

# Synea Power Edition

Clinician-approved for cutting through  
**zirconia** and **IPS e.max® crowns** with ease

The handpiece that takes care of your **patients**

“

## Elevates patient quality of care

*“The Power Edition is one of the few tools I’ve used in the last few years that actually changed the way I practice. The handpiece becomes an extension of my hand - allowing for more controlled, confident preparations that **elevate my overall quality of care!**”*

**Dr. Bobbi Stanley, The Stanley Institute  
(Cary, NC)**

”

## Improves Patient Experience

- ✓ **Whisper quiet:** less anxiety; patients notice and appreciate the difference
- ✓ **Faster:** less time in the chair results in better patient experience
- ✓ **Minimizes over-preparation:** preserving more natural tooth surface and leading to more conservative, patient-focused dentistry

## Minimizes Psychological Impact

- ✓ **Positive long-term effects:** minimizes negative associations resulting in delayed treatment

## Less stressful for patients

*“While using the Power Edition, I was able to remove a crown in roughly 30 seconds compared to 3 to 5 minutes of cutting. This handpiece is less noisy and since it’s faster, it’s **less stressful for the patient** and more effortless for the doctors’ hands. W&H has truly innovated with this handpiece!”*

**Dr. Stephanie A. Robertson-Cameron  
(Wichita, KS)**

“

”

## The handpiece that takes care of **yourself**

### Clinical performance booster

*"Sound affects more than ears – it impacts mental clarity, efficiency and trust. Reducing noise is not a luxury – it's a **clinical performance booster**."*

**Dr. Robert Stanley, The Stanley Institute  
(Cary, NC)**

### Hidden risks of hearing loss in dentistry

- ✓ **Impacts of noise:** excess noise impacts cognitive performance and hearing
- ✓ **Clinical evidence:** 2020 study showed increased high-frequency hearing loss in dentists with >10 years' experience

### Cognitive impacts of excessive noise exposure

- ✓ **Cumulative effects:** potential hearing damage, mental fatigue, reduced focus, decision degradation

### Minimizes hand fatigue: a silent career ender

- ✓ **Minimal effort:** no need to push or lean on the handpiece, resulting in less hand fatigue.
- ✓ **Smooth cutting action:** Imagine cutting a zirconia or IPS e.max® crown like butter – with one bur!

### Reduces hand fatigue

*"After 35 years of practice, the Power Edition handpiece truly stands out for its quiet operation, and exceptional precision. Its ergonomic design **reduces fatigue during long procedures**, and the reliability has been outstanding. I highly recommend it to any dental professional."*

**Dr. Kalambayi T. Kabasela, Metropolitan Dental Specialty Group  
(Silver Spring, MD)**
