

Enjoy the discretion of control.

touchControl App

miniPocket

Experience the joy of natural hearing.

Your partner for confidence and natural sound.

Remote control

The **touchControl App™*** lets you change Inzio's settings remotely and personalize your hearing aids to suit your individual preferences.

And if you don't have a smartphone, the **miniPocket™** also provides highly convenient remote control.

Crystal clear sound

Inzio's **Sound Clarity** offers the most natural, lifelike sound in all environments. This lets you enjoy crystal clear sound, even in the loudest environments.

Speech in noise

Thanks to its **Speech Quality**, Signia's Inzio enables you to hear speech clearly in all situations through sophisticated microphones and advanced noise suppression technologies. This makes it easier for you to understand your conversation partner, even in very noisy environments such as a restaurant or a conference.

Phone calls

Activated by miniPocket or the touchControl App, Inzio's **TwinPhone** feature transmits the caller's voice into both your ears so you can understand every word better.

Your personalized hearing solution

Tailor-made for your ear anatomy, Signia's Inzio sits perfectly and almost unnoticeably in your ear for a high level of discretion and wearing comfort.

Small-sized sophistication

Although tiny in size, Inzio is equipped with state-of-the-art technology for a most natural hearing experience, and can even be remotely controlled.

For a broad range of hearing loss

Mild, moderate or severe hearing loss, Inzio tackles all these challenges and gives you back the natural sound of life.

The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.

Your hearing care professional

The new Insio.

Life is better spent together. Signia's latest Insio™ hearing aids are tailor-made to suit your ear anatomy and hearing loss so you can enjoy spending time with those closest to you without having to worry about your hearing and appearance. Through its incredibly discreet design and exceptional sound quality, the new Insio gives you the self-confidence to savor the important things in life.

Crystal clear sound with a natural flow.

Whether face-to-face or on the phone, conversations require concentration and effort wherever ambient sounds can distract us from hearing what matters. Insio is expertly equipped to tackle these challenges.

It replicates the natural way we localize sound, focusing on your conversation partner while filtering unwanted background noise. You hear most clearly what you want to hear. All day long. In every situation.

Please note:
Features may vary depending on the configuration of the individual hearing aid. Your hearing care professional will be happy to assist you.

Perfectly positioned for phone calls and music.

Unlike hearing aids that sit behind the ear, Insio's microphones pick up sound from inside the ear canal.

This enables you to make phone calls and listen to music in the way you are used to naturally. You can even use over-ear headphones. Wearing Insio is so natural you will forget you are wearing hearing aids.

Further facts and figures.

Signia tinnitus solutions

Tune out tinnitus with the unique built-in tinnitus therapies from Signia. Ask your hearing care professional which solution is best for you.

Optional push button in battery door

With a push button integrated into the battery door, you can change your hearing programs or the volume manually.
