Piezomed Module

Promo

The Piezomed module adds a Surgical Piezo to an existing W&H rotary unit that can be used to perform extractions, sinus & bone surgery, in addition to implant surgery. Any W&H glass touch screen system can be combined with the Piezomed module.

Promo Code: PzModTp

Modularity

W&H can update the device to adapt & incorporate new clinical requirements of clinicians.

Automatic Tip Detection

Piezomed detects the instrument when it is inserted and automatically sets the correct power settings.

LED Handpiece & Efficient Cooling

The Piezo handpiece provides excellent illumination & irrigation close to the instrument's area of activity; resulting in efficient of the operating site.

Bluetooth Foot Pedal

The wireless foot pedal allows the clinician to choose the optimal location - one less cord in the operating area.
