## The challenge in the year 2050:

How do we provide habitat for 6.8 billion people?

In the year of 2050, 9.7 billion people will need a home. More than 70% of the population will be located in urban areas.

## Our solution in the year 2018:

The mobile field factory addresses this question already today.

The production facility is designed to produce **pre-cast segments** for **affordable housing** flexibly **anywhere** in the world.

The mobile field factory convinces with **standardized workflows, high productivity** and allows **value creation** directly at **your project location**.
