

Mitas increases tire price globally

Prague, May 31, 2021 – Mitas - part of the Trelleborg Group - announces a price increase globally by up to 8% across its agriculture, construction & material handling business segments.

The price increase is a result of the current market situation characterized by significant and continuous increases along the entire value chain and it will be implemented with immediate effect. Prices for rims will be increased by up to 20%.

This is the second step after the first increase implemented globally in January 2021 by up to 5%.
