

## About Signia

Only Signia combines industry-leading audiology and technology to deliver iconic innovations in hearing aid to enhance human performance. We put hearing aid wearers first, with products that fit their wants, needs and style. The wearer is at the center of our universe and their needs are woven into our DNA.

For us, this is not about correcting a loss, it's about gaining an edge. Not just performing, but performing at their best.

Signia Augmented Xperience (AX)

signia

Insio Charge&Go AX  
Pure Charge&Go T AX  
Pure 312 AX  
Stylecto AX

## Speech clarity without compromise

Our range of Signia Augmented Xperience (AX) hearing aids change the way you hear the world.

No more straining to hear speech above background noise: Signia's revolutionary AX technology lets you follow conversations with ease, even in difficult listening situations. It helps you stay focused on the conversation you want to hear, while placing background noises where they belong – in the background.

### Enjoy Hearing with Greater Ease

3 out of 4  
wearers experience less listening effort  
with AX than with their own hearing aids\*

Augmented  
Xperience

Immersive  
Soundscape

## Revolutionizing the way you process sound

Traditionally, hearing aids have processed all sounds under one set of rules, resulting in signals competing against each other. Now, Signia Augmented Xperience (AX) hearing aids can separate speech from background noise using Augmented Focus™ technology to bring the sounds you want to hear into focus.

Two dedicated processors can fully optimize different sounds without compromising one or the other. The sounds are then recombined to deliver outstanding speech clarity in a fully immersive soundscape.

This enhanced technology helps you with more than just hearing. 7 out of 10 people say they feel more confident with AX than with their previous hearing aids, and 80% feel more energized!\*

### Excellent speech understanding with Signia AX

94%  
of wearers report excellent speech  
understanding with Signia AX\*

Automatic  
Situation Detection

e2e  
Wireless 4.0

Tinnitus  
Relief

## AX benefits at a glance

### Automatic Situation Detection

Advanced sensor technology recognizes your movement and automatically adjusts your settings for better understanding of speech from any direction and maximizes your audibility as you move throughout the day.

### Tinnitus Relief

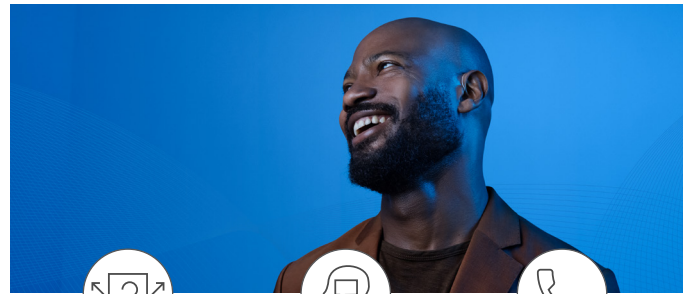

Signia AX features three different tinnitus relief strategies, including static noise therapy, ocean wave therapy, and exclusive Notch therapy, to find the right solution to reduce or remove annoying ringing or buzzing in your ears.

### e2e Wireless 4.0

A great leap for true binaural hearing through a synchronization of sound between ears to ensure clearer speech processing with improved awareness of where sounds are coming from. Plus, e2e wireless 4.0 enhances feedback cancellation to avoid hearing aid squealing.

Better Than Normal Hearing\*

Auto  
EchoShield

OVP  
2.0

HandsFree with  
CallControl for iOS

## AX is enhancing your hearing experience with revolutionary new advancements

### Auto EchoShield

Auto EchoShield delivers automatic, real time echo reduction that ensures listening comfort in all situations, even in halls and rooms with large amounts of background noise. \*\*

### Own Voice Processing (OVP) 2.0\*\*\*

The newly developed Own Voice Processing 2.0 utilizes split processing to help you hear yourself talking more naturally.

### HandsFree with CallControl for iOS

Use your hearing aids for hands-free calls with select smartphones in different environments. The hearing aids' built-in microphones let your conversation partners hear your voice in high quality.

24/7 Signia  
Assistant

TeleCare

## Personal support at your fingertips

Signia is committed to helping you live your life without interruptions – that means on-the-go support and leading technology all in one. Through Signia's advanced app, you have access to hearing aid controls, streaming capabilities with multiple devices, and so much more.

- On demand support via Artificial Intelligence **Signia Assistant**, available 24/7
- Virtual connection to your hearing healthcare provider for remote care services via **Signia TeleCare™**

93%

of hearing aid wearers report that Signia Assistant raises their satisfaction with hearing aids in difficult listening situations.\*

My WellBeing

## Be active, be healthy, and be brilliant.

With the new My WellBeing\* features in the Signia app, you can now see important indicators of your health and activity levels - empowering you to enhance your overall wellbeing.

**My Steps:** The motion sensor in Signia AX hearing aids not only helps you hear better on the move, but also enables you to see exactly how many steps you take each day.

**My Activity:** The Signia app's My WellBeing feature is smart enough to know how much time you spend exercising — and together with your steps, provides an overview of your physical activity level.

**My WearTime:** My WellBeing monitors how well you are using your hearing aids based on how often you use them — helping you better understand your usage habits.

**My Conversations:** The hearing aids' unique Own Voice Processing technology measures how much you are socially interacting with others, so you can keep track of your social engagement and stay on top of any situation.

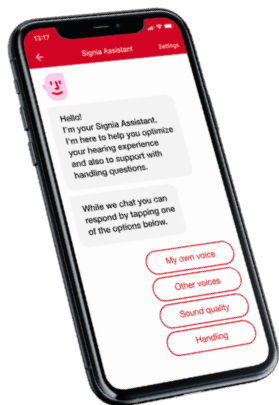

Rest assured that all My WellBeing data is only visible in the app and not accessible to anyone else.

\*My WellBeing requires Signia app v.2.6 and the Firmware available via CXX 9.8.0

Download the Signia app today to see the convenience and ease of use.

Compatible with iOS and Android. The app is free of charge.
