

# Five Things To Talk To DBASS About Today

You already know that as your accountant we prepare timely and accurate accounts. You've also come to rely on our expertise in completing tax returns to ensure that your company complies with its statutory obligations. But did you know that we could also have a strategic role within your business? We can provide key financial information that will assist with decision-making and a wide range of business advisory services to help manage and grow your business.

## ONE

### **Outsourced Accounting**

Are you a business with no finance function? Could the time you spend dealing with your accounts be put to better use? Are you an overseas company looking for a local accountancy firm to manage your accounts function?

We provide all the support and resources of an internal accountancy team to small to medium businesses and companies from overseas without the staff management issues and fixed overheads. Whether you wish to outsource all or part of your finance function, we will customise a service package based on your needs and integrate seamlessly into your business. You can choose the level of service you require – whether it's bookkeeping, payroll, company secretarial, management accounts or providing interim accounting staff. This service will provide you with the necessary financial information to help you make important decisions about the future of your business.

## TWO

### **Tax Planning**

Is your business structured in the most tax efficient way? Are you claiming all valid expenditure against your business or rental properties? Are you maximising the tax efficiency of your pension contributions? Do you have a plan in place for your retirement?

Our tax experts are up to date with the latest developments in tax legislation and will be able to suggest tax planning initiatives which will help to minimise your tax liabilities and operate more efficiently.

## **THREE**

### **Finance Applications**

Does your business have significant bank debt? Are you no longer able to afford your loan repayments? Are you afraid to talk to your bank? Do you want to apply for finance?

We are well placed to help you in your discussions with the bank to agree a repayment plan that will work well for both parties. This often involves the restructuring of the existing facilities on a temporary or permanent basis. If you are looking to make a finance application, we can help you prepare your application to ensure that you get the cash injection you need for your business.

## **FOUR**

### **Succession Planning**

Do you have an exit strategy for your family business? What options are available? What are the financial and tax implications of sale or transfer of ownership?

With our years of experience working with family businesses, we can help you develop a strategy to exit your business and extract value in a tax efficient manner or pass on the business to family members during and after your lifetime in a tax efficient, fair and equitable way.

## **FIVE**

### **Accounting Systems**

Do you want to install new accounting hardware or software? Are you looking to upgrade? What is the best package for my business?

We provide a complete consultancy service to ensure that your business has an accounts system to meet your present and future financial reporting needs. We evaluate your accounts system requirements before making recommendations on the most suitable hardware and software packages for your business. We do this from the perspective of the client, not just to sell software. Our aim is to provide you with a solution that will produce quality information for your business. Once the accounts system is installed, we also provide training for your staff and on-going support.
