

Energy Labelling Regulation

On Oct 16th, 2012 the Decree for Energy Labelling of Electrical Lamps and Luminaires 201/30/EU by the European Commission entered into force.

Accordingly, starting on Sep 1st, 2013, both retail and online trade will have to provide the new EU energy label for all light sources (lamps). The same goes for luminaires, starting March 1st, 2014.

We would like to provide the required information on our products as promptly as possible and have already made the respective labels for light sources available for download in the service area on slv.com.

In the future the respective labels will appear immediately right by the product, starting on the respectively valid product range's due date at the latest.

For products put into circulation by us the labelling does not necessarily have to be presented on the packaging. For the end customer, however, a labelling conforming to the law has to be provided at the point of sale (POS) by retail or online trade.
