Osstell Beacon  
Measurement of implant stability

**Osstell SmartPegs**  
The SmartPeg measures the resonance frequency when it is attached to an implant.

**£ 88**  
RRP £121

**Osstell Beacon**  
Measure and evaluate the stability of the implant and control its osseointegration quickly and easily thanks to the easy to read colour light indicator and ISQ reading. Reduce treatment times and avoid rejection in high-risk patients.

**£ 1,700**  
RRP £5,436

**When you buy an Osstell Beacon register online at Osstell Connect to claim your 5 free\* Smartpegs**

\*Free Smartpegs only available with the purchase of an Osstell Beacon and on registering for Osstell Connect

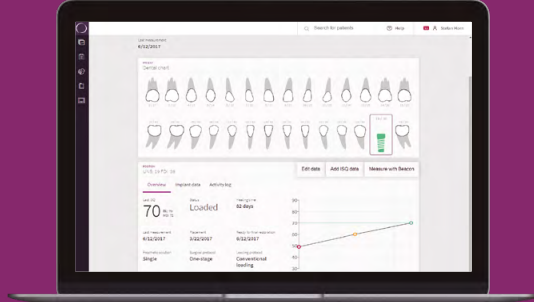

**Osstell Classic**  
Osstell Classic helps you to objectively determine implant stability and measure the degree of osseointegration.

**£ 1,390**  
RRP £2,884

**New!**

**Dr Aly Virani speaks about how W&H streamlines his workflows:**  
Since I began using the W&H Piezomed unit, I've noticed that surgical procedures that involve bone removal, block bone grafting and sinus surgery have become safer and more predictable. Patients also report less postoperative pain versus traditional methods. Using the Piezomed alongside the Implantmed give me the flexibility I need during treatment. I made the decision to invest in Osstell Beacon because of the huge evidence base behind the technology. I knew that we needed a better way to monitor implants and to know when they are ready to be restored, what I didn't realise was the effect that this would have on our patients and our ability to communicate with them and bring them along for the journey. What we've seen is a huge amount of engagement and understanding from our patients to their body's response to implants and the occasions where more time is needed. What it has meant is that they see the ISQ rating, they see the scale, they see the technology and the evidence base and they really understand that we are trying to help them and that we are leading with the latest advancements. What this has meant for the practice is that we are sure on how to proceed and that we are able to communicate this to our patients, so I couldn't recommend the Osstell Beacon more highly.  
The W&H Surgical Solution has been a real practice builder and led to fewer complications which is so important.  
**Dr Aly Virani** North Cardiff Dental & Implants

What are the positive outcomes when using the Osstell Implant stability solutions?

- › A positive experience for patients, encouraging trust through understanding
- › Enhanced patient education builds confidence, resulting in increased treatment acceptance
- › Reduction in treatment visits and failures with improved average healing times
- › Improved outcomes for patients with risk factors
- › Enhanced communication between specialists ensuring a more synergistic approach to treatment
- › Improved treatment documenting

Osstell ISQ devices with the Osstell ISQ Scale help implantologists to make informed implant treatment decisions.

**Osstell Connect**  
FREE App for Osstell Beacon

Osstell Connect is designed to document quantified data which ensures traceability, whilst complementing data in your Patient Management System.

Cleaning & Disinfection

BePro
