

Water

Water quality is enhanced in your space, meaning you can rest assured that each time you fill up your reusable bottle in our space, it will be with clean and good-tasting water. Water quality performance standards contained in the WELL Building Standard™ require that the water at your tap has been tested for inorganic contaminants, organic contaminants and agricultural contaminants, as well as public water additives that can be harmful in large quantities. In addition, this helps the water taste good so you can stay hydrated, which will help improve your overall state of health.

The WELL Building Standard (WELL)™
