

PL1 Provide Visual Acuity – Option 1

Technical Document (Individual)

WELL Performance Rating™, Q4 2022 Addenda

WHAT IS THIS DOCUMENT:

This document is intended to serve as a guide on how to create a **technical document to provide visual comfort and enhance visual acuity for all users through electric lighting.**

This document and similar tools are intended to assist projects in their pursuit of the WELL Performance Rating™ but use of this document and/or similar tools are in no way a guarantee of achievement of any rating or designation, and no representation or warranty is made regarding the likelihood of achieving any rating or designation.

Note: The below document is based on the Q4 2022 addenda of the WELL Performance Rating™. Project teams are required to implement the feature requirements from the addenda version assigned to their project or any more recent addenda version.

HOW TO USE THIS DOCUMENT:

- ☐  Read the [below feature requirements](#) (or the feature requirements from the [addenda version assigned to your project](#), as relevant) and determine how your project addresses each requirement.
 - a. If your project is a WELL Core project, read through and ensure that your project follows the “WELL Core Guidance.”
 - b. Make sure to apply the feature requirements appropriate to your project’s space types. For example, if your project has both dwelling units and other space types, ensure your project is applying the requirements under “For Dwelling Units” to the dwelling unit spaces and applying the requirements under “For All Spaces except Dwelling Units” to the other space types. Check out the [WELL Performance Rating™ digital standard](#) for the exact language on your project’s space types.
- ☐  Refer to the [below example document](#) to get an idea of how to set up your documentation.
- ☐  Collaborate with your stakeholders to gather the [relevant documentation](#) that demonstrates the project’s compliance with the feature. Some examples of relevant documentation include:
 - a. a letter from a hired professional outlining services provided
 - b. the project’s floor plans
 - c. a modeling report
- ☐  Create a technical document using existing documentation where relevant, annotating it to clarify where feature requirements are met. Some examples of annotating include:
 - a. highlight the sections relevant to WELL requirements
 - b. circle or add boxes around particular data
 - c. add notes to confirm WELL requirements
 - d. add labels to draw attention to particular sections
 - e. provide an explanation of the connection to WELL requirements using a different colored font
 - f. check out the [WELL Documentation Annotation Guide](#) for more
- ☐  Name the document so that it is easily identifiable. Some examples for naming include:
 - a. name the document using the WELL feature code
 - b. name the document using the WELL feature name
 - c. name the document using the WELL document type
- ☐  Review the document you’ve created and ensure that all the necessary WELL requirements are fully and clearly addressed.
 - a. Note: the level of detail is up to the discretion of the project team, but the document must include specific details demonstrating that the actual requirements have been enacted in the project boundary. Features cannot be demonstrated solely through a written confirmation that the WELL requirements have been or will be implemented.
- ☐  Upload the document to the checklist in the WELL digital platform, after you’ve confirmed that the document fully and clearly addresses all the necessary WELL requirements.

FEATURE REQUIREMENTS:

For All Spaces except Dwelling Units

The following requirements are met:

- a. *All indoor and outdoor spaces (including transition areas) comply with the illuminance thresholds specified in one of the following lighting reference guidelines:*
 1. *IES Lighting Handbook 10th Edition.*⁸³
 2. *EN 12464-1&2: 2011 or EN 12464: 2022.*⁸⁴
 3. *ISO 8995-1:2002(E) (CIE S 008/E:2001).*⁸⁵
 4. *GB50034-2013.*⁸⁶
 5. *CIBSE SLL Code for Lighting.*⁸⁷
- b. *The illuminance thresholds take into consideration the tasks and the age groups of the occupants.*

WELL Core Guidance:

Meet these requirements in non-leased spaces. Projects may earn an Innovation feature by also meeting these requirements in leased spaces, which requires access to at least 10% of leased space for testing (identified by the project).

The below sample documentation is intended to provide guidance in creating a technical document. It is not a template. You may note included components that are not required to demonstrate compliance with this feature.

Example document for PL1 Provide Visual Acuity – Option 1

Visual Lighting Design Details		
Lighting reference guide: <i>Ex: IES Lighting Handbook 10th Edition</i>		
Age range of occupants: <i>Ex: 18-65 yrs, lighting levels have been selected based on the oldest occupants (65 yr olds)</i>		
Height of work plane for majority of occupants: <i>Ex: 29"</i>		

Task*	Location(s)	Illuminance Criteria
<i>Ex: Reading documents</i>	<i>Ex: Library</i>	<i>Ex: 50 fc</i>
<i>Ex: Walking</i>	<i>Ex: Corridor</i>	<i>Ex: 20 fc</i>
<i>Ex: Computer work</i>	<i>Ex: Office desks</i>	<i>Ex: 25 fc</i>

[*Note, make sure to include all tasks within project boundary.]

EXAMPLE ANNOTATED PLAN WITH 3.2 x 3.2 m (10x10ft) GRID
Example project is a single-story interiors office project with project boundary depicted in red, grid depicted in purple / yellow boxes, and room usages clearly called out.

TIPS FOR MULTIPLE LOCATIONS

- For organizations pursuing the WELL Performance Rating for multiple locations, this technical document must be submitted for each project pursuing this feature part; it is not considered shareable.
