Tractor Radial Tires

HC 1000

VF (Very High Flexion) tire for self-propelled sprayers

- More lugs provide better durability, longer service life and lower operation cost.
- Higher maximum speed (40 mph) for less time on the road.
- Reduced soil compaction for higher loads thanks to lower inflation pressure.

Available Sizes

Tractor Radial Tires

AC 85

Modern all-round standard tire for all applications

- Radial tire with balanced characteristics for a wide range for applications both on the field and on the road.
- Larger ground contact area makes the tire well suited for handling grassland.
- Long service life thanks to wear-resistant tread compound.

HC 70

The all-round benchmark in the 70 series wide tire segment

- Higher load capacity than conventional 70 series.
- Gentle handling of the soil thanks to rounded shoulders and lug design.
- Wide tire shoulders provide comfortable and safe road performance.
- Low operating costs thanks to minimized slip.

SFT CHO (Cyclic Harvesting Operation)

More load at lower tire pressure

- Maximum load capacity for Cyclic Harvesting Operation.
- Minimum inflation pressure during cyclic harvest operation.
- Good driving stability in road application.
- Reduces soil compaction thanks to a large footprint.
- Fulfills all legal requirements (limited vehicle width).

HCM (High Capacity Municipal)

All-purpose quiet running tire for all terrains and applications

- Particularly suitable for municipal and road maintenance tractors and equipment.
- High durability due to steel belted radial construction and unique design of tread pattern in the central part.
- Exceptional traction characteristics due to more edges on the lugs. The tire has a specifically developed soft compound to work on low temperatures and icy surfaces.
