

Reclaim the power of conversations

Conversation is essential for interacting with others and giving meaning to our experiences. **Real conversations are complex**, dynamic, lively, and constantly evolving: it is crucial for your hearing aids to be able to follow them, while remaining discreet.

Silk C&G IX is the only invisible and rechargeable hearing aid equipped with OneMic binaural directionality, allowing you to focus on who is speaking in noisy environments.

The IX technology onboard in the Silk hearing aids allows you to have optimised and more natural hearing quality.

*Test for non-medical purposes.

About Signia
The Android robot is reproduced from a work created and shared by Google. Signia is one of the leading hearing aid brands in the world. Our goal is to enhance human performance through iconic innovations.
We refuse to accept hearing loss as a limitation. It's not about correcting a loss, it's about gaining an edge. Not just performing, performing brilliantly. Not just hearing again, but hearing better than ever. Hearing every word, beat, and breath. Unlock yourself with Signia.

Silk C&G IX and Signia App are aimed at people who suffer hearing impairments. Before use, consult a hearing care professional and closely read the instruction manual. This medical device is a regulated health product, which in accordance with this regulation, bears the CE marking. Technical features are available on the manufacturer's website.

signia

Silk Charge&Go IX

4 reasons to choose Silk™ Charge&Go IX

New technology

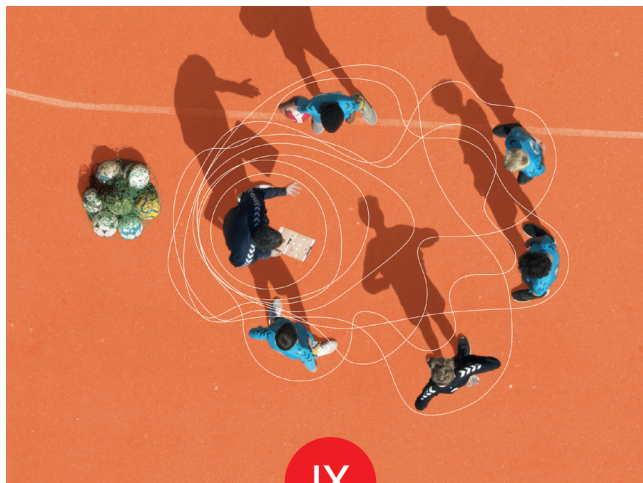

Rechargeable

Ready to wear and use immediately

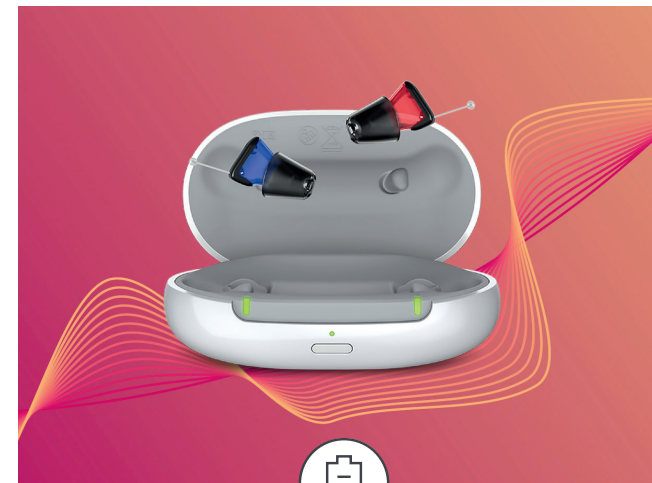

More natural sound

New technology

Invisible

Rechargeable

Signia App

Optimal sound thanks to IX technology

Whether in a busy street, at a restaurant, or during a family party, participating in a conversation requires particular effort when the environment is noisy.

Thanks to Signia technology, Silk Charge&Go IX provides **clear sound and natural hearing quality**: comprehension of speech is adapted to your hearing needs, even in complex environments.

With it, you can hear what matters to you throughout the day.

Concealed and ready to wear

The Silk hearing aids are **instantly fitted**; that is, they can be worn with standard eartips and keep you from having a waiting period.

In-ear, they adapt to all auditory canals, and their small size ensures maximum discretion: once inserted in your ear canal, **they are concealed**.

2 colors available:

Rechargeable for even greater autonomy

Silk C&G IX is the first concealed, rechargeable hearing aid.

Its wireless charger guarantees you up to:

28 hours of autonomy in a single charge

5 days of autonomy thanks to 4 recharging cycles without connection

Personalised support

Silk Charge&Go IX is compatible with Signia App* and its Telecare module.

TeleCare allows you to remain in remote contact with your hearing care professional for immediate, continuous personalised service.

*The Signia application is compatible with Android and iOS. It can be downloaded free from the Apple Store or Google Play.
