Our highly trained team specialises in supporting children with additional needs on horses trained specifically for equine-assisted services.

All staff are certified Horse Boy practitioners and use a movement-based approach to support children through connection and engagement. We work closely with teachers to set individualised goals for each child.

## GROUP SIZES

There is a maximum of 6 children per group. Each group must be supported by at least four school staff members during the session.

We encourage school staff to visit the centre before the programme, to familiarise themselves with the facilities, discuss the needs of the group and to meet the team.

*Please note, our sessions are therapeutic, not riding lessons. The horse's movement provides sensory and emotional regulation.*
