Periodontology and extraction

Instruments for thorough cleaning in periodontitis treatment and for atraumatic tooth extraction.

Retrograde endodontics

Diamond-coated, delicate instruments for easy access during retrograde root canal preparation.

Lateral sinus lift

The instruments permit safe lateral preparation of the maxillary sinus wall and gentle mobilization of the Schneiderian membrane.

Preparation of the implant site and crestal sinus lift

The preparation instruments are specially matched to the bone qualities predominant in the maxilla.

Piezomed Module

This NEW modular, plug and play device is compatible with the new Implantmed SI-1023 versions. This modular system offers the possibility of adapting the device to the requirements of the individual user.

- › The ergonomically designed handpiece offers absolute comfort and safety.
- › Utilising an innovative design to direct the spray to the treatment area the Piezomed ensures ultra-efficient cooling of the operating site and avoids the need for a case fan.
- › Including the two technologies in one modular device, utilising only one foot control and one disposable coolant tube per treatment makes it the ultimate space and cost saving solution.

Piezomed Classic Module

- › Power 18 W

Meet the Sales Team

Richard Mansbridge

North, North West & East London,
Anglia, East Midlands, Yorkshire/
Humberside and North East England

07775 792628

richard.mansbridge@wh.com

With over 25 years' experience in the dental industry Richard joined W&H in 2017 having gained his stripes in dental laboratory, hospital and dental practice sales throughout the UK.

Richard takes an enthusiastic, hands on approach to customer service and believes in giving the best service he can, supplying relevant, useful information whilst ensuring he reacts to individual customer requests in a timely and friendly manner. Richard joined W&H as he was looking to work for a manufacturer recognized for its strong brand known for quality, reliability and innovation. W&H offered all this as well as being an ethical company whilst retaining its family company feel. Richard has an amongst his skills a solid background in implantology as well as an excellent understanding of decontamination processes.

On a more personal note, Richard is looking forward to the world opening up so he can restart his passion for travelling and discovering new places. He is a keen Formula 1 fan, enjoys walking and spending time with his two teenage kids.
